Rafael Murillo Munoz,2012-10-05 Containing the most recent theoretical accomplishments numerical developments experimental investigations and field studies in Fluvial Hydraulics River Flow 2012 is an excellent resource for researchers civil and environmental engineers and practitioners in river related disciplines      **Coupled Thermo-Hydro-Mechanical Processes in Fractured Rock Masses** Fengshou Zhang,Branko Damjanac,Jason Furtney,2023-08-10 The subject of thermo hydro mechanical coupled processes in fractured rock masses has close relevance to energy related deep earth engineering activities such as enhanced geothermal systems geological disposal of radioactive waste sequestration of CO2 long term disposal of waste water and recovery of hydrocarbons from unconventional reservoirs Despite great efforts by engineers and researchers comprehensive understanding of the thermo hydro mechanical coupled processes in fractured rock mass remains a great challenge The discrete element method DEM originally developed by Dr Peter Cundall has become widely used for the modeling of a rock mass including its deformation damage fracturing and stability DEM modeling of the coupled thermo hydro mechanical processes in fractured rock masses can provide some unique insights to say the least for better understanding of those complex issues The authors of this book have participated in various projects involving DEM modeling of coupled thermo hydro mechanical processes during treatment of a rock mass by fluid injection and or extraction and have provided consulting services to some of the largest oil and gas companies in the world The breadth and depth of our engineering expertise are reflected by its successful applications in the major unconventional plays in the world including Permian Marcellus Bakken Eagle Ford Horn River Chicotepec Sichuan Ordos and many more The unique combination of the state of the art numerical modeling techniques with state of the practice engineering applications makes the presented material relevant and valuable for engineering practice We believe that it is beneficial to share the advances on this subject and promote some further development      Geoinformatics and Atmospheric Science Tomasz Niedzielski,Krzysztof Migala,2017-09-09 This volume presents recent developments in atmospheric sciences driven by numerical modeling which makes use of geospatial technologies and increasing computational power It gathers examples of how geoinformatics supports meteorological climatological and water related studies One of the most important features of geospatial technologies is that they provide methods and tools which may be utilized in real time or near real time in order to monitor and predict atmospheric processes This is particularly crucial in areas where dynamics of atmospheric phenomena is considerable and causes difficulties in accurate forecasting One of such areas is the transitional zone between oceanic and continental features of the mid latitude climate Good examples of investigations into the transitional zone come from Poland and its neighboring countries The topical volume provides the reader with a selection of papers on physically based and data based modelling of weather related phenomena over Poland This main theme of the topical volume is extended to cover case studies on the use of geoinformatics in atmospheric studies in other regions at a range of spatial scales      Supercomputing

Vladimir Voevodin, Sergey Sobolev, 2018-12-31 This book constitutes the refereed proceedings of the 4th Russian Supercomputing Days RuSCDays 2018 held in Moscow Russia in September 2018 The 59 revised full papers and one revised short paper presented were carefully reviewed and selected from 136 submissions The papers are organized in topical sections on parallel algorithms supercomputer simulation high performance architectures tools and technologies

**Microstructural Geochronology** Desmond E. Moser, Fernando Corfu, James R. Darling, Steven M. Reddy, Kimberly Tait, 2017-11-17 Microstructural Geochronology Geochronology techniques enable the study of geological evolution and environmental change over time This volume integrates two aspects of geochronology one based on classical methods of orientation and spatial patterns and the other on ratios of radioactive isotopes and their decay products The chapters illustrate how material science techniques are taking this field to the atomic scale enabling us to image the chemical and structural record of mineral lattice growth and deformation and sometimes the patterns of radioactive parent and daughter atoms themselves to generate a microstructural geochronology from some of the most resilient materials in the solar system First compilation of research focusing on the crystal structure material properties and chemical zoning of the geochronology mineral archive down to nanoscale Novel comparisons of mineral time archives from different rocky planets and asteroids and their shock metamorphic histories Fundamentals on how to reconstruct and date radiogenic isotope distributions using atom probe tomography Microstructural Geochronology will be a valuable resource for graduate students academics and researchers in the fields of petrology geochronology mineralogy geochemistry planetary geology astrobiology chemistry and material science It will also appeal to philosophers and historians of science from other disciplines **Dam Failure**

**Mechanisms and Risk Assessment** Limin Zhang, Ming Peng, Dongsheng Chang, Yao Xu, 2016-08-22 This book integrates the physical processes of dam breaching and the mathematical aspects of risk assessment in a concise manner The first book that introduces the causes processes and consequences of dam failures Integrates the physical processes of dam breaching and the mathematical aspects of risk assessment in a concise manner Emphasizes integrating theory and practice to better demonstrate the application of risk assessment and decision methodologies to real cases Intends to formulate dam breaching emergency management steps in a scientific structure *Precision agriculture for sustainability* Dr John

Stafford, 2018-11-06 Comprehensive review of key technologies in precision agriculture from proximal and remote sensing to decision support systems and variable rate technologies Surveys key applications of precision agriculture from controlled traffic farming to site specific nutrient and water management Includes discussion of the economics of precision agriculture

