## **Panarchy Political Theories Non Territorial Routledge:**

**Panarchy** Aviezer Tucker, Gian Piero de Bellis, 2015-12-22 Panarchy is a normative political meta theory that advocates non territorial states founded on actual social contracts that are explicitly negotiated and signed between states and their prospective citizens The explicit social contract or a constitution sets the terms under which a state may use coercion against its citizens and the conditions under which the contract may be annulled revised rescinded or otherwise exited from Panarchy does not advocate any particular model of the state or social justice but intends to encourage political variety innovation experimentation and choice With its emphasis on explicit social contracts Panarchy offers an interesting variation on traditional social contract theories Today Panarchist political thought is particularly relevant and interesting in the context of globalization increased international migration the weakening of national sovereignty the rise of the internet cloud as a non territorial locus of political and protopolitical social networks that are not geographic the invention of cryptocurrencies that may replace national currencies and the rise of urban centers where people of many different political identities live and work together This is the first volume to bring together key philosophically and politically interesting yet often overlooked Panarchist texts From the first published translation of de Puydt seminal 1860 article to contemporary Silicon Valley political theory the volume includes Panarchist texts from different eras cultures and geographical regions The amassed wealth of theoretical insight enables readers to compare different texts in this tradition of political thought and distinguish different streams and varieties within this political tradition in comparison with Cosmopolitanism Contractarianism and Anarchism The Political Economy of Non-Territorial Exit Trent J. MacDonald, 2019 Territorial political organisation forms the backbone of western liberal democracies However political economists are increasingly aware of how this form of government neglects the preferences of citizens resulting in dramatic conflicts The Political Economy of Non Territorial Exit explores the theoretical possibility of unbundling government functions and decentralising territorial governance Non-Territorial Autonomy and Decentralization Tove H. Malloy, Levente Salat, 2020-10-15 This volume describes and analyzes alternative and emerging models of non territorial autonomy NTA particularly in relation to decentralization The authors push the NTA debate in new directions by offering a re conceptualization based on ethno cultural bottom up decentralized action that redefines autonomy into its true sense of autonomous action Through description critical analysis and evaluation of several case studies this book assesses the potential for new paradigms within decentralized systems The authors explore two approaches to political decentralization which add to the theoretical debate on NTA network governance which focuses on new dynamics in policy processes and normative pluralism which focuses on accommodating the distinctness of the groups through the subsidiarity principle with regard to their own affairs The book explores the potential ramifications of ethno cultural NTA institutions acting within the wider framework of state institutions and assesses the functions of these institutions as another dimension of decentralization and thus another layer of democracy

With contemporary examples from Europe the Middle East Asia and South Africa as well as theoretical aspects of the conceptualization of autonomy this book offers a truly global perspective It will be of great interest to policy makers in countries experiencing adverse developments due to the pressure on public management as well as advanced students and scholars questioning the ability of the Westphalian system to address cultural diversity

*Problems in Value Theory* takes a pro and con approach to central topics in aesthetics ethics and political theory Each chapter begins with a question What Makes Actions Right or Wrong Does Morality Depend on God Do We Need Government Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints Alongside an up to date introduction to a core philosophical stance each contributor provides a critical response to their opponent and clear explanation of their view Discussion questions are included at the end of each chapter to guide further discussion With chapters ranging from why the government should never wage war to what is art and does morality depend on God this introduction covers questions lying at the heart of debates about what does and does not have value      **Irreconcilable Politics** Michael Hutchins,2018-06-27

How can people with different worldviews overcome their political disagreements to make collective decisions Immigration capital punishment abortion gun control foreign policy these are just some of the many issues that divide us Each of us has a unique worldview our own understanding of justice rights and the consequences of political actions So how can we possibly make shared decisions that affect us all To address this question Michael Hutchins uses modern bargaining theory in conjunction with analysis of important political controversies to provide new insights into how broadly liberal people those who are not inclined to enforce their own views through violence can govern themselves despite fundamental disagreements *Irreconcilable Politics* examines the ways in which we disagree and explores the very meaning of freedom and democracy      **The Australian**

**Constitution and National Identity** Anna Olijnyk,Alexander Reilly,2023-05-11 What does Australia s Constitution say about national identity A conventional answer might be not much Yet recent constitutional controversies raise issues about the recognition of First Peoples the place of migrants and dual citizens the right to free speech the nature of our democracy and our continuing connection to the British monarchy These are constitutional questions but they are also questions about who we are as a nation This edited collection brings together legal historical and political science scholarship These diverse perspectives reveal a wealth of connections between the Australian Constitution and Australia s national identity      **Visual**

