Women, Economic Development, and Higher Education Diane E. Eynon,2017-06-19 This book is a multi disciplinary exploration of the intersection relationship and connection between higher education economic development and gender in post Apartheid South Africa In just twenty years South Africa has rewritten its constitution restructured its macroeconomic growth and development policies restructured its higher education system and made a commitment to provide opportunity for all its citizens specifically those who have historically been marginalized women and blacks Eynon weaves together these unique perspectives to illustrate how these multiple domains map onto women and the critical role they play in the present and future of the country Gender equality and women s empowerment and education were considered key drivers to South Africa s transformation

Sustainability Transitions in South Africa Najma Mohamed,2018-07-11 South Africa s transition to a greener economy features prominently in the long term development vision of the country and is an integral

part of the country's national climate change response strategy. Despite significant gains in socio-economic development since its transition to democracy, the country continues to face the triple challenges of rising unemployment, income inequality, and poverty amid a slowdown in economic growth. Sustainability transitions offer new ways of shifting the trajectory of South Africa's resource-intensive economy towards low-carbon pathways linked to the country's transformative development agenda. Calls for inclusive approaches to greening the South African economy, which addresses the most vulnerable in society and ensures that the benefits of sustainability innovations reach all South Africans, are becoming more pronounced as sustainable development policy reforms are being implemented. The question that should be placed centre stage in South Africa's sustainability discourse is whether notions of justice and inclusivity are being sufficiently addressed in the design and implementation of policy and programme interventions. This book explores South Africa's sustainability transition through reflections on critical policy, economic, technological, social, and environmental drivers. It provides a synthesis of theoretical insights, including new models and concepts, and praxis through illustrations from South Africa's growing landscape of sustainable development policies and programmes. Finally, it assesses whether these transition pathways are beginning to reconfigure the system-level structures hindering the country's goal of ensuring environmental sustainability and an equitable transition to a low-carbon economy.

Courts in Federal Countries Nicholas Aroney, John Kincaid, 2017-01-01. *Courts in Federal Countries* examines the role high courts play in thirteen countries including Australia, Brazil, Canada, Germany, India, Nigeria, Spain, and the United States.

Care and Coronavirus Tom Disney, Lucy Grimshaw, 2024-12-02. Arguing that COVID-19 heightened the attention paid to care and the ways in which care is vital for the maintenance of ourselves and the world around us, *Care and Coronavirus* calls for a reflection on the failures and successes of care during the pandemic and in its aftermath so that we can plan for a more caring future.

The Global Supply Chain Wolfgang Lehmacher, 2017-01-28. This book provides readers an in-depth understanding of the inner mechanisms and principles of the global supply chain. Authored by the Head of Supply Chain and Transport Industries at the World Economic Forum, it draws on a wealth of operational and managerial expertise in the global supply chain industry that drive the world's economies. The book analyzes the importance and impact of globally networked sourcing, production, and distribution and presents detailed information on the opportunities, limitations, and challenges of linear value and supply chain systems. Building on a series of recent industry cases and with a focus on the latest developments in actual business processes and models, it reveals how the transformation toward circular supply chains and regenerative resource management forms the basis for success and sustainability in business. The book brings together technical, social, political, and geographical trends, suggesting how supply chain management can lead the quest for many of the world's most pressing challenges. Yossi Sheffi, Professor of Engineering, MIT, Head, MIT Center for Transportation and Logistics. This book provides an essential roadmap guiding the reader easily through complex developments and concepts. John Manners Bell, CEO.

Transport Intelligence and Honorary Visiting Professor Guildhall Business School London With strategic foresight Lehmacher develops a vision of a circular economy within which consumer manufacturer and logistics companies assume collective responsibility for sustainable value creation Alfred Talke Group Managing Director ALFRED TALKE Logistic Services Those who are active in logistics and supply chain management in practice or academia will discover a fresh view on the whole field of activity beyond the day to day business Prof Dr Ing Thomas Wimmer Chairman of the Executive Board BVL International