**INTEGRATED HEALTH CARE FOR PEOPLE WITH AUTISM SPECTRUM DISORDER** Ellen Giarelli, Kathleen Fisher, 2016-01-27 People with autism spectrum disorder may have unique development challenges but they face a range of health issues like all people and many of these may be compounded by an ASD This book provides the tools and information so the health care professional can think differently about caring for this patient and see through his or her eyes The

presentations of 28 contributors share the importance of early continuous coordinated and individualized care that is integrated into the existing health care system Examples of models and policies that have improved the access experience and outcomes for patients with ASD are shared In addition the importance of continuous quality improvement through data collection and monitoring of outcomes is emphasized This information is essential for addressing the capacity crisis now in providing routine specialized and emergency care for individuals with ASD Some of the major topics discussed include the epidemiology of autism spectrum disorder facilitating the role of parents in management and advocacy the impact of the sensory environment on care medications for the treatment of psychiatric comorbidities frameworks to guide practice and research with patients building a home for acute care needs assisting parents in adapting and making decisions regarding treatment options integrating genetic testing into health care educating nurses with faculty and curricular issues emergency medicine and improving service physical therapy to promote health function and community participation using big data to direct quality improvement and monitoring patient outcomes in research and policy outcomes This significant volume brings together a wealth of expertise with information and strategies across the lifespan for individuals with autism spectrum disorder

**Photovoltaic Solar Energy** Angèle Reinders, Pierre J. Verlinden, Wilfried van Sark, Alexandre Freundlich, 2017-01-03 Solar PV is now the third most important renewable energy source after hydro and wind power in terms of global installed capacity Bringing together the expertise of international PV specialists Photovoltaic Solar Energy From Fundamentals to Applications provides a comprehensive and up to date account of existing PV technologies in conjunction with an assessment of technological developments Key features Written by leading specialists active in concurrent developments in material sciences solar cell research and application driven R chalco-genide thin film solar cells thin film silicon based PV technologies organic PV and III Vs PV concentrator technologies space technologies and economics life cycle and user aspects of PV technologies Each chapter presents basic principles and formulas as well as major technological developments in a contemporary context with a look at future developments in this rapidly changing field of science and engineering Ideal for industrial engineers and scientists beginning careers in PV as well as graduate students undertaking PV research and high level undergraduate students

**Deformation Structures and Processes within the Continental Crust** S. Llana-Fúnez, A. Marcos, F. Bastida, 2014-06-04 This volume presents a selection of papers showing the current focus of studies of deformation structures and processes within the continental crust The selected contributions use a large range of analytical techniques suited to the full range of structure sizes and fine tuned to the physical process that controls the deformation from the grain boundary at the micro scale the lithological contact at the meso scale to the plate boundary at the global scale The papers in the volume are grouped into three sections relating to specific lines of research within the analysis of rock deformation structures and processes in particular in respect to the continental crust structures within shear zones and faults magmatic structures and microstructures and rheology These sections include papers

describing field studies experimental rock deformation and numerical modelling of deformation processes

**Comprehensive Supramolecular Chemistry II** George W. Gokel, Len Barbour, 2017-06-22 Comprehensive Supramolecular Chemistry II Second Edition Nine Volume Set is a one stop shop that covers supramolecular chemistry a field that originated from the work of researchers in organic inorganic and physical chemistry with some biological influence The original edition was structured to reflect in part the origin of the field However in the past two decades the field has changed a great deal as reflected in this new work that covers the general principles of supramolecular chemistry and molecular recognition experimental and computational methods in supramolecular chemistry supramolecular receptors dynamic supramolecular chemistry supramolecular engineering crystallographic engineered assemblies sensors imaging agents devices and the latest in nanotechnology Each section begins with an introduction by an expert in the field who offers an initial perspective on the development of the field Each article begins with outlining basic concepts before moving on to more advanced material Contains content that begins with the basics before moving on to more complex concepts making it suitable for advanced undergraduates as well as academic researchers Focuses on application of the theory in practice with particular focus on areas that have gained increasing importance in the 21st century including nanomedicine nanotechnology and medicinal chemistry Fully rewritten to make a completely up to date reference work that covers all the major advances that have taken place since the First Edition published in 1996

**Acceleration of Biomedical Image Processing with Dataflow on FPGAs** Frederik Grüll, Udo Keschull, 2016-06-30 Short compute times are crucial for timely diagnostics in biomedical applications but lead to a high demand in computing for new and improved imaging techniques In this book reconfigurable computing with FPGAs is discussed as an alternative to multi core processing and graphics card accelerators Instead of adjusting the application to the hardware FPGAs allow the hardware to also be adjusted to the problem Acceleration of Biomedical Image Processing with Dataflow on FPGAs covers the transformation of image processing algorithms towards a system of deep pipelines that can be executed with very high parallelism The transformation process is discussed from initial design decisions to working implementations Two example applications from stochastic localization microscopy and electron tomography illustrate the approach further Topics discussed in the book include Reconfigurable hardware Dataflow computing Image processing Application acceleration

**The Shoulder** Gazi Huri, Nikolaos K. Paschos, 2017-10-10 This book provides a broad overview of operative and non operative treatments of various conditions affecting the shoulder It is presented in an easy to use format with each chapter including multiple choice questions to assist the reader in preparing for boards to improve shoulder knowledge and increase success in exams The Shoulder clearly describes the basic science anatomy biomechanical features and principals of physical examination while utilising an algorithmic approach to shoulder disorders The contributors are an international team of shoulder experts who understand what is important to know at every level The result is a book of value to those new to shoulder challenges and also

experienced surgeons who wish to have a quick and handy guide to current concepts and knowledge of shoulder conditions and treatment
