psychometric methods *Contemporary Intellectual Assessment, Third Edition* Dawn P. Flanagan, Patti L. Harrison, 2012-01-24 In one volume this authoritative reference presents a current comprehensive overview of intellectual and cognitive assessment with a focus on practical applications. Leaders in the field describe major theories of intelligence and provide the knowledge needed to use the latest measures of cognitive abilities with individuals of all ages from toddlers to adults. Evidence-based approaches to test interpretation and their relevance for intervention are described. The book addresses critical issues in assessing particular populations including culturally and linguistically diverse students, gifted students and those with learning difficulties and disabilities in today's educational settings. New to This Edition: Incorporates major research advances and legislative and policy changes. Covers recent test revisions plus additional tests: the NEPSY II and the Wechsler Nonverbal Scale of Ability. Expanded coverage of specific populations: chapters on autism spectrum disorders, attention deficit hyperactivity disorder, sensory and physical disabilities, and traumatic brain injury and intellectual disabilities. Chapters on neuropsychological approaches, assessment of executive functions, and multi-tiered service delivery models in schools.

Individual Differences and Personality Colin Cooper, 2020-09-30 Individual Differences and Personality provides a student-friendly introduction to both classic and cutting-edge research into personality, mood, motivation, and intelligence and their applications in psychology and in fields such as health, education, and sporting achievement. Including a new chapter on toxic personality traits and an additional chapter on applications in real-life settings, this fourth edition has been thoroughly updated and uniquely covers the necessary psychometric methodology needed to understand modern theories. It also develops deep processing and effective learning by encouraging a critical evaluation of both older and modern theories and methodologies, including the Dark Triad, emotional intelligence, and psychopathy. Gardner's and hierarchical theories of intelligence and modern theories of mood and motivation are discussed and evaluated, and the processes which cause people to differ in personality and intelligence are explored in detail. Six chapters provide a non-mathematical grounding in psychometric principles such as factor analysis, reliability, validity, bias, test construction, and test use. With self-assessment questions, further reading, and a companion website including student and instructor resources, this is the ideal resource for anyone taking modules on personality and individual differences.

Handbook of Parenting Marc H. Bornstein, 2019-02-01 This highly anticipated third edition of the Handbook of Parenting brings together an array of field-leading experts who have worked in different ways toward understanding the many diverse aspects of parenting. Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent, professional, and policymaker wonders about. Parenting is a perennially hot topic. After all, everyone who has ever lived has been parented, and the vast majority of people become parents themselves. No wonder bookstores, house shelves, and how-to parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence-based. The Handbook of Parenting is Period. Each chapter has been written to be read and absorbed in a

single sitting and includes historical considerations of the topic a discussion of central issues and theory a review of classical and modern research and forecasts of future directions of theory and research Together the five volumes in the Handbook cover Children and Parenting the Biology and Ecology of Parenting Being and Becoming a Parent Social Conditions and Applied Parenting and the Practice of Parenting Volume 4 Social Conditions and Applied Parenting describes socially defined groups of parents and social conditions that promote variation in parenting The chapters in Part I on Social and Cultural Conditions of Parenting start with a relational developmental systems perspective on parenting and move to considerations of ethnic and minority parenting among Latino and Latin Americans African Americans Asians and Asian Americans Indigenous parents and immigrant parents The section concludes with considerations of disabilities employment and poverty on parenting Parents are ordinarily the most consistent and caring people in children s lives However parenting does not always go right or well Information education and support programs can remedy potential ills The chapters in Part II on Applied Issues in Parenting begin with how parenting is measured and follow with examinations of maternal deprivation attachment and acceptance rejection in parenting Serious challenges to parenting some common such as stress and depression and some less common such as substance abuse psychopathology maltreatment and incarceration are addressed as are parenting interventions intended to redress these trials
