**Michel Ducharme, Jean-François
Constant**

Money And Liberty In Modern Europe A Critique Of Historical Understanding:

Money and Liberty in Modern Europe William M. Reddy, 1987-01-30 The concept of class along with its correlates in class interest class conflict class consciousness remain indispensable tools of historical explanation Yet research over the last twenty five years especially on the histories of England France and Germany has revealed an increasingly poor fit between these concepts and the reality they purport to explain Some historians have reacted by rejecting class others have proposed bold revisions in our understanding of it that enable it to encompass new research findings This study does neither Instead building on interpretive method Professor Reddy proposes to replace class with an alternative concept that seeks to capture from a new angle the fundamental relations of exchange and authority that have shaped social life in modern Europe

Money and Liberty in Modern Europe William M. Reddy, 1987-01-30 The concept of class along with its correlates in class interest class conflict class consciousness remain indispensable tools of historical explanation Yet research over the last twenty five years especially on the histories of England France and Germany has revealed an increasingly poor fit between these concepts and the reality they purport to explain Some historians have reacted by rejecting class others have proposed bold revisions in our understanding of it that enable it to encompass new research findings This study does neither Instead building on interpretive method Professor Reddy proposes to replace class with an alternative concept that seeks to capture from a new angle the fundamental relations of exchange and authority that have shaped social life in modern Europe

Kinship in Europe David Warren Sabean, Simon Teuscher, Jon Mathieu, 2007 Since the publication of Philippe Ariès' book *Centuries of Childhood* there has been great interest among historians in the history of the family and the household The essays in this text explore two major transitions in kinship patterns at the end of the Middle Ages and at the end of the 18th century

Rethinking Labor History Lenard R. Berlanstein, 1993 The fundamentals guiding labor historians are under scrutiny today as never before The field has attempted to uncover the socioeconomic conditions that produced labor militancy and class consciousness with scholars focusing on proletarianization the loss of control over the production process as the key to class conflict Currently this entire approach is being questioned In *Rethinking Labor History* nine well known French labor historians join the debate Advocates of both revisionist Marxism and discourse analysis are represented and examples of empirical research emerging from the theoretical disputes are included

Masters and Lords Shearer Davis Bowman, 1993-04-29 Among the regional landed elites in the Western World of the mid 1800s the two most formidable were the owners of slave plantations in the Southern states of the U S and the proprietors of manorial estates in the provinces of Prussian East Elbia *Masters and Lords* surveys the economic social and political histories of the two classes from the seventeenth and sixteenth centuries respectively and pays particular attention to planters during the secession crisis of 1860-61 and to Junkers during the revolutionary crisis of 1848-49 In the process Bowman grapples with such ambiguous and contentious concepts as capitalism conservatism and paternalism Despite very different labor systems antebellum planters

and contemporaneous Junkers alike presided over landed estates that functioned as both autocratic political communities and agricultural enterprises exporting valuable commodities to industrializing England This book also highlights important geographic demographic and political contrasts between the South and East Elbia as regional societies Bowman concludes that the crucial distinction between the two landed elites is to be found in the Junkers militarist and statist monarchism versus the planters libertarian but racist republicanism

Gender History in Practice Kathleen Canning, 2006 The eight essays collected in this volume examine the practice of gender history and its impact on our understanding of European history Each essay takes up a major methodological or theoretical issue in feminist history and illustrates the necessity of critiquing and redefining the concepts of body citizenship class and experience through historical case studies Kathleen Canning opens the book with a new overview of the state of the art in European gender history She considers how gender history has revised the master narratives in some fields within modern European history such as the French Revolution but has had a lesser impact in others Weimar and Nazi Germany *Gender History in Practice* includes two essays now regarded as classics *Feminist History after the Linguistic Turn* and *The Body as Method* as well as new chapters on experience citizenship and subjectivity Other essays in the book draw on Canning's work at the intersection of labor history the history of the welfare state and the history of the body showing how the gendered social body was shaped in Imperial Germany The book concludes with a pair of essays on the concepts of class and citizenship in German history offering critical perspectives on feminist understandings of citizenship Featuring an extensive thematic bibliography of influential works in gender history and theory that will prove invaluable to students and scholars *Gender History in Practice* offers new insights into the history of Germany and Central Europe as well as a timely assessment of gender history's accomplishments and challenges

