Overcoming Barriers To Student Understanding Threshold Concepts And Troublesome Knowledge:

Overcoming Barriers to Student Understanding Jan Meyer, Ray Land, 2006-09-27 It has long been a matter of concern to teachers in higher education why certain students get stuck at particular points in the curriculum whilst others grasp concepts with comparative ease What accounts for this variation in student performance and more importantly how can teachers change their teaching and courses to help students overcome such barriers This book examines the difficulties of student learning and offers advice on how to overcome them through course design assessment practice and teaching methods It also provides innovative case material from a wide range of institutions and disciplines including the social sciences the humanities the sciences and economics

Threshold Concepts and Transformational Learning

, 2010-01-01 Over the last decade the notion of threshold concepts has proved influential around the world as a powerful means of exploring and discussing the key points of transformation that students experience in their higher education courses and the troublesome knowledge that these often present Threshold concepts provoke in the learner a state of liminality in which transformation takes place requiring the integration of new understanding and the letting go of previous learning stances Insights gained by learners as they cross thresholds can be exhilarating but might also be unsettling requiring an uncomfortable shift in identity or paradoxically a sense of loss The liminal space can be a suspended state of partial understanding or stuck place in which understanding approximates to a kind of mimicry Threshold Concepts and Transformational Learning substantially increases the empirical evidence for threshold concepts across a large number of disciplinary contexts and from the higher education sectors of many countries This new volume develops further theoretical perspectives and provides fresh pedagogical directions It will be of interest to teachers practitioners and managers in all disciplines as well as to educational researchers

Threshold Concepts on the Edge Julie A. Timmermans, Ray

Land, 2019-12-30 Since the first literature about the Threshold Concepts Framework was published in 2003 a considerable body of educational research into this topic has grown internationally across a wide range of disciplines and professional fields Successful negotiation of a threshold concept can be seen as crossing boundaries into new conceptual space or as a portal opening up new and previously inaccessible ways of thinking about something In this unfamiliar conceptual terrain fresh insights and perceptions come into view and access is gained to new discourses This frequently entails encounters with troublesome knowledge knowledge which provokes a liminal phase of transition in which new understandings must be integrated and importantly prior conceptions relinquished There is often double trouble in that letting go of a prevailing familiar view frequently involves a discomfiting change in the subjectivity of the learner We become what we know It is a space in which the learner might become stuck Threshold Concepts on the Edge the fifth volume in a series on this subject discusses the new directions of this research Its six sections address issues that arise in relation to theoretical development liminal space ontological transformations curriculum interdisciplinarity and aspects of writing across learning thresholds

Threshold Concepts within the Disciplines, 2008-01-01 Threshold Concepts within the Disciplines brings together leading writers from various disciplines and national contexts in an important and readable volume for all those concerned with teaching and learning in higher education The foundational principle of threshold concepts is that there are in each discipline conceptual gateways or portals that must be negotiated to arrive at important new understandings In crossing the portal transformation occurs both in knowledge and subjectivity Such transformation involves troublesome knowledge a key concern for contributors to this book who identify threshold concepts in their own fields and suggest how to deal with them Part One extends and enhances the threshold concept framework containing chapters that articulate its qualities its links to other social theories of learning and other traditions in educational research Part Two encompasses the disciplinary heart of the book with contributions from a diversity of areas including computing engineering biology design modern languages education and economics In the many empirical case studies educators show how they have used the threshold concept framework to inform and evaluate their teaching contexts Other chapters emphasise the equally important being and becoming dimension of learning Part Three suggests pedagogic directions for those at the centre of the education project with contributions focusing on the socialisation of academics and their continuing quest to be effective teachers The book will be of interest to disciplinary teachers educational researchers and educational developers It also is of relevance to issues in quality assurance and professional accreditation

Threshold Concepts in Practice Ray Land, Jan H. F. Meyer, Michael T. Flanagan, 2016-07-09 Threshold Concepts in Practice brings together fifty researchers from sixteen countries and a wide variety of disciplines to analyse their teaching practice and the learning experiences of their students through the lens of the Threshold Concepts Framework In any discipline there are certain concepts the jewels in the curriculum whose acquisition is akin to passing through a portal Learners enter new conceptual and often affective territory Previously inaccessible ways of thinking or practising come into view without which they cannot progress and which offer a transformed internal view of subject landscape or even world view These conceptual gateways are integrative exposing the previously hidden interrelatedness of ideas and are irreversible However they frequently present troublesome knowledge and are often points at which students become stuck Difficulty in understanding may leave the learner in a liminal state of transition a betwixt and between space of knowing and not knowing where understanding can approximate to a form of mimicry Learners navigating such spaces report a sense of uncertainty ambiguity paradox anxiety even chaos The liminal space may equally be one of awe and wonderment Thresholds research identifies these spaces as key transformational points crucial to the learner's development but where they can oscillate and remain for considerable periods These spaces require not only conceptual but ontological and discursive shifts This volume the fourth in a tetralogy on Threshold Concepts discusses student experiences and the curriculum interventions of their teachers in a range of disciplines and professional practices including medicine law engineering architecture and military education Cover image Detail from Eve offering the apple to Adam in the

