Social Class in Counseling William Ming Liu, 2013-04-26 Social class is a pervasive facet of all lives regardless of one's own social class and status. One would think its ubiquity would make it necessary for all helping professionals to understand social class and discuss it in therapy and research. Yet social class and classism are one of the most confusing and difficult concepts to understand and integrate into research and counseling practice, mostly due to the relative lack of psychological theories, research, and quantitative data. Fulfilling this need, this handbook summarizes and synthesizes available research on social class and classism in counseling practice and research areas. The 32 chapters included offer up-to-date fascinating and provocative applications of social class and classism as seasoned chapter authors provide an overview of theories related to social class and classism and its application toward research, education, training, and practice. Chapters include comprehensive coverage of lifespan issues related to social class, such as unique aspects of social class and classism in the lives of children, adolescents, and older adults; how social class is studied and empirically understood through research; assessment and practice implications of social class in career counseling, psychological assessment, and diagnosis; and the therapy relationship. How social class is implicated in positive psychology, career and work psychology, and health psychology; social class and classism and its connection to whiteness, racism, sexual orientation, religion, and spirituality; and social justice. This book offers the first compendium of counseling-related resources on social class and classism and will be a comprehensive must-have reference for professionals and academics in counseling psychology and related fields for years to come.

Metaheuristics Algorithm and Optimization of Engineering and Complex Systems R., Thanigaivelan, M., Suchithra, S., Kaliappan, T., Mothilal, 2024-07-23 In the field of engineering optimization and decision making, have become pivotal concerns. The ever-increasing demand for data processing has given rise to issues such as extended processing times and escalated memory utilization, posing formidable obstacles across various engineering domains. Problems persist, requiring not only solutions but advancements beyond existing best practices. Creating and implementing novel heuristic algorithms is a time-intensive process, yet the imperative to do so remains strong, driven by the potential to significantly lower computational costs, even with marginal improvements. This book, titled **Metaheuristics Algorithm and Optimization of Engineering and Complex Systems**, is a beacon of innovation in this context. It examines the critical need for inventive algorithmic solutions, exploring hyperheuristic approaches that offer solutions such as automating search spaces through integrated heuristics. Designed to cater to a broad audience, this book is a valuable resource for both novice and experienced dynamic optimization practitioners. By addressing the spectrum of theory and practice, as well as discrete versus continuous dynamic optimization, it becomes an indispensable reference in a captivating and emerging field. With a deliberate focus on inclusivity, the book is poised to benefit anyone with an interest in staying abreast of the latest developments in dynamic optimization.

COVID-19 related olfactory dysfunction: Neuropsychiatric, psychological, and cognitive effects Dalinda Isabel Sánchez-Vidaña, Benson Wui-Man Lau, Dongdong Qin, 2023-11-27. Olfactory dysfunction, also known as anosmia and hyposmia, is one of the most prevalent (80-90%) symptoms reported by patients with COVID-19. Outside the context of COVID-19, chemosensory dysfunction has been associated with decreased quality of life, anxiety, depression and cognitive impairment. In the setting of COVID-19, decreased sense of smell

has been positively associated with mood disorders such as anxiety and depression The short term and long term neuropsychiatric implications of the olfactory dysfunction related to COVID 19 are still largely unexplored Investigation of the neuropsychiatric sequelae of olfactory dysfunction related to COVID 19 infection is particularly critical to characterize the pathological effects of COVID 19 on brain function and to develop strategies to improve patient s quality of life and mental wellbeing In this Research Topic Frontiers aims to highlight studies that investigate the neuropsychiatric psychological and cognitive consequences of COVID 19 related olfactory dysfunction present current advances in the field and anticipate health care needs for the development of therapeutic interventions
