

The background of the cover is a photograph of a stone wall, possibly made of slate, which is heavily encrusted with long, white icicles hanging from the ledges. In the lower right foreground, a person is blurred, wearing a red hat and a dark jacket, carrying a large, light-colored bag or basket. The overall scene suggests a cold, urban environment.

the intersections of critical inquiry and immediate substantive actions The contributions inside recognize the rich complexities of the present city not as barriers or obstacles but as grounds for uncovering opportunity and unleashing potential Now Urbanism asserts that the future city is already here It views city making as grounded in the imperfect messy yet rich reality of the existing city and the everyday purposeful agency of its dwellers Through a framework of situating grounding performing distributing instigating and enduring these contributions written by a multidisciplinary group of practitioners and scholars illustrate specificity context agency and networks of actors and actions in the re making of the contemporary city

Urbanization, Biodiversity and Ecosystem Services: Challenges and Opportunities Thomas Elmqvist,Michail Fragkias,Julie Goodness,Burak Güneralp,Peter J. Marcotullio,Robert I. McDonald,Susan Parnell,Maria Schewenius,Marte Sendstad,Karen C. Seto,Cathy Wilkinson,2013-09-21 Urbanization is a global phenomenon and the book emphasizes that this is not just a social technological process It is also a social ecological process where cities are places for nature and where cities also are dependent on and have impacts on the biosphere at different scales from local to global The book is a global assessment and delivers four main conclusions Urban areas are expanding faster than urban populations Half the increase in urban land across the world over the next 20 years will occur in Asia with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns which together will have significant impacts on net primary production ecosystem health and biodiversity Urban expansion will heavily draw on natural resources including water on a global scale and will often consume prime agricultural land with knock on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted which will constrain the protection of biodiversity and management of ecosystem services

River.Space.Design Martin Prominski,Antje Stokman,Daniel Stimberg,Hinnerk Voermanek,Susanne Zeller,Katarina Bajc,Nengshi Zheng,2023-03-20 Urban riverbanks are attractive locations and highly prized recreational environments However they must meet the requirements of flood control open space design and ecology at the same time often a challenging task for the designer in very confined spaces The book the result of a study lasting several years subjects more than 60 exemplary projects to a comparative analysis The result is a systematic catalogue of strategies and innovative design tools The designer and planner thus obtains an overview of the range of design possibilities Eight new case studies from China Italy New Zealand the Netherlands Germany and Switzerland were selected and added for the enlarged edition of this reference work on riverbank design

developers The production revitalization and commodification of Manhattan's public spaces as a phenomenon and as a subject of study also highlights the vicissitudes of the reconciliation of the many different agents which are part of the process The challenge of the book does not only lie in the analysis of good design but more importantly in how to understand the functional mechanisms for the current trends in the production of space for public use A complex framework of actors governance and market monopolies which invites the reader to participate in the debate of how these interventions contribute or not to an inclusive environment anchored in the existing built fabric Manhattan's Public Spaces invites reflection on the revitalization of the city's shared space from all dimensions Beautifully illustrated in black and white with over 50 images this book will be of interest to scholars and students in architecture planning and urban design *The Designer's Field Guide to Collaboration* Caryn Brause, 2016-11-18 The Designer's Field Guide to Collaboration provides practitioners and students with the tools necessary to collaborate effectively with a wide variety of partners in an increasingly socially complex and technology driven design environment Beautifully illustrated with color images the book draws on the expertise of top professionals in the allied fields of architecture landscape architecture engineering and construction management and brings to bear research from diverse disciplines such as software development organizational behavior and outdoor leadership training Chapters examine emerging and best practices for effective team building structuring workflows enhancing communication managing conflict and developing collective vision all to ensure the highest standards of design excellence Case studies detail and reflect on the collaborative processes used to create award winning projects by Studio Gang Perkins Will Tod Williams Billie Tsien Architects Partners Gensler CDR Studio Mahlum Architects In Site Architecture and Thornton Tomasetti's Core Studio The book also provides pragmatic ideas and formal exercises for brainstorming productively evaluating ideas communicating effectively and offering feedback By emphasizing the productive influence and creative possibilities of collaboration within the changing landscape of architectural production the book proposes how these practices can be taught in architecture school and expanded in practice In a changing world that presents increasingly complex challenges optimizing these collaborative skills will prove not only necessary but crucial to the process of creating advanced architecture **A World of Gardens** John Dixon Hunt, 2014-05-14 A Japanese garden is immediately distinct to the eye from the traditional gardens of an English manor house just as the manicured topiaries of Versailles contrast with the sharp cacti of the American Southwest Though gardening is beloved the world over the style of gardens themselves varies from region to region determined as much by culture as climate In this series of illustrated essays John Dixon Hunt takes us on a world tour of different periods in the making of gardens Hunt shows here how cultural assumptions and local geography have shaped gardens and their meaning He explores our continuing responses to land and reworkings of the natural world encompassing a broad range of gardens from ancient Roman times to early Islamic and Mughal gardens from Chinese and Japanese gardens to the invention of the public park and modern landscape architecture A

World of Gardens looks at key chapters in garden history reviewing their significance past and present and tracing the recurrence of different themes and motifs in the design and reception of gardens throughout the world A World of Gardens celebrates the idea that similar experiences of gardens can be found in many different times and places including sacred landscapes scientific gardens urban gardens secluded gardens and symbolic gardens Featuring two hundred images this book is a treasure trove of ideas and inspiration whether your garden is a window box a secluded backyard or a daydream

Walking To Know Germán T. Cruz, 2012-05-14 This book represents a transformational experience presented in the form of a broad meditation upon a walking pilgrimage by an experienced designer on the Camino de Santiago Tinted with a scholarly lens and a travelogue commentary on places and events during the journey the work pursues a wider awareness of design purpose and perception based on immediate and past experience The use of the word pilgrimage denotes the nature of the journey beyond mere physical effort and near an extraordinary spiritual and mental enterprise The emphasis is on walking either physically or figuratively as a means to the achievement of design knowledge that more fully informs awakens and utilizes the body and the senses to produce a superior design articulation The journey took ten years in preparation with only three months in execution however it was not a search for enlightenment as much as it was led by a sincere desire to know and to see To know first hand the places and the people as well as to see the land up close in a manner of receiving a legacy of centuries of presence culture and testimony Truly to partake of the experience of thousands of other pilgrims across 10 centuries and understand their journeys not so much as just a walk of faith but also an enduring legacy that has had critical impact upon design practice In this manner the design activity is seen more properly understood as a pilgrimage rather than an occupation or a classified profession For organizational purposes the book consists of two major sections that complement one another and serve to clarify and amplify both text and testimony Section One addresses issues of design interest in a holistic rather than a technical manner while Section Two presents a narrative of the experience that serves to place the journey in focus The symbiotic engagement between the two sections results in a richer narrative of causality that affirms purpose and consequence of journey Many conclusions are left to the reader and no strict delimitation is made of discussion boundaries except for the centrality of truth and the guiding power of passion Without a doubt this book is about open and truthful personal quests and does not conform

to overriding socio political frameworks of dialogue Insight is extracted from the author s experience and scholarship across 40 plus years that results in an animated and challenging dialogue along with a vast and diverse bibliography with works of varied provenance that served to emphasize and support salient and outstanding concepts and ideas with bearing on the quest The intention was not to produce a treatise or a guidebook but rather to express an experience and its consequences upon a person a mind and a spirit with benefit to design *Selected Works* Michael Van Valkenburgh Associates,2004*
