## **Overdiagnosed Overdiagnosed:**

*Overdiagnosed* H. Gilbert Welch, Lisa Schwartz, Steve Woloshin, 2012-01-03 A nationally recognized expert offers a searing exposé of Big Pharma and the American healthcare system's zeal for excessive medical testing. More screening doesn't lead to better health but can turn healthy people into patients. Going against the conventional wisdom reinforced by the medical establishment and Big Pharma that more screening is the best preventative medicine, Dr. Gilbert Welch builds a compelling counterargument that what we need are fewer, not more, diagnoses. Documenting the excesses of American medical practice that labels far too many of us as sick, Welch examines the social, ethical, and economic ramifications of a health care system that unnecessarily diagnoses and treats patients, most of whom will not benefit from treatment, might be harmed by it, and would arguably be better off without screening. Drawing on 25 years of medical practice and research on the effects of medical testing, Welch explains in a straightforward, jargon-free style how the cutoffs for treating a person with abnormal test results have been drastically lowered just when technological advances have allowed us to see more and more abnormalities, many of which will pose fewer health complications than the procedures that ostensibly cure them. Citing studies that show that 10% of 2,000 healthy people were found to have had silent strokes and that well over half of men over age sixty have traces of prostate cancer but no impairment, Welch reveals overdiagnosis to be rampant for numerous conditions and diseases, including diabetes, high cholesterol, osteoporosis, gallstones, abdominal aortic aneurysms, blood clots, as well as skin, prostate, breast, and lung cancers. With genetic and prenatal screening now common, patients are being diagnosed not with disease but with pre-disease or for being at high risk of developing disease. Revealing the economic and medical forces that contribute to overdiagnosis, Welch makes a reasoned call for change that would save us from countless unneeded surgeries, excessive worry, and exorbitant costs, all while maintaining a balanced view of both the potential benefits and harms of diagnosis. Drawing on data, clinical studies, and anecdotes from his own practice, Welch builds a solid, accessible case against the belief that more screening always improves health care. **Journal of the National Cancer Institute**

, 2010 *The Role of Family Physicians in Older People Care* Jacopo Demurtas, Nicola Veronese, 2021-12-30 This book provides family doctors with a wealth of evidence-based indications and tips regarding geriatric medicine and approaches for the management of older patients to be applied in daily practice. After discussing old and new features of healthy ageing and the approaches required in Family Medicine Consultation, the text introduces key elements of geriatric medicine, such as frailty, sarcopenia, and the comprehensive geriatric assessment (CGA), before describing a range of characteristics unique to older patients in different contexts, with a dedicated section on Palliative Care. The role of polypharmacy and the importance of quaternary prevention and deprescribing are also addressed. Finally, the book emphasizes both the importance of a humanistic approach in caring and the approach of research and meta-research in geriatrics. Though many texts explore the role of primary care professionals in geriatric medicine, the role of family doctors in older people care has not yet been clearly

addressed despite the growing burden of ageing which has been dubbed the silver tsunami Family physicians care for individuals in the context of their family community and culture respecting the autonomy of their patients In negotiating management plans with their patients family doctors integrate physical psychological social cultural and existential factors utilizing the knowledge and trust engendered by repeated visits They do so by promoting health preventing disease providing cures care or palliation and promoting patient empowerment and self management This will likely become all the more important since we are witnessing a global demographic shift and family doctors will be responsible for and involved in caring for a growing population of older patients This book is intended for family medicine trainees and professionals but can also be a useful tool for geriatricians helping them to better understand some features of primary care and to more fruitfully interact with family doctors

**Better Now** Dr. Danielle Martin, 2017-01-10 Longlisted for British Columbia's National Award for Canadian Non Fiction 2018 Dr Danielle Martin sees the challenges in our health care system every day As a family doctor and a hospital vice president she observes how those deficiencies adversely affect patients And as a health policy expert she knows how to close those gaps A passionate believer in the value of fairness that underpins the Canadian health care system Dr Martin is on a mission to improve medicare In *Better Now* she shows how bold fixes are both achievable and affordable Her patients stories and her own family's experiences illustrate the evidence she presents about what works best to improve health care for all *Better Now* outlines Six Big Ideas to bolster Canada's health care system Each one is centred on a typical Canadian patient making it clear how close to home these issues strike Ensure every Canadian has regular access to a family doctor or other primary care provider Bring prescription drugs under medicare Reduce unnecessary tests and interventions Reorganize health care delivery to reduce wait times and improve quality Implement a basic income guarantee to alleviate poverty which is a major threat to health Scale up successful local innovations to a national level Passionate accessible and authoritative Dr Martin is a fervent supporter of the best of medicare and a persuasive critic of what needs fixing