Threshold Concepts in Problem-based Learning Maggi Savin-Baden, Gemma Tombs, 2019-02-26 Threshold Concepts in Problem based Learning provides a critical discussion and guidance for educational researchers teachers innovators and policy makers wanting to explore the interrelationship of PBL and threshold concepts Beginning with an introduction to both areas and offering an overview of the current issues this volume delivers 11 innovative research based chapters from around the world It outlines the major threshold concepts faced by those disciplines that have adopted PBL and then examines the impact of threshold concepts on student learning What is unique about this text is the way it examines PBL as a pedagogy in which students get stuck in the learning process and the thresholds they encounter as they learn to adapt

Social Work in Wales Wulf Livingston, Jo Redcliffe, Abyd Quinn Aziz, 2023-06-27 With a foreword by First Minister of Wales Mark Drakeford this book is the first to offer an in depth look into what makes the Welsh Social Work context unique It includes the move towards joint children families and adult provision and the emphasis on early intervention future generations and partnership considerations Covering the subject knowledge required by the Welsh regulator Social Care Wales it provides essential reading for students and practising social workers in Wales and rich contextual analysis for other international social work practitioners and writers Each chapter includes dialogue on the distinctive Welsh way that underpins the nation s social work approach focus on application responses and implications for professional practice the giving of voice section demonstrating the key emphasis in Welsh practice of ensuring that multiple stakeholder perspectives are actively heard key resources for further independent exploration of the topics

The SAGE Handbook of E-learning Research Caroline Haythornthwaite, Richard Andrews, Jude Fransman, Eric M. Meyers, 2016-05-09 The new edition of The SAGE Handbook of E Learning Research retains the original effort of the first edition by focusing on research while capturing the leading edge of e learning development and practice Chapters focus on areas of development in e learning technology theory practice pedagogy and method of analysis Covering the full extent of e learning can be a challenge as developments and new features appear daily The editors of this book meet this challenge by including contributions from leading researchers in areas that have gained a sufficient critical mass to provide reliable results and practices The 25 chapters are organised into six key areas 1 THEORY 2 LITERACY LEARNING 3 METHODS PERSPECTIVES 4 PEDAGOGY PRACTICE 5 BEYOND THE CLASSROOM 6 FUTURES

Teaching Practices in a Global Learning Environment Hanne Tange, 2020-10-15 This book examines teaching practices in international education focusing on two significant meanings of the notion of practice the concrete activities used by university lecturers and the role of education as a platform for transferring particular skills or approaches In addition to discussing techniques involved in programme design curricular development course activities multicultural teamwork and examination the author explores the idea of the lecturer as an actor communicating practices considering the role and responsibility of academic staff in the development of successful international education With

attention to the importance of the context of internationalisation the book draws on research from two major research projects presenting extensive interview material with teaching staff engaged in international education and projects of internationalisation Combining the approaches of pragmatism and practice theory as developed by Bourdieu and Schatzki among others Teaching Practices in a Global Learning Environment addresses themes including the international ness of academic disciplines the biographies of international educators and language issues emerging in international education As such it will appeal to scholars across the social sciences and policy makers with interests in pedagogy internationalisation and higher education *Cambridge Handbook of Engineering Education Research* Aditya Johri,Barbara M. Olds,2014-02-10

The Cambridge Handbook of Engineering Education Research is the critical reference source for the growing field of engineering education research featuring the work of world luminaries writing to define and inform this emerging field The Handbook draws extensively on contemporary research in the learning sciences examining how technology affects learners and learning environments and the role of social context in learning Since a landmark issue of the Journal of Engineering Education 2005 in which senior scholars argued for a stronger theoretical and empirically driven agenda engineering education has quickly emerged as a research driven field increasing in both theoretical and empirical work drawing on many social science disciplines disciplinary engineering knowledge and computing The Handbook is based on the research agenda from a series of interdisciplinary colloquia funded by the US National Science Foundation and published in the Journal of Engineering Education in October 2006 *University Teaching in Focus* Lynne Hunt,Denise Chalmers,2012-11-27

University Teaching in Focus provides a foundational springboard for early career academics preparing to teach in universities Focusing on four critical areas teaching curriculum students and quality leadership this succinct resource offers university teachers a straightforward approach to facilitating effective student learning The book empowers university teachers and contributes to their career success by developing teaching skills strategies and knowledge as well as linking theory to practice Written in a clear and accessible style by internationally acclaimed experts topics include learning theories assessment discipline based teaching curriculum design problem based and work integrated learning effective classroom teaching and flexible modes of delivery The needs of diverse student groups are explored and the scholarship of teaching and learning is addressed within a quality and leadership framework The book also makes reference to seminal works and current resources Real world cases illuminate the theoretical content and Your Thoughts sections encourage reflection and adaptation to local contexts University Teaching in Focus explores ways that teachers can effectively engage students in life long learning extending their capacity to solve problems to enter the workforce to understand their discipline and to interact positively with others in a global community throughout their professional lives *Design Pedagogy* Mike Tovey,2016-04-22