**Evidence and the Gaza Flotilla Raid** Maayan Amir,2022-01-13 This book engages with pivotal examples of extraterritoriality from Antiquity and into the twenty first century in order to broaden the original judicial and geographical definition and thereby include physical and digitized information and visual data in particular By focusing on a critical incident of recent Middle Eastern history namely the Gaza Freedom Flotilla of 2010 which sailed against Israel s enduring blockade it shows how the device of extraterritoriality shapes not only the political situation in Gaza the legal status of the maritime environment in which the flotilla incident took place and the judicial actions taken in response but also reveals how the concept of extraterritoriality is key to explaining the State s subsequent efforts to confiscate and monopolize all visual

evidence of its alleged violations of international statutes Through the lens of the missing visual evidence characterizing the Mavi Marmara incident after effects it explores how the legal system's ability to evade transparency seems to be a built in condition for eluding criminal accountability at the international level with the emphasis on extraterritoriality's fundamental role in fashioning our current legal and political orders

*Genealogies of Emotions, Intimacies, and Desire* Ann Brooks, 2016-10-04 *Genealogies of Emotions Intimacies and Desire* excavates epistemologies which attempt to explain changes in emotional regimes from medieval society to late modernity Key in this debate is the concept of intimacy The book shows that different historical periods are characterized by emotional regimes where intimacy in the form of desire sex passion and sex largely exist outside marriage and that marriage and traditional normative values and structures are fundamentally incompatible with the expression of intimacy in the history of emotional regimes The book draws on the work of a number of theorists who assess change in emotional regimes by drawing on intimacy including Michel Foucault Eva Illouz Lauren Berlant Anthony Giddens Laura Ann Stoler Anne McClintock Niklas Luhmann and David Shumway Some of the areas covered by the book include Foucault sex and sexuality romantic and courtly love intimacy in late modernity Imperial power gender and intimacy intimacy and feminist interventions and the commercialization of intimacy This book will appeal to students and scholars in the social sciences and humanities including sociology gender studies cultural studies and literary studies

*Disconnecting Sovereignty* Mariavittoria Catanzariti, 2024-08-07 This book explores the dynamic legal semantics of territory as applied to data It offers a theoretical assessment of the legal challenges that data flows pose for the principle of territoriality and for state sovereignty more generally The concept of sovereignty has traditionally developed in close connection with the exercise of powers over a territory and ideas of jurisdiction have always been based on the principle of territoriality Digitalization questions however the very idea of physical frontiers Interconnected networks make data in effect borderless Data can in fact be created stored processed and accessed anytime and from anywhere The idea of the book is upbeat the law can keep pace with the ability of data to fragment reality The condition for this is that sovereignty disconnects from territory Disconnection is not getting rid of the territory once and for all it only means that for data alternatives to the territorial connection exist The analysis focuses on data from a holistic perspective personal and nonpersonal with the aim of investigating divergent and convergent solutions provided by different branches of the law data protection IP law international law and fundamental rights protection It assesses in particular the relationships between digitalization and the principle of territoriality focusing on the specific legal aspects the connections between law and territory the impact of digitalization on state sovereignty the use of extraterritoriality to circumvent territorial limitations on data flows the rise of digital jurisdiction and its challenges the interplay between digital jurisdiction and state sovereignty and the alternative technological and legal solutions to data localization

*Novels and the Sociology of the Contemporary* Arpad Szokolczai, 2016-04-14 This book substantiates two claims First the modern world was not simply produced by objective

factors rooted in geographical discoveries and scientific inventions to be traced to economic technological or political factors but is the outcome of social cultural and spiritual processes Among such factors beyond the Protestant ethic Max Weber the rise of the absolutist state and its disciplinary network Michel Foucault or court society Norbert Elias a prime role is played by theatre The modern reality is deeply theatricalized Second a special access for studying this theatricalized world is offered by novels The best classical novels not simply can be interpreted as describing a world like the theatre but they capture and present a world that has become thoroughly transformed into a global theatre The theatre effectively transformed the world and classical novels effectively analyze this theatricalized reality much better than the main instruments supposedly destined to study reality philosophy and sociology Thus instead of using the technique of sociology to analyze novels the book will treat novels as a royal road to analyze a theatricalized reality in order to find our way back to a genuine and meaningful life