*Chemical Sensitivity* Stephen J. Barrett, Ronald Gots, 2010-12-31 Chemical sensitivity or multiple chemical sensitivity describes people with numerous troubling symptoms attributed to environmental factors from simple housepaint to complex building structures and materials in offices and schools Many such people are seeking special accommodations applying for disability benefits and filing lawsuits claiming that exposure to common foods and chemicals has made them ill Their efforts are supported by some physicians who refer themselves as clinical ecologists They use questionable diagnoses and treatment methods while critics charge that these approaches are bogus and that chemical sensitivity is not a valid diagnosis The complaints associated with chemical sensitivity include depression irritability poor memory fatigue drowsiness constipation sneezing wheezing skin rashes headache chest pain pounding heart swelling upset stomach paralysis AIDS like illnesses psychotic experiences and just about every other symptom noted in medical textbooks One prominent clinical ecologist even claimed that chemical sensitivity patients may well be human canaries on an

increasingly poisoned planet and others have actually labeled chemical sensitivity as a disease While some people are adversely affected by exposure to some chemicals there is an overwhelming increase in false claims and reports from misled obsessive patients and opportunistic doctors Chemical Sensitivity examines this phenomenon in depth and the scientific legal ethical and political issues that surround it The authors explore the speculations about environmental exposure in the light of scientific knowledge of human physiology allergy and immunology pathology toxicology and clinical medicine They evaluate cases of chemical sensitivity relative to controlled tests and reveal that symptoms were brought on by psychological factors rather than physical ones Chemical Sensitivity also critically assesses claims related to sick building syndrome mercury amalgam toxicity yeast allergy and Gulf War syndrome

**Achieving Justice in the U.S. Healthcare System** Arthur J. Dyck, 2019-07-05 This book focuses on justice and its demands in the way of providing people with medical care Building on recent insights on the nature of moral perceptions and motivations from the neurosciences it makes a case for the traditional medical ethic and examines its financial feasibility The book starts out by giving an account of the concept of justice and tracing it back to the practices and tenets of Hippocrates and his followers while taking into account findings from the neurosciences Next it considers whether the claim that it is just to limit medical care for everyone to some basic minimum is justifiable The book then addresses finances and expenditures of the US health care system and shows that the growth of expenditures and the percentage of the gross national product spent on health care make for an unsustainable trajectory In light of the question what should be changed the book suggests that overdiagnosis and medicalizing normal behavior lead to harmful costly and unnecessary interventions and are the result of unethical behavior on the part of the pharmaceutical industry and extensive ethical failures of the FDA The book ends with suggestions about what can be done to put the U S health care system on the path to sustainability better medical care and compliance with the demands of justice

**Curing Medicare** Andy Lazris, 2016-05-19 Andy Lazris MD is a practicing primary care physician who experiences the effects of Medicare policy on a daily basis As a result he believes that the way we care for our elderly has taken a wrong turn and that Medicare is complicit in creating the very problems it seeks to solve Aging is not a disease to be cured it is a life stage to be lived Lazris argues that aggressive treatments cannot change that fact but only get in the way and decrease quality of life Unfortunately Medicare s payment structure and rules deprive the elderly of the chance to pursue less aggressive care which often yields the most humane and effective results Medicare encourages and will pay more readily for hospitalization than for palliative and home care It encourages and pays for high tech assaults on disease rather than for the primary care that can make a real difference in the lives of the elderly Lazris offers straightforward solutions to ensure Medicare s solvency through sensible cost effective plans that do not restrict patient choice or negate the doctor patient relationship Using both data and personal stories he shows how Medicare needs to

change in structure and purpose as the population ages the physician pool becomes more specialized and new medical technology becomes available Curing Medicare demonstrates which medical interventions medicines tests procedures work and which can be harmful in many common conditions in the elderly the harms and benefits of hospitalization the current culture of long term care and how Medicare often promotes care that is ineffective expensive and contrary to what many elderly patients and their families really want
