Routledge Handbook of Landscape and Food Joshua Zeunert,Tim Waterman,2018-02-02 Since the turn of the millennium there has been a burgeoning interest in and literature of both landscape studies and food studies Landscape describes places as relationships and processes Landscapes create people s identities and guide their actions and their preferences while at the same time are shaped by the actions and forces of people Food as currency medium and sustenance is a fundamental part of those landscape relationships This volume brings together over fifty contributors from around the world in forty profoundly interdisciplinary chapters Chapter authors represent an astonishing range of disciplines from agronomy anthropology archaeology conservation countryside management cultural studies ecology ethics geography heritage studies landscape architecture landscape management and planning literature urban design and architecture Both food studies and landscape studies defy comprehension from the perspective of a single discipline and thus such a range is both necessary and enriching

The Routledge Handbook of Landscape and Food is intended as a first port of call for scholars and researchers seeking to undertake new work at the many intersections of landscape and food. Each chapter provides an authoritative overview, a broad range of pertinent readings and references and seeks to identify areas where new research is needed though these may also be identified in the many fertile areas in which subjects and chapters overlap within the book. Memorable Customer Experiences Joëlle Vanhamme, 2016-04-22

Experiential marketing or memorable customer experiences is proving a popular tool amongst businesses seeking to make an impact in a competitive world. Yet the scramble to achieve a presence among experience providers has led many companies to design and implement experiential marketing without integrating it with their overall marketing strategy. These companies often end up dissatisfying their customers rather than delighting them. This research anthology investigates different angles of experiential marketing. The 16 chapters are organised in six sections. The first section considers whether memorable customer experiences result from the use of traditional marketing practices perhaps implemented more effectively than previously or require entirely new practices with new foundations that turn companies into experience providers. Section two details ways businesses seek to build brands through putting experiential marketing into practice while section three asks whether there are general principles that can be applied to the design of customer experiences which ensure successful outcomes whatever market you may operate in. Section four examines how companies manage their customer experiences once they have made the strategic decision to provide them and section five looks at methods available to evaluate the success of these customer experiences. Experiential marketing changes everything claim the management gurus but is it really so significant that not joining this race is dangerous? The last section of the book offers a much needed critique of experiential marketing.
