

## OPERATION WITHOUT CONTROLLERS

Rinnai Infinity and Infinity HD continuous flow water heater products do not use a pilot light.

When installed and operated without water controllers, the opening of any hot water tap will automatically start the appliance.

Once water is flowing through the appliance the burner will be ignited by electronic ignition.

When the hot water tap is closed and water flowing through the appliance has stopped the burner flame will extinguish.

The Rinnai Infinity range of water heaters are factory pre-set to a temperature limit of 55°C. Rinnai Infinity HD series are factory pre-set to a temperature limit of 75°C. Other limits, lower or higher, are available on request for both the Infinity and HD range. Temperature controllers are available to allow precise digital temperature control.

Controllers can be fitted at any time after installation of the hot water unit.

Excessively hot water is dangerous, especially where young children and the infirm are concerned. Rinnai continuous flow water heaters allow you to control the temperature of your hot water to safe levels.

Water temperatures above 55°C can cause severe burns instantly, such scalding and may even result in death. Those most at risk are children, disabled, elderly and the infirm. Hot water at 65°C (a very common water temperature in New Zealand) can severely burn a child in less than half a second. At 55°C it takes a half minute.

### ALWAYS.....

Test the temperature of the water with your elbow before placing your child in the bath, also carefully feel water before bathing or showering yourself.

Supervise children whenever they are in the bathroom.

Make sure that the hot water tap is turned off tightly.

### CONSIDER.....

Installing child proof tap covers or child resistant taps (both approaches will prevent a small hand being able to turn on the tap).

Setting your appliance at a maximum temperature of 55°C (Contact Rinnai New Zealand).

### NEVER.....

Leave a toddler in the care of another child. They may not understand the need to have the water temperature set at a safe level.
