statistical methods to help discern whether an outbreak may be occurring and if there is sufficient evidence of an outbreak then to locate and track it. Statisticians also help design surveys and experiments to collect critical information and they analyze the resulting data to help investigators zero in on a cause for a disease.

Covers surveillance techniques for communicable diseases like Zika and chronic diseases such as cancer. Gives real world examples of disease investigations including smallpox, syphilis, anthrax, yellow fever, and microcephaly and its relationship to the Zika virus. This book tells the story of how medical and public health professionals use statistics to separate critical disease information from all the noise of our modern world so that they can most effectively intervene and mitigate the effects of disease. Through the process of identifying an outbreak, finding its cause, and developing a plan to prevent its reoccurrence, statisticians and epidemiologists help improve public health across the world.

Deadly Baggage Al Sandine, 2015-08-11. In 1519, a few hundred Europeans led by Hernan Cortes sailed from Cuba to the Mexican mainland where they encountered representatives of the Aztec Empire. Their Iberian history, culture, and religion, and their experience in the Greater Antilles, made conquest and riches the aim of these adventurers. They regarded themselves as heroes in a romantic crusade of good against evil. Each member of the expedition sought to acquire precious metals and to become a lord of enslaved native labor. Their horses and steel swords, aided by native disunity and susceptibility to Old World diseases, ensured their success. This analysis of the conquest of Mexico stands in contrast to previous narratives that either reduce the conquest to a contest between Cortes and Montezuma or describe a near-miraculous victory of European ingenuity and Western values over Indian superstition and savagery. The author re-frames the clash of civilizations in New World prehistory that left inhabitants at a disadvantage.
