Palka, 2012-02-06 This book of contributed chapters by subject matter expertly provides an overview and analysis of salient contemporary and historical military subjects from the military geographer s perspective Factors of geography have had a compelling influence on battles and campaigns throughout history however geography and military affairs have gained heightened attention during the past two decades and military geography is the discipline best situated to explain them Hence the premise of this book and its contents are founded on the principle that geographical knowledge of space place people and scale provide essential insights into contemporary security issues and promotes the idea that such insight is critical to understanding and managing significant military problems at local regional and global scales The Political Economy of Bilateral Aid Peter Blunt, 2022-12-23 The social and economic consequences of the COVID 19 pandemic and of extreme climate events have brought into sharp relief the serious deficiencies of our political economies The dominant global ideology of neoliberalism and its architects and beneficiaries are responsible for this Bilateral development assistance is an integral part of the neoliberal grand design However while the deficiencies of neoliberalism have been starkly exposed by the

pandemic its collapse is unlikely in the short term Much bilateral assistance will therefore continue to be self serving Within these confines and on the basis of a sharply critical analysis of the functioning of technical assistance at the point of the design and delivery of programmes and projects this book identifies crucial supply side nodes of power and influence where feasible and relatively straight forward functional reforms strategy structure selection training would make genuinely developmental results for recipients more likely and enhance donor interests at the same time It argues that more authentic empathetic and altruistic technical assistance will be essential to bringing this about The arguments are supported by primary published evidence gathered by the author during 18 years of full time employment as a team leader or programme manager of technical assistance programmes The book will be of interest to students of development management development economics political economy and international relations as well as policy makers development practitioners and supply and demand side government officials

Stanton, Chris Baber, 2017-10-23 Since its inception just after the Second World War Human Factors research has paid special attention to the issues surrounding human control of systems Command and control environments continue to represent a challenging domain for human factors research Modelling Command and Control takes a broad view of command and control research to include C2 command and control C3 command control and communication and C4 command control communication and computers as well as human supervisory control paradigms The book presents case studies in diverse military applications for example land sea and air of command and control The book explores the differences and similarities in the land sea and air domains the theoretical and methodological developments

approaches to system and interface design and the workload and situation awareness issues involved It places the role of humans as central and distinct from other aspects of the system Using extensive case study material Modelling Command and Control demonstrates how the social and technical domains interact and why each require equal treatment and importance in the future

Benefit-Risk Appraisal of Medicines Filip Mussen, Sam Salek, Stuart Walker, 2009-08-04

Benefit risk assessment is at the centre of the approval process for every new medicine The ability to assess the risks of a new medicine accurately and to balance these against the benefits the medicine could bring is critical for every regulatory authority and pharmaceutical company Despite this there are very few tried and tested evaluative models currently available The authors of this book have developed a new pioneering tool for the assessment of benefits and risks for new medicines in development This model utilises a multi criteria decision analysis which involves selecting scoring and weighting key benefit and risk attributes and leads to an overall appraisal of benefits and risks of medicines Benefit Risk Appraisal of Medicines establishes the background and criteria required to assess benefit and risk in general and reviews the current practices by regulatory authorities and the pharmaceutical industry including those models currently available It outlines the development and evaluation of the authors new model and analyses the implications of its implementation Describes an innovative systematic model which leads to transparent and responsible benefit risk decision making Contributes important ideas to the debate on benefit risk appraisal Provides a future framework for benefit risk appraisal of medicines Benefit Risk Appraisal of Medicines covers the entire process from the discovery of new medicines to their marketing and is ideal for all those who work in the pharmaceutical industry and regulatory authorities as well as post graduate students of pharmaceutical medicine and clinical pharmacology
