

The background of the book cover is a vibrant, abstract composition. It features a close-up, angled view of a computer keyboard with keys in shades of blue, purple, and pink. Overlaid on this are several thick, glowing lines in bright yellow, orange, and red, which curve and intersect across the frame, creating a sense of dynamic energy and technological connectivity. The overall color palette is dominated by these warm, neon-like hues against a darker, cooler background.

Shafer, 2013-11-21 *Masters Theses in the Pure and Applied Sciences* was first conceived, published and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CNDAS) at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking, we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, *Masters Theses in the Pure and Applied Sciences* has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 21, thesis year 1976, a total of 10,586 theses titles from 25 Canadian and 219 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. **Fachsprachen / Languages for Special Purposes. 2.