Cutting Edge Research Methods in Hospitality and Tourism Fevzi Okumus,S. Mostafa Rasoolimanesh,Shiva Jahani,2023-01-25 Cutting Edge Research Methods in Hospitality and Tourism sits at the forefront of fast paced developments in the tourism and hospitality industry highlighting the importance of applied and pure research to address the theoretical and practical problems and gaps State-owned enterprises in Africa and the economics of public service delivery Fulufhelo G. Netswera,Omololu M. Fagbadebo,Nirmala Dorasamy,2023-03-01 This book intends to provide a continuous assessment of the crisis in governance in Africa As it is there are huge deficits in the capacity of African states to harness vast human and material resources to promote good governance This manifests in pervasive corruption collapsed service delivery collapsed state owned enterprises eroded social trust capital flight escalating levels of poverty and wars human insecurity and stunted growth The public sector is the pulse of service delivery because the entire governance system revolves around the sourcing of materials and services mostly from the private sector in order to achieve its public policy intents The procurement process therefore ordinarily ought to yield positive economic outcomes and an efficiency driven system in favour of the government itself and its service recipients However this more often than not is not the case Despite its enormous wealth the African continent is in an economic quagmire a dilemma that requires multi facet research activities This is the motivation for this book **The Oxford Handbook of the South African Economy** Arkebe Oqubay,Fiona Tregenna,Imraan Valodia,2021-11-18 While sharing some characteristics with other middle income countries South Africa is a country with a unique economic history and distinctive economic features It is a regional economic powerhouse that plays a significant role not only in southern Africa and in the continent but also as a member of BRICS However there has been a lack of structural transformation and weak economic growth and South Africa faces the profound triple challenges of poverty inequality and unemployment Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments robust empirical evidence and rigorous analysis of South Africa s complex economic landscape This volume seeks to provide a wide ranging set of original detailed and state of the art analytical perspectives that contribute to scientific knowledge as well as to well informed and productive discourse on the South African economy While concentrating on the more recent economic issues facing South Africa the handbook also provides historical and political context It offers an in depth examination of strategic issues in the country s key economic sectors and brings together diverse analytical perspectives State Capitalism Lalita Som,2022-01-12 The crises emanating

from the Global Financial Crisis and the COVID 19 Pandemic have underscored the emergency role of the State and its smooth seamless reactivation for situations when private activity and markets are disrupted In many countries SOEs have been a crucial part in delivering on that effort as agents of the State While SOEs are increasingly sought to play a role during emergency situations evidence suggests that they misallocate capital and mismanage resources This is indicative of the conflicts of interests in owning and regulating enterprises as well as between the commercial and non commercial objectives of SOEs crony capitalism the private agenda of public officials internal management of SOEs the significant role played by state owned banks and financial institutions and the conflicts that arise in the State s primary role vs its ownership of enterprises The studies of eight countries from different regions undertaken for this book provide answers to these key policy questions related to state capitalism Generalizing from the results of multi country studies to arrive at universally applicable predictions prescriptions and policy recommendations is inherently difficult Individual countries are quite different in their socio economic historical political and institutional circumstances So are their experiences as the eight country studies highlight even as the book attempts to extrude from available research the principal common characteristics of and practices followed by successful SOEs independently of country context Among other conditions the two most important conclusions that can be drawn from the country studies are that competition and regulation rather than ownership per se is key to efficiency

The Wiley Handbook of Global Educational Reform Kenneth J. Saltman, Alexander J. Resurgent Africa Banji Oyelaran-Oyeyinka, 2020-03-31 Resurgent Africa Structural Transformation in

Sustainable Development is a study of structural change dynamics in Africa and its effect on job creation living standards and the efficiency of productive cities through manufacturing productivity growth that benefit the majority. Empirical data from selected African countries including Nigeria, Ghana, South Africa, Kenya, Rwanda, and Ethiopia provides in depth analysis and knowledge of the continent's diversified economies by establishing relationships between industrialization trends, rates of urbanization and urban living standards, income growth and employment in Africa. The findings reveal unconventional pathways of structural change, patterns of jobless growth suggesting economic growth that does not necessarily lead to employment dominance of services at the expense of manufacturing industry, explaining the regress in Africa's industrial sector and occurrence of structural transformation without improvement in labour productivity. These are important concerns for Africa's long term development leading to the conclusion that sustainable urbanization and industrialization are not only closely connected but also key drivers of economic change. The book includes recommendations for policymakers to adopt a new approach to development for a resurgent Africa.
