## **Monochrome Darkness Light Contemporary Art:**

Monochrome Craig Staff, 2015-09-17 This book is an account of the monochrome's role in contemporary art. Historically the monochrome embodied the most extreme form of abstraction and pure materiality. More recently adaptations of the art form have focused on a broader range of cultural and interpretive contexts. This book argues that the latest artistic strategies go beyond stylistic concerns and seek to re-engage with ideas around authorship process and the conditions of the visible as they are given and understood through both light and darkness.

**Monochrome** Craig G. Staff, 2019 The monochrome, a single colour of paint applied over the entirety of a canvas, remains one of the more contentious modernist artistic inventions. But whilst the manufacture of these pictures of nothing was ostensibly straightforward, their subsequent theorisation has been anything but. More than a history, *Monochrome: Darkness and Light in Contemporary Art* is the first account of the monochrome's lively role in contemporary art. Liberated from the burden of representation, the monochrome first stood for emancipation, an ideological and artistic impulse that characterised the avant-garde of the early twentieth century. Historically the monochrome embodied the most extreme form of abstraction and pure materiality. Yet more recently adaptations of the art form have focused on a broader range of cultural and interpretive contexts. Provocative, innovative and timely, this book argues that the latest artistic strategies go beyond stylistic concerns and instead seek to re-engage with ideas around authorship process and the conditions of the visible as they are given and understood through both light and darkness. Discussing works by artists such as Katie Paterson, Hiroshi Sugimoto, Tom Friedman, Bruno Jakob, Sherrie Levine and Ceal Floyer, the book shows that the debates around an artwork's form and its possibility for meaning that the monochrome first engendered remain very much alive in contemporary visual culture. culture     **The Simple Truth** Simon Morley,2020-12-15 The monochrome a single color work of art is highly ambiguous For some it epitomizes purity and is art reduced to its essence For others it is just a stunt the proverbial emperor s new clothes Why are monochrome works both so admired and such an easy target of scorn Why does a monochrome look so simple and yet is so challenging to comprehend And what is it that drives artists to create such works In this illuminating book Simon Morley unpacks the meanings of the monochrome as it has developed internationally over the twentieth century to today In doing so he also explores how artists have understood what they make how critics variously interpret it and how art is encountered by viewers     **Pedagogical Art in Activist and Curatorial Practices** Izabel Galliera,Noni

Brynjolson,2025-06-24 This edited volume highlights the historical philosophical and theoretical legacies of pedagogical art and examines its connections with various forms of activism and institutional transformation Chapters reveal interconnected concerns related to institutional power structures systemic racism sexism and gender biases in art institutions exclusionary tactics of neoliberal corporate interests and the politicization of culture in authoritarian regimes This volume brings together leading and emerging scholars curators and artists who have written case studies from various geographical cultural and political contexts Through a range of different approaches and diverse perspectives contributors address key debates and conversations on this topic including the lessons that can be learned from exploring global histories of critical pedagogy the possibilities and constraints of institutional critique and transformation within museums universities and other educational institutions and the many ways in which contemporary pedagogical art has intersected with art and activism around the world Through these debates contributors investigate the potential of pedagogical art as a transformative institutional tool with the potential to activate discursive spaces for generating sharing and amplifying knowledge as a powerful form of collective resistance This book will be of interest to scholars working in art history art education and museum studies among other fields     **On Not Looking** Frances Guerin,2015-01-09 On Not Looking The Paradox of Contemporary Visual Culture

focuses on the image and our relationship to it as a site of not looking The collection demonstrates that even though we live in an image saturated culture many images do not look at what they claim viewers often do not look at the images and in other cases we are encouraged by the context of exhibition not to look at images Contributors discuss an array of images photographs films videos press images digital images paintings sculptures and drawings from everyday life museums and galleries and institutional contexts such as the press and political arena The themes discussed include politics of institutional exhibition and perception of images censored repressed and banned images transformations to practices of not looking as a result of new media interventions images in history and memory not looking at images of bodies and cultures on the margins responses to images of trauma and embodied vision     **Modern Art And Modernism** Francis Frascina,2018-05-04 Modern Art and Modernism offers firsthand material for the study of issues central to the development of modern art its theory and criticism The history of modern art is not simply a history of works of art it is also a history of ideas interpretations The works

of critics and theorists have not merely been influential in deciding how modern art is to be seen and understood they have also influenced the course it has taken The nature of modern art cannot be understood without some analysis of the concept of Modernism itself Modern Art and Modernism presents a selection of texts by the major contributors to debate on this subject from Baudelaire and Zola in the nineteenth century to Greenberg and T J Clark in our own times It offers a balanced section of essays by contributors to the mainstream of Modernist criticism representative examples of writing on the themes of abstraction and expression in modern art and a number of important contributions to the discussion of aesthetics and the social role of the artist Several of these are made available in English translation for the first time and others are brought together from a wide range of periodicals and specialized collections This book will provide an invaluable resource for teachers and students of modern art art history and aesthetics as well as for general readers interested in the place of modern art in culture and history

The Contingent Object of Contemporary Art Martha Buskirk, 2005-02-18 An exploration of transformations in the nature of the art object and artistic authorship in the last four decades In this book Martha Buskirk addresses the interesting fact that since the early 1960s almost anything can and has been called art Among other practices contemporary artists have employed mass produced elements impermanent materials and appropriated imagery have incorporated performance and video and have created works through instructions carried out by others Furthermore works of art that lack traditional signs of authenticity or permanence have been embraced by institutions long devoted to the original and the permanent Buskirk begins with questions of authorship raised by minimalists use of industrial materials and methods including competing claims of ownership and artistic authorship evident in conflicts over the right to fabricate artists works Examining recent examples of appropriation she finds precedents in pop art and the early twentieth century readymade and explores the intersection of contemporary artistic copying and the system of copyrights trademarks and brand names characteristic of other forms of commodity production She also investigates the ways that connections between work and context have transformed art and institutional conventions the impact of new materials on definitions of medium the role of the document as both primary and secondary object and the significance of conceptually oriented performance work for the intersection of photography and the human body in contemporary art Buskirk explores how artists active in the 1980s and 1990s have recombined strategies of the art of the 1960s and 1970s She also shows how the mechanisms through which art is presented shape not only readings of the work but the work itself She uses her discussion of the readymade and conceptual art to explore broader issues of authorship reproduction context and temporality
