Modernizing Democracy Associations And Associating In The 21st Century:

Modernizing Democracy Matthias Freise, Thorsten Hallmann, 2014-05-13 Modernizing Democracy brings together scholars focusing the role of associations and associating in contemporary societies Organizations and associations have been identified as the meso level of society and as the basic elements of democracy They are important providers of welfare services and play an important role between the individual and political spheres In recent years the environment of associations and associating has changed dramatically Individualization commercialization and globalization are challenging both democracy and the capability of associations to fulfill the functions attributed to them by social sciences This change provides the central question of the volume Is being part of an organization or association becoming an outdated model And do associations still have the capacity of modernizing societies or are they just outdated remnants of post democracy The contributions to Modernizing Democracy will be organized into Studying Association and Associating in the 21st Century Associating in Times of Post Democracy and Associations and the Challenge of Capitalist Development The book will be attractive to third sector researchers as well as a broader academic community of political scientists sociologists economists legal scientists and related disciplines

Civil Society: Between Concepts and Empirical Grounds Liv Egholm, Lars Bo Kaspersen, 2020-11-29 Examining the historical and social trajectories involved in the continuous development of civil society this volume reveals the contextual nature of the process Through empirical studies focusing primarily on Denmark and covering the period from 1849 to the present day it analyses the manner in which civil society has been practised and transformed over time Presenting a new theoretical framework informed by a relational and processual perspective the book sheds new light on familiar questions pertaining to civil society the production of its boundaries and spaces of action and the means by which these spaces can become causal factors A fresh intervention in the study of a concept that has been central in defining ideas of solidarity and the common good and to which researchers and politicians look for solutions to the great challenges of our time Civil Society Between Concepts and Empirical Grounds will appeal to scholars of sociology politics history and philosophy with interests in civil society

Handbook of Civil Society and Social Movements in Small States Lino Briguglio, Michael Briguglio, Sheila Bunwaree, Claire Slatter, 2023-02-22 This volume is unique because of its focus on small states There are many studies on civil society and social movements but none that specifically deal with this category of countries As is well known small states have particular characteristics including a limited ability to reap the benefits of economies of scale a high degree of exposure to forces outside their control and the proximity of politicians to the voters often leading to clientelistic relationships and patronage networks The small island developing states have the additional problem of high environmental vulnerability with some also dealing with disproportionate ecological footprints These factors have a bearing on the organization and performance of civil society organizations and social movements as explained in several chapters of this book The volume is organized in three parts dealing with aspects of civil society and social moments

in small states in the political social and environmental spheres respectively Various definitions of civil society are proposed in the chapters but most authors associate the term with organized groups operating in the interest of citizens independently of government and commercial business including various forms of non governmental organizations NGOs Civil society also encompasses social movements which are considered to be loosely organized collective campaigns in pursuit of social goals These two terms are sometimes used interchangeably however some authors argue that social movements tend to engage in contentious politics including protests while NGOs engage through more organized and institutional routes The Oxford Handbook of Political Participation Marco Giugni, Maria Grasso, 2022-06-16 The Oxford Handbook of Political Participation provides the first comprehensive up to date treatment of political participation in all its varied forms investigates a wide range of topics in the field from both a theoretical and methodological perspective and covers the most recent developments in the area It brings together research traditions from political science and sociology bridging the gap in particular between political sociology and social movement studies contributions also draw on crucial work in psychology economics anthropology and geography Following a detailed introduction from the editors the volume is divided into nine parts that explore political participation across disciplines core theoretical perspectives methodological approaches modes of participation contexts determinants processes outcomes and current trends and future directions The book will be a valuable reference work for anyone interested in understanding political participation and related themes **The Routledge Companion to Nonprofit Management** Helmut Anheier, Stefan Toepler, 2020-04-08 Over the past three decades or so the nonprofit voluntary or third sector has undergone a major transformation from a small cottage industry to a major economic force in virtually every part of the developed world as well as elsewhere around the globe Nonprofit organizations are now major providers of public services working in close cooperation with governments at all levels and increasingly find themselves in competition with commercial firms across various social marketplaces This transformation has come with ever increasing demands for enhancing the organizational capacities and professionalizing the management of nonprofit institutions The Routledge Companion to Nonprofit Management is the first internationally focused effort to capture the full breadth of current nonprofit management research and knowledge that has arisen in response to these developments With newly commissioned contributions from an international set of scholars at the forefront of nonprofit management research this volume provides a thorough overview of the most current management thinking in this field It contextualizes nonprofit management globally provides an extensive introduction to key management functions core revenue sources and the emerging social enterprise space and raises a number of emerging topics and issues that will shape nonprofit management in future decades As graduate programs continue to evolve to serve the training needs in the field The Routledge Companion to Nonprofit Management is an essential reference and resource for graduate students researchers and practitioners interested in a deeper understanding of the operation of the nonprofit sector **Research Handbook on Nonprofit Governance**

Donnelly-Cox, Gemma, Meyer, Michael, Wijkström, Filip, 2021-12-07 This multi perspective Research Handbook provides a clear pathway through the nonprofit governance research field pushing beyond the borders of current theory to expand and deepen the analytical framework for nonprofit governance It offers an analysis of the basics including definitions organizational forms and levels of governance and takes a critical approach towards the normative and prescriptive tendencies in much of contemporary governance scholarship **Knowledge and Civil Society** Johannes

