## **Monday Messages Reflections On Life Leadership And Learning In Our Schools:**

*Monday Messages* Lou Antonetti, 2014-07-14 While living the code of conduct in our high school of over 2 400 students it was easy to see that procedures can only be enforced when the principles behind them are fully understood The human side of education is something that is lacking as we prepare for state assessments and bring attention to those who conduct themselves inappropriately The microcosm of a world we live in within our schools sometimes makes us rigid and non trusting due to the need to control student behavior We have found in our high school that student disciplinary referrals decreased by 50% because of the trust that was achieved with our students By using life lessons in the formal curriculum based education process you not only promote good morals and values but you remind people that there is a bigger picture The weekly messages quotes and vignettes contained in this book will hopefully inspire you to not only be a better educator student or coach but also a better person for your family friends and co workers It is important to reflect on our behavior since our reputation is based on our daily interactions and habits I have never heard of anyone who has bought back their reputation once it was lost Leadership by example at home and in the workplace along with an ego less demeanor will allow us to be great leaders both in our schools and personal lives

### **Women and Leadership in Higher Education During Global Crises** Schnackenberg, Heidi L., Simard, Denise

A., 2021-05-21 Women leaders and the COVID 19 pandemic are currently trending in the news. Major news outlets are all offering their positive opinions on how world wide women leaders have addressed the crisis and reassured their people. While this sort of press coverage is certainly uplifting, little to no research has been conducted to investigate the effectiveness of women's leadership decisions and strategies in these difficult times. In concert with these global struggles resulting from the pandemic are the challenges faced by higher education. Many colleges and universities have all but shuttered their doors and are conducting instruction, student support and day to day business almost completely online. Women academic leaders bear a great load during global crises with the combination of maintaining work responsibilities and caring for families and personal households. It is shown that women leaders may feel overwhelmed but remain heroes in unprecedented times of crisis. *Women and Leadership in Higher Education During Global Crises* informs readers and expands their understanding about specific challenges, issues, strategies and solutions that are associated with women leaders in higher education, the implications during the current pandemic and other natural disasters and how these strategies can be used for future agility and success. The chapters will cover narratives, strategies and initiatives that women leaders are using to lead their institutions, departments, sectors and organizations. It ties together the unimaginable challenges, joys, struggles and successes encountered by women in leadership in higher education and is ideal for higher education administrators, teachers, leaders, faculty, provosts, deans, program leaders, researchers, academicians and students interested in both the challenges and successes women leaders in higher education face during global crises.
