Charles Nehme, What Are Prefab Homes Prefab homes short for prefabricated homes are dwellings constructed in sections or modules in a factory setting before being transported and assembled on a permanent site Unlike traditional homes built brick by brick on location prefab homes are largely manufactured off site and brought together in a fraction of the time These homes range from simple affordable models to luxurious custom built designs that can rival the finest architecture This method of construction offers a streamlined efficient approach to building that has gained popularity in recent years due to its versatility and potential for cost savings With prefab homes quality control is often higher as construction takes place in a controlled environment reducing errors caused by weather or on site conditions Prefab homes are no longer the simplistic or utilitarian structures they were once perceived to be Today they encompass a wide variety of styles from ultra modern to traditional proving that prefabrication can accommodate any design preference **The Sustainable DIY Guide:**
