**Petroleum Abstracts** , 1986      Art and Future Peter Stupples, Jane Venis, 2018-04-18 This selection of essays examines the future of art in a changing world In particular contributors discuss the agency of art in conditions of ecological threats to the natural world to climate change and the effects of globalisation neoliberal economics and mass tourism Following the lead of Chicago based Frances Whitehead whose essay is a key text some contributors take positions on working with local government agencies to embed art thinking within development projects going back to the art thinking at the centre of Kazimir Malevich's work in Vitebsk one hundred years ago in Russia Other papers highlight small scale art interventions that bring ecological issues to public notice and suggest positive responses whilst others discuss large scale problems brought about by the social economic and laissez faire history of the emerging Anthropocene with possible dystopic outcomes
