Monetary Regimes and Inflation Peter Bernholz,2015-04-30 Exploring the characteristics of inflations and comparing historical cases from Roman times up to the modern day this book provides an in depth discussion of the subject It analyses the high and moderate inflations caused by the inflationary bias of *The Political Economy of the Eurozone* Ivano Cardinale,D'Maris Coffman,Roberto Scazzieri,2017-10-12 The Eurozone is not a mere currency area It is also a unique polity whose actors span multiple levels supranational national regional sectoral and pursue overlapping economic and political objectives Current thinking on the Eurozone relies on received categories that struggle to capture these constitutive features This book addresses this analytical deficit by proposing a new approach to the political economy of the Eurozone which captures economic and political interdependencies across different levels of decision making and sheds light on largely unexplored problems The book explores the opportunities afforded by the structure of the Eurozone and lays the foundations of a political economy that poses new questions and requires new answers It provides categories that are firmly grounded in the existing configuration of the Eurozone but are a precondition for overcoming the status quo in analysis and policy

Money in Asia (1200 - 1900): Small Currencies in Social and Political Contexts ,2015-01-27 Money in Asia examines two chronic problems that faced early modern monetary economies in East South and Southeast Asia The inability to provide sufficient amounts of small currencies to facilitate local economic transactions and to control currency depreciation The studies in this volume analyze the social and economic consequences of small currency scarcity and devaluation on various Asian economies and show how various regimes tried to manage these ever present challenges They reveal that those regimes that dealt most successfully with these two issues were those with an integrated national approach to monetary policy Contributors are Peter Bernholz Werner Burger Cao Jin Mark Elvin Dennis O Flynn Roger Greatrex Najaf Haider Reinier H Hesselink Elisabeth Kaske Man hounq Lin Jane Kate Leonard Christine Moll Murata Keiko Nagase Reimer Shan Kunqin Shimada Ry to Ulrich Theobald Hans Ulrich Vogel and Willem Wolters

Money, Inflation and Business Cycles Arkadiusz Sieroń,2019-02-04 Who would disagree that money matters Economists have yet to sufficiently explore issues related to monetary inflation in relation to the Cantillon effect i e distribution and price effects resulting from uneven changes in the money supply and their impact on the economy This book fills this important gap in the existing literature The author classifies the various channels through which new money can be injected into the economy and demonstrates that it is not only the increase in money supply that is important but also the way in which it occurs Since the increase in money supply does not affect the cash balance of all economic entities in the same proportion and at the same time new money is

introduced into the economy through specific channels a distribution of income and changes in the structure of relative prices and production occur The study of money supply growth carried out in the spirit of Richard Cantillon offers an important analytical framework that facilitates the development of a number of sub disciplines within economics and provides a better understanding of many economic processes It significantly explores the theory of money and inflation the business cycle and price bubbles but also the theory of banking and central banking income distribution income and wealth inequalities and the theory of public choice This book is therefore an important voice in the fundamental debate on the role of monetary factors in the economy as well as on the effects and legitimacy of a loose monetary policy In 2017 the doctoral dissertation on which the book is based was awarded the Polish Prime Minister s prize In these times of non standard monetary policy and rising income inequalities in OECD countries the focus on the distribution effect of monetary inflation makes this a must read for researchers and policy makers and for anyone working in monetary economics This title was translated from Polish by Martin Turnau

Bad Money Brendan Brown, Philippe Simonnot, 2025-09-23 This book argues that the blame for the Great Pandemic Inflation in the US and Europe lies with serious flaws in the actual monetary regime Money is literally out of control with no solid anchor In consequence further great inflations lie ahead whether the proximate cause is another massive supply shock for example war trade conflict resource famine or fiscal explosion or simply malfunctioning of the corrupted monetary system The book draws on monetary principles applied in the laboratory of history including wars great recessions and US wave elections to make its key points The choice of monetary principles is eclectic including insights from Austrian School and previous works of the authors The historical examples stretch from the 1890s to the present day The authors do not shy away from use of counterfactual analysis including how the shocks from the pandemic or Russia Ukraine War would have played out under a sound money regime Questions posed include how a flawed monetary regime has encountered so little political push back The answer includes an identification of the sub groups in the US or global economy

who gain from a flawed monetary regime and their wielding of power to protect the status quo Crucially the book describes how asset inflation one of the main symptoms of monetary disorder has weakened opposition to the regime though ultimately fanning populism due to decades of malinvestment This book should have wide appeal to academics in monetary economics international finance international relations and history especially those with a passion for the use of history as laboratory More generally the book should fascinate a wide range of thinkers close to or in the thick of the global financial markets
