A Guide to Modeling Thermoplastic Composite Manufacturing Processes Corey Lynam, P. Eng., Abbas S. Milani, P. Eng., Ph.D, 2014-09-09 Models and experiments for faster less expensive manufacture of thermoplastic parts Focused on simulating thermal defects in thermoplastics Techniques for better molds tooling and equipment Book explains methods and coding to create FEM based models to optimize process variables and

predict dimensional distortions during the manufacture of thermoplastic matrix composite parts After investigating defects such as spring in caused by thermal inconsistencies during manufacture the text offers a step by step approach to simulating and predicting the magnitude of distortion via readily available FE codes Models are validated by testing using the example of a multi staged roll formed continuous thermoplastic woven laminate which can be readily extended to a variety of mold geometries Information in this book is intended to reduce the need for costly and time consuming re tooling in thermoplastic parts design

Enzyme-Mediated Ligation Methods Timo Nuijens, Marcel Schmidt, 2019-06-03 This volume discusses different enzyme catalyzed ligation methodologies for a variety of different chemical transformations This book wants readers to view enzymes as a powerful tool in both academic and industrial research Chapters in this book cover topics such as sortase A mediated generation of site specifically conjugated antibody drug conjugates omniligase catalyzed inter and intramolecular ligation ligation catalyzed by microbial transglutaminase peptide cyclization mediated by cyanobactin macrocyclases butelase 1 and sortase A using BioID as a tool for protein proximity labeling in living cells and inducible selective labeling of proteins via enzymatic oxidation of tyrosine Written in the highly successful Methods in Molecular Biology series format chapters include introductions to their respective topics lists of the necessary materials and reagents step by step readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls Cutting edge and thorough Enzyme Mediated Ligation Methods is a valuable resource for students and scientists from different disciplines who are interested in using enzymatic strategies to answer their research questions

Excitation Energy and Electron Transfer in Photosynthesis Govindjee, J. Barber, W.A. Cramer, J.H.C. Goedheer, J. Lavorel, R. Marcelle, B. Zilinskas, 2012-12-06 The present volume Excitation Energy and Electron Transfer in Photosynthesis is dedicated to a colleague and dear friend Warren L. Butler I first met Warren when he visited the University of Illinois at Urbana during the early sixties he left an indelible impression on me as a person with warmth and enthusiasm Initially he was someone I looked to for guidance but later we also became friends Whenever I passed through Los Angeles I always telephoned Warren and often ended up taking a plane to San Diego to stay with two wonderful people Warren and his wife Lila His invitations could never be refused Below I reproduce the words of Herbert Stern on Warren L. Butler's life these words express my sentiments as well as those of many of Warren's friends A lifetime of academic creativity crisscrossed by streaks of highbrow and lowbrow fun There is no summary to this adventure because we can neither make nor proclaim an end Warren has bequeathed us his garden of academic treasures It is ours to keep and tend There is lots of joy in our many recollections of Warren's life and sorrow's foil can only brighten the brightness that the joy radiates

Profile of the Oil and Gas Industry Linda Herkenhoff, 2013-11-30 Oil and gas are important to every aspect of our economy yet the oil and gas industry is distinguished by its combination of increasing demands and decreasing discovery volumes and it is an industry shrouded in an environment of extremely volatile pricing Although the profits enjoyed by the oil and gas industry are enormous the industry remains one of the most capital intensive in a world where rising expenses continue to threaten to squeeze profit margins Geopolitics may continue to be the most important variable in maintaining existing assets and in successfully achieving new discoveries and carrying out their subsequent development But finding new oil and gas reserves is becoming more challenging and the places where hydrocarbons are being found are more remote Thus technology advances are also a key variable to enable exploration drilling and development to become economically feasible in some of these more difficult operating environments For the last century oil and gas additions have exceeded demand but has this industry now reached a peak oil situation Some experts argue we are on the cusp of maximum oil production while others suggest we are still about a decade away Natural gas demand however is rising at a slightly faster rate than oil Natural gas may be the immediate replacement fuel for oil as a source of clean and efficient electric power generation Three out of the top ten Fortune 500 companies were oil gas companies in 2011 This short introduction to the oil and gas industry will focus on history operations major companies outside market forces regulation and the current challenges the industry faces Such factors as finite natural resources the environment economics geopolitics and technology will all come into play in the narrative The book will demonstrate how the leaders of this industry former champions of progress are now coming under scrutiny and being depicted as the biggest culprits of environmental degradation Yet the industry is likely to continue to grow until some form of alternate fuels is developed The oil and gas industry will continue to have an enormous impact on life on the planet