Consumption: Theory and issues in the study of consumption Daniel Miller, 2001 *Civil Societies and Social Movements* Ronnie D. Lipschutz, 2017-03-02 This volume offers an historical and comparative overview of the literature theory practices and critiques of what has been variously labelled global or transnational civil society which includes a broad range of non state actors political social and economic The volume includes an introductory essay that historicizes and problematizes the relationship of society to state and market and contextualizes the pieces in the volume while locating the literature in relationship to international relations political science and sociology

Rethinking Marxism 0 The Rethinking Marxism Editorial Collective, 2023-05-09 First published in 2006 In this issue as part of the run up to the Rethinking Marxism 2006 conference to be held at the University of Massachusetts Amherst we devote a special section to Setting in Motion the art exhibit curated by Susan Jahoda and Jesal Kapadia for RM06

Latin America's Middle Class David Stuart Parker, Louise E. Walker, 2013-01-01 Designed for classroom use and nonspecialist readers this collection brings together some of the most influential texts ever written about Latin America's middle class

World Economic Primacy Charles Poor Kindleberger, 1996 Examines why certain countries have achieved at some periods in their history economic superiority over

all other countries **The Global Bourgeoisie** Christof Dejung, David Motadel, Jürgen Osterhammel, 2019-11-26 The first global history of the middle class While the nineteenth century has been described as the golden age of the European bourgeoisie the emergence of the middle class and bourgeois culture was by no means exclusive to Europe The Global Bourgeoisie explores the rise of the middle classes around the world during the age of empire Bringing together eminent scholars this landmark essay collection compares middle class formation in various regions highlighting differences and similarities and assesses the extent to which bourgeois growth was tied to the increasing exchange of ideas and goods The contributors indicate that the middle class was from its very beginning even in Europe the result of international connections and entanglements Essays are grouped into six thematic sections the political history of middle class formation the impact of imperial rule on the colonial middle class the role of capitalism the influence of religion the obstacles to the middle class beyond the Western and colonial world and lastly reflections on the creation of bourgeois cultures and global social history Placing the establishment of middle class society into historical context this book shows how the triumph or destabilization of bourgeois values can shape the liberal world order The Global Bourgeoisie irrevocably changes the understanding of how an important social class came to be **Re-Envisioning Global Development** Sandra Halperin, 2013-04-17 Re Envisioning Global Development offers an original conceptualisation of capitalist development from its origins to the present day Most approaches to understanding contemporary development assume that industrial capitalism was achieved through a process of nationally organised economic growth and that in recent years its organisation has become increasingly trans local or global However Halperin shows that nationally organised economic growth has rarely been the case it has only recently come to characterise a few countries and for only a few decades This innovative text elaborates an alternative ontology and way of thinking about global development during the last two centuries one linked not to nations and regions but to a set of essentially trans national relations and connections It argues that capitalist development has everywhere and from the start involved not whole nations or societies but only sectors or geographical areas within states By bringing this aspect of historically normal capitalist development into clearer focus the book clarifies the specific conditions and circumstances that enabled European economies to pursue a more broad based development following World War II and what prevented a similar outcome in the contemporary third world It also clarifies the nature spatial extent and circumstances of current globalising trends Wide ranging and provocative this book is required reading for advanced level students and scholars in development studies development economics and political science *Erasing the Invisible Hand* Warren J. Samuels, 2011-09-12 This book examines the use principally in economics of the concept of the invisible hand centering on Adam Smith It interprets the concept as ideology knowledge and a linguistic phenomenon It shows how the principal Chicago School interpretation misperceives and distorts what Smith believed on the economic role of government The essays further show how Smith was silent as to his intended meaning using the term to set minds at rest how the claim that the invisible

hand is the foundational concept of economics is repudiated by numerous leading economic theorists that several dozen identities given the invisible hand renders the term ambiguous and inconclusive that no such thing as an invisible hand exists and that calling something an invisible hand adds nothing to knowledge Finally the essays show that the leading doctrines purporting to claim an invisible hand for the case for capitalism cannot invoke the term but that other nonnormative invisible hand processes are still useful tools