Design Pedagogy explains why it is vital for design students that their education helps them construct a passport to enter the professional sphere Recent research into design teaching has focused on its signature pedagogies those elements which are

particularly characteristic of the disciplines Typically based on core design theory enlivened by approaches imported to the area such work has utility when it recognizes the visual language of designing the media of representation used and the practical realities of tackling design questions Increasingly the 21st century sees these activities in a global context where the international language of the visual artefact is recognized This book draws on recent work in these areas It includes a number of chapters which are developed from work undertaken during the period of special funding for centres of teaching excellence in the UK up until 2010 Two of those in design have provided the basis for research and innovative developments reported on here They have helped to enliven the environment for design pedagogy research in other establishments which are also included Design students need support for the agile navigation through the design process Learning experiences should develop students natural motivations and professionalise motivation to create a resilient informed and sustainable capacity This is the essence of transformative learning This collection explores how design education is in itself a passport to practice and showcases how some of the key developments in education use techniques related to collaboration case studies and experience to motivate students enable them to express their identity reflect and learn

Ipsative Assessment and Personal Learning Gain Gwyneth Hughes, 2017-02-28 This innovative book offers a new approach to assessment in which learners can follow their own learning journey using cumulative feedback or measurements of distance travelled from different starting points Education currently mirrors the values and practices of a highly competitive world with testing grading and monitoring of standards becoming its driving forces Competition may stimulate high achievers but may also demotivate or even damage the rest Ipsative feedback on progress and personal learning gain measurements are often hidden A range of global case studies from school and higher education illustrate four themes the benefits of ipsative feedback making good use of learning gain measurement the challenges of implementing these novel practices and how to combine new approaches with traditional assessment methods Exploring the difficulties of turning the tables on hierarchies based on achievement and whether it is fair to elevate progress this book will be the start of conversations about a future that is not obsessed with testing and grades

Enhancing Science Education Margaret A.L. Learning Architectures in Higher Education Jonathan Tummons, 2018-03-22 Learning Architectures in Higher Education restores criticality and rigour to the study of communities

of practice as a means of understanding learning acknowledging that this is one of the most influential and widely used theories of learning to emerge during the last 30 years but one that has been misapplied and diluted Jonathan Tummons explores communities of practice theory looking at how its focus on learning as apprenticeship can be understood providing the reader with a conceptual framework for making sense of learning as a social practice as distinct from an individual psychological process Tummons looks at how communities of practice theory needs to be reconfigured to take account of the insights provided by other theoretical models and then applies his critically and theoretically reworked perspective to two distinct higher education contexts providing critical and powerful tools for examining learning and teaching practices

ECKM 2023 24th European Conference on Knowledge Management Vol 1 Academic Conferences and Publishing Limited,2023-09-07 Reading across the Disciplines Karen Manarin,2022-05-03 Reading Across the Disciplines offers a collection of twelve essays detailing a range of approaches to dealing with students reading needs at the college level Transforming reading in higher education requires more than individual faculty members working on SoTL projects in their particular fields Teachers need to consider reading across the disciplines In this collection authors from Australia and North America teaching in a variety of disciplines explore reading in undergraduate courses doctoral seminars and faculty development activities By paying attention to the particular classroom and placing those observations in conversation with scholarly literature they create new knowledge about reading in higher education from disciplinary and cross disciplinary perspectives Reading Across the Disciplines demonstrates how existing research about reading can be applied to specific classroom contexts offering models for faculty members whose own research interests may lie elsewhere but who believe in the importance of reading *Developing Research Writing* Susan Carter,Deborah Laurs,2017-08-16 Developing Research Writing is designed to encourage inspire and improve the advisory practice of providing writing feedback This book provides insights and advice that supervisors can use to advance their support of their research students writing and at the same time survive increasing supervisory demands Book parts are framed by empirical supervisor and doctoral student experiences and chapters within each part provide multiple approaches The carefully chosen contributors are specialists on research writing and doctoral pedagogy who guide the reader through the key stages of providing feedback Split into nine key parts the book covers starting a new supervision with writing in focus making use of other resources along the way encouraging style through control of language writing feedback on English as an Additional Language EAL writing Master s and Honours smaller projects writing feedback thesis by publication or performance based writing maintaining and gathering momentum keeping the examiner happy writing feedback as nudging through identity transition The parts cohere into a go to handbook for developing the supervision process Drawing on research literature and experience Developing Research Writing offers well theorized yet practical and grounded advice conducive to good practices Widening Participation, Higher Education and Non-Traditional Students Catherine A. Marshall,Sam J. Nolan,Douglas P. Newton,2016-09-21 This book highlights the

problems that have developed as students lack either the social or cultural capital to take the opportunity of Higher Education through conventional routes This might be due to leaving school early lacking entry qualifications or wanting to further their education and prospects after entering the workplace Foundation courses help to widen participation and create a route towards higher education This book offers tried and tested practical solutions from the notion of widening participation to recruitment of students and to ways of helping them to make the most of themselves and develop the skills they need to progress on degree courses of their choice
