people The Buddhist ethic provides one path into the heart of human choices illuminating as it does the incorrect thinking that underlies bad choices including those that most people think are based on common sense and scientific expertise This book applies this idea to the matter of air conditioning using Thailand and like Southeast Asian settings as an example It makes the claim that emerging western interest in mindfulness could be leveraged to introduce new thinking on personal energy use that will go much further to create true sustainability than programs based on harnessing geophysical technologies such as solar and wind
