

(c) Mass of 1 mole of anhydrous calcium chloride ( $\text{CaCl}_2$ ) =  $40 + 71 = 111 \text{ g}$

But 1 molecule of  $\text{CaCl}_2$  contains 2 chloride ions<sub>23</sub>  
 $\therefore 111 \text{ g}$  of anhydrous  $\text{CaCl}_2$  contains  $2 \times 6.023 \times 10^{23}$   
 $= 12 \times 10^{23}$  chloride ions

Q2) How many moles of  $\text{NaOH}$  are present in  $160 \text{ g}$  of it?

Soln: Mass of 1 mole of  $\text{NaOH} = 23 + 16 + 1 = 40 \text{ g}$

$40 \text{ g}$  of  $\text{NaOH}$  contains  $6 \times 10^{23}$  no. of molecules

Moles in  $160 \text{ g}$  of  $\text{NaOH} = \frac{160}{40} = \underline{4 \text{ moles}}$

Q3) What is the mass in grams of  $2.5$  moles of slaked lime  $\text{Ca(OH)}_2$ .

Soln: Mass of 1 mole of slaked lime  $\text{Ca(OH)}_2 = 40 + 32 + 2$   
 $= 74 \text{ g}$

So mass of  $2.5$  moles of  $\text{Ca(OH)}_2 = 2.5 \times 74 = \underline{185 \text{ g}}$

Means  $2.5$  moles of  $\text{Ca(OH)}_2$  weigh  $185 \text{ g}$ .

Numerical Chemistry , **Multiple Solution Methods for Teaching Science in the Classroom** Stephen

DeMeo, 2008 For the first time in science education the subject of multiple solution methods is explored in book form While a multiple method teaching approach is utilized extensively in math education there are very few journal articles and no texts written on this topic in science Teaching multiple methods to science students in order to solve quantitative word problems is important for two reasons First it challenges the practice by teachers that one specific method should be used when solving problems Secondly it calls into question the belief that multiple methods would confuse students and retard their learning Using a case study approach and informed by research conducted by the author this book claims that providing students with a choice of methods as well as requiring additional methods as a way to validate results can be beneficial to student learning A close reading of the literature reveals that time spent on elucidating concepts rather than on algorithmic methodologies is a critical issue when trying to have students solve problems with understanding It is argued that conceptual understanding can be enhanced through the use of multiple methods in an environment where students can compare evaluate and verbally discuss competing methodologies through the facilitation of the instructor This book focuses on two very useful methods proportional reasoning PR and dimensional analysis DA These two methods are important because they can be used to solve a large number of problems in all of the four academic sciences biology chemistry physics and earth science This book concludes with a plan to integrate DA and PR into the academic science curriculum starting in late elementary school through to the introductory college level A challenge is presented to teachers as well as to textbook writers who rely on the single method paradigm to consider an alternative way to teach scientific problem solving *Class 8-12 Chemistry Questions and Answers PDF* Arshad Iqbal, *The Class 8 12 Chemistry Quiz Questions and Answers PDF* Grade 8 12 Chemistry Competitive Exam Questions Chapter 1 15 Practice Tests Chemistry Textbook Questions for Beginners includes Questions to solve problems with hundreds of class questions *Class 8 12 Chemistry Questions and Answers PDF* book covers basic concepts and analytical assessment tests *Class 8 12 Chemistry Quiz PDF* book helps to practice test questions from exam prep notes *The Grade 8 12 Chemistry Quiz Questions and Answers PDF eBook* includes Practice material with verbal quantitative and analytical past papers questions *Class 8 12 Chemistry Questions and Answers PDF* Free download chapter 1 a book to review textbook questions on chapters Molecular structure acids and bases atomic structure bonding chemical equations descriptive chemistry equilibrium systems gases laboratory liquids and solids mole concept oxidation reduction rates of reactions solutions thermochemistry Questions for high school and college revision questions Chemistry Interview Questions and Answers PDF Download free eBook s sample covers beginner s solved questions textbook s study notes to practice online tests *The Grade 8 12 Chemistry Interview Questions Chapter 1 15 PDF* book includes high school workbook questions to practice Questions for exam Chemistry Practice Tests a textbook s revision guide with chapters Questions for

*Teaching General Chemistry* Mansoor Niaz,2008 The main objective of this monograph is to incorporate history and philosophy of science in the chemistry curriculum in order to provide students an overview of the dynamics of scientific research which involves controversies conflicts and rivalries among scientists that is the humanising aspects of science A major thesis of this book is the parallel between the construction of knowledge by the students and the scientists In looking

for this relationship it is not necessary that ontogeny recapitulate phylogeny but rather to establish that students can face similar difficulties in conceptualising problems as those faced by the scientists in the past Given the vast amount of literature on students alternative conceptions misconceptions in science it is plausible to suggest that these can be considered not as mistakes but rather as tentative models leading to greater conceptual understanding Just as scientists resist changes in the hard core of their beliefs by offering auxiliary hypotheses students may adopt similar strategies Conceptual change in science education can thus be conceptualised as building of tentative models that provide greater explanatory power to students understanding