In Proximity Melvyn New, Robert Bernasconi, Richard A. Cohen, 2001 In a world in which everything is reduced to the play of signs detached from what is signified Levinas asks a deceptively simple question Whence then comes the urge to question injustice By seeing the demand for justice for the other the homeless the destitute as a return to morality Levinas escapes the suspect finality of any ideology Levinas's question is one starting point for In Proximity a collection of seventeen essays by scholars in eighteenth century literature philosophy history and religion and their readings of Spinoza Kant Goethe Wordsworth Behn Defoe Fielding Sterne Diderot Laclos and Mendelssohn The title In Proximity alone speaks volumes about Levinas's philosophy and its relevance today If it is true that we are through technology moving closer and closer to one another writes editor Melvyn New then the importance of proximity and our response to it cannot be overstated For the contributors to this volume the question of whether we may ethically appropriate the object of study for our own causes has become vital Levinas asks us to see ourselves our own reading in proximity to what is not ourselves not our understanding of the world The dialogue created among the essays themselves establishes an enormous diversity of texts and ideologies to which Levinas can contribute something of significant value At a time when the secondary literature on Levinas and his work is expanding explosively the cross disciplinary voices gathered together in In Proximity come at precisely the right time

Forging Nations David Blaazer, 2023 Forging Nations considers the relationships between money power and nationality in England Scotland and Ireland from the Union of the Crowns in 1603 to the present day Blaazer examines how struggles over monetary power have continued to shape arguments and attitudes in recent debates over the Euro Scottish independence and austerity

Liberalism and Hegemony Michel Ducharme, Jean-François Constant, 2009-01-01 The essays collected here explore the possibilities and limits presented by The Liberal Order Framework for various segments of Canadian history and within them the paramount influence of liberalism throughout the nineteenth and twentieth centuries is debated in various contexts

The Navigation of Feeling William M. Reddy, 2001-09-10 In The Navigation of Feeling A Framework for the History of Emotions William M Reddy offers a theory of emotions which both critiques and expands upon recent research in the fields of anthropology and psychology Exploring the links between emotion and cognition between culture and emotional expression Reddy applies this theory of emotions to the processes of history He demonstrates how emotions change over time how emotions have a very important impact on the course of events and how different social orders either facilitate or constrain emotional life In an investigation of Revolutionary France where sentimentalism in literature and philosophy had promised a new and unprecedented kind of

emotional liberty Reddy's theory of emotions and historical change is successfully put to the test Ranciere Now Oliver Davis, 2013-11-04 The French philosopher Jacques Rancière is well known across the world for his groundbreaking contributions to aesthetic and political theory and for his radical rethinking of the question of equality This much needed new collection situates Rancière's thought in a range of practical and theoretical contexts These specially commissioned essays cover the complete history of Rancière's work and reflect its interdisciplinary reach They span his early historical research of the 1960s and 70s his celebrated critique of pedagogy and his later political theory of dissensus and disagreement as well as his ongoing analysis of literature and the aesthetic regime of art Rancière's resistance to psychoanalytic thinking is also explored as are his most recent publications on film and film theory Contributors include Tom Conley Carolyn Steedman Geneviève Fraisse Jean-Luc Nancy Jeremy Lane and many more The book also includes a brand new interview with Rancière reflecting on his intellectual project and developing new lines of thought from his latest major work *Aisthesis* Rancière Now will be essential reading for students and scholars across the humanities and social sciences it will stimulate and inspire discussion of Rancière's work for years to come **Democracy's Paradox** Bruce Kapferer, Dimitrios

Theodossopoulos, 2019-04-02 Does populism indicate a radical crisis in Western democratic political systems Is it a revolt by those who feel they have too little voice in the affairs of state or are otherwise marginalized or oppressed Or are populist movements part of the democratic process Bringing together different anthropological experiences of current populist movements this volume makes a timely contribution to these questions Contrary to more conventional interpretations of populism as crisis the authors instead recognize populism as integral to Western democratic systems In doing so the volume provides an important critique that exposes the exclusionary essentialisms spread by populist rhetoric while also directing attention to local views of political accountability and historical consciousness that are key to understanding this paradox of democracy