*Social Change and the Coming of Post-consumer Society* Maurie J Cohen, Halina Szejnwald Brown, Philip J Vergragt, 2017-03-31 Consumer society is an unquestionably complex social construct However after decades of unremitting dominance there are signs emerging that it is starting to falter both as a coherent and durable system of social organization and as a strategy for societal advancement Debates concerning how we can transition beyond present energy and materials intensive consumer society are beginning to gain greater salience Social Change and the Coming of Post Consumer Society aims to develop more complete appreciation of the relevant processes of social change and to identify effective interventions that could enable a transition to supersede consumer society Bringing together leading interdisciplinary experts on social change the book identifies and analyzes several ongoing small and modest scale social experiments Possibilities for macro scale change from the interlinked perspectives of culture economics finance and governance are then explored These contributions expose the systemic problems that are emblematic of the current condition of consumer society specifically the unsustainability of prevailing consumption practices and lifestyles and the persistence of inequalities These observations are summarized and extended in the final chapter of the book This volume will be of great interest to students and scholars of

sustainable consumption sustainability transitions environmental sociology and sustainable development      **Effective**

**Participation of National Minorities and Conflict Prevention** William Romans,Iryna Ulasiuk,Anton Petrenko

Thomsen,2019-10-21 The effective management of differences between groups within democracies means moving beyond the examination of individual rights In the field of national minorities conflict prevention diplomacy promoting the effective participation of national minorities in public life is a primary objective Enhancing participation encourages a sense of belonging contributes to societal integration and promotes cohesion within the multi ethnic state The Lund

Recommendations on the Effective Participation of National Minorities in Public Life directly address these challenges and the OSCE High Commissioner on National Minorities works with states and national minority groups to advance functional solutions that reduce tensions and foster stability This volume analyses the components of a balanced legal and policy framework related to effective participation of national minorities with a view to preventing conflict and reviews the related work of the OSCE and other international organisations      **Peace in Political Unsettlement** Jan Pospisil,2018-12-11

International peacebuilding has reached an impasse Its lofty ambitions have resulted in at best middling success punctuated by moments of outright failure The discrediting of the term liberal peacebuilding has seen it evolve to respond to the numerous critiques Notions such as inclusive peace merge the liberal paradigm with critical notions of context and the need to refine practices to take account of the local or complexity However how this would translate into clear guidance for the practice of peacebuilding is unclear Paradoxically contemporary peacebuilding policy has reached an unprecedented level of vagueness Peace in political unsettlement provides an alternative response rooted in a new discourse which aims to speak both to the experience of working in peace process settings It maps a new understanding of peace processes as institutionalising formalised political unsettlement and points out new ways of engaging with it The book points to the ways in which peace processes institutionalise forms of disagreement creating ongoing processes to manage it rather than resolve it It suggests a modest approach of providing hooks to future processes maximising the use of creative non solutions and practices of disrelation are discussed as pathways for pragmatic post war transitions It is only by understanding the nature and techniques of formalised political unsettlement that new constructive ways of engaging with it can be found      **Jürgen**

**Habermas and the European Economic Crisis** Gaspare M. Genna,Thomas O. Haakenson,Ian W. Wilson,2016-05-20

The European Union entered into an economic crisis in late 2009 that was sparked by bank bailouts and led to large unsustainable sovereign debt The crisis was European in scale but hit some countries in the Eurozone harder than others Despite the plethora of writings devoted to the economic crisis in Europe present understandings of how the political decisions would influence the integration project continue to remain vague What does it actually mean to be European Is Europe still a collection of peoples that rallied together during good times and then retreat to nationalism when challenges appear Or has Europe adopted a common identity that would foster solidarity during hard times This book provides its reader

with a fresh perspective on the importance identity has on the functioning of the European Union as exemplified in Jürgen Habermas seminal text *The Crisis of the European Union: A Response*. Rather than exploring the causes of the crisis the contributors examine the current state of European identity to determine the likelihood of implementing Habermas suggestions. The contributor's interdisciplinary approach is organized into four parts and examines the following key areas of concern: Habermas arguments placing them into their historical context; To which degree do Europeans share the ideals Habermas describes as crucial to his program of reform; Influence of Habermas cosmopolitanism through religious and literary lenses; Impact of Habermas notions in the arenas of education, national economies, austerity and human rights. Jürgen Habermas and the European Economic Crisis will be read by scholars in the fields of Political Theory and Philosophy, European Politics and Cultural Studies.
