Moms in Chief Tammy R. Vigil, 2019-01-23 In 1776 when Abigail Adams implored her husband to Remember the Ladies John Adams scoffed declaring We know better than to repeal our masculine system More than two hundred years later American women continue to struggle against the idea that they are simply vassal extensions of their husbands a notion that is acutely enacted in presidential campaigns An examination of how the spouses of recent presidential candidates have presented themselves and been perceived on the campaign trail *Moms in Chief* reveals the ways in which the age old rhetoric of republican motherhood maintains its hold on the public portrayal of womanhood in American politics and constrains American women's status as empowered autonomous citizens The rhetoric of republican motherhood describes the ostensibly ideal female patriot as domestically focused self sacrificial deferential and defined by her relationship to others particularly her husband *Moms in Chief* combines the study of history gender communication and politics to show how the spouses of the major parties presidential nominees from 1992 to 2016 at times fulfilled at other times flouted but at all times were handicapped by this stereotype From Barbara Bush as dynastic mother to Michelle Obama as Mom in Chief from Laura Bush as all American wife to Melania Trump as model immigrant from Teresa Heinz Kerry as assertive heiress to Bill Clinton as past president and prospective first gentleman Tammy R Vigil explores the function of presidential consorts in their spouses campaigns and she scrutinizes how their portrayal by opponents the press and themselves has challenged or reinforced perceptions of the role of gender and the place of women in American political life In the unofficial contest between candidates spouses there are winners and losers What is at stake Vigil's research suggests is the very definition of women as American citizens and political actors Statement of Disbursements of the House as Compiled by the Chief Administrative Officer from ...