Glückler, Heinz-Dieter Meyer, Laura Suarsana, 2021-12-08 This open access book focuses on the role of civil society in the creation dissemination and interpretation of knowledge in geographical contexts It offers original interdisciplinary and counterintuitive perspectives on civil society The book includes reflections on civil and uncivil society the role of civil society as a change agent and on civil society perspectives of undone science Conceptual approaches go beyond the tripartite division of public private and civic sectors to propose new frameworks of civic networks and philanthropic fields which take an inclusive view of the connectivity of civic agency across sectors This includes relational analyses of epistemic power in civic knowledge networks as well as of regional giving and philanthropy The original empirical case studies examine traditional forms of civic engagement such as the German landwomen s associations as well as novel types of organizations such as giving circles and time banks in their geographical context The book also offers insider reflections on doing civil society such as the cases of the Umbrella Movement in Hong Kong epistemic activism in the United States and the FeesMustFall movement in South Africa Voluntary and Public Sector Collaboration in Scandinavia Bjarne

Ibsen, 2021-09-30 In thirteen chapters the contributors to this volume analyse the different dimensions of a new form of collaboration termed collective co production in the Scandinavian countries It is a characteristic of the Scandinavian countries Sweden Norway and Denmark that they have both a large public and voluntary sector For decades the dominant type of collaboration between the two sectors has consisted of the public sector providing financial support to organisations in the voluntary sector while the activities are undertaken by the organisation itself In recent times however a new discourse has emerged with a strong political focus on developing closer collaboration between the two sectors The book analyses collective co production between the voluntary and public sectors and identifies what distinguishes this form of collaboration from others It looks at the scope of collective co production how and why it differs between welfare areas as well as the political vision for co production and the extent to which it lives up to those expectations This discourse promotes a type of collaboration wherein organisations associations and volunteers can participate in the implementation of tasks for which public institutions are responsible The book is a valuable resource for professionals in voluntary organizations and public welfare units working with co production and for researchers and students in the fields of civil society voluntary sector and welfare policy *Civil Society: Concepts, Challenges, Contexts* Michael Hoelscher, Regina A. List, Alexander Ruser, Stefan

Toepler, 2022-05-10 This volume is a collection of original essays prepared by colleagues collaborators and former students

on the occasion of Helmut K Anheier's 65th birthday and retirement from the University of Heidelberg. An internationally recognized pioneer of nonprofit and civil society studies, Anheier focused his work on providing clarity around 1 civil society local and global, observing its origins and trajectory and developing theories to explain it; 2 the nonprofit sector and institutions within and extending from it, including nonprofit organizations, philanthropy, and social investment; and 3 culture as it relates to democracy and back to civil society. The essays in this volume refer to these concepts and position them in the context of developments over the last two to three decades. The volume is arranged in three sections. The first section comprises essays that elucidate concepts and probe theories in the field. The second section presents chapters discussing current global challenges and trends in the focal areas. The third and final section then comprises country and regional case studies illustrating important aspects of the global challenges or theoretical issues of the two preceding sections. A fascinating and up-to-date overview of key issues and trends in civil society and nonprofit research by an international collection of eminent scholars in these fields, this book will be attractive to civil society and nonprofit sector researchers as well as a broader academic community of political scientists, sociologists, economists, and cultural experts.

Communicating Causes Nicky Garsten, Ian Bruce, 2018-06-13. Nonprofit organizations (NPOs) across the world are facing criticism alongside approbation. In order for NPOs to effectively support their causes, they require public trust. The editors of this book have persuaded PR experts from the UK and around the world from a variety of PR specialisms operating across different organizational forms to share their knowledge and experience. These contributions are scaffolded with authoritative academic and practical advice as well as solutions. The book starts with foundations that underpin communications for causes. These include arguments that support the importance of nonprofits in civil society, lessons in corporate governance, and a new approach to issues management. PR planning subjects tailored or specific to the sector include strategic global communications planning, agile digital communications, branding, internal communications, and the securing of meaningful outcomes. Corporate partnerships are examined with a new Fit to Partner Test and consideration of the mandated corporate social responsibility (CSR) in India, corporate volunteering in Brazil, and CSR in South Africa. Relations between governments and nonprofits are also considered both generally and with a particular focus on China. *Communicating Causes* looks at effective strategy and practice of PR in the modern nonprofit. Including forewords by both John Grounds and Jon Snow, the expert perspectives offered in this book provide valuable support to current and future communicators.

Handbook on Hybrid Organisations David Billis, Colin Rochester, 2020-02-28. Hybrid organisations that integrate competing organisational principles have become a preferred means of tackling the complexity of today's societal problems. One familiar set of examples are organisations that combine significant features from market, public, and third sector organisations. Many different groundbreaking approaches to hybridity are contained in this Handbook, which brings together a collection of empirical studies from an international body of scholars. The chapters analyse and theorise the position of hybrid

organisations and have important implications for theory practice and policy in a context of proliferating hybrid forms of organisation *Routledge Handbook of Social and Sustainable Finance* Othmar M.
