Iowa's Remarkable Soils Kathleen Woida, 2021-05-03 Sometimes called black gold Iowa's deep rich soils are a treasure that formed over thousands of years under the very best of the world's grasslands the tallgrass prairie The soils are diverse and complex and hold within them a record not only of Iowa's prehistoric past but also of the changes that took place after settlers utterly transformed the land as well as the ongoing adjustments taking place today due to climate change In language that is scientifically sound but accessible to the layperson Kathleen Woida explains how soils formed and have changed over centuries and millennia in the land between two rivers Its soils are what make Iowa a premier agricultural state both in terms of acres planted and bushels harvested But in the last hundred years large scale intensive agriculture and urban development have severely degraded most of our soils However as Woida documents some innovative Iowans are beginning to repair and regenerate their soils by treating them as the living ecosystem and vast carbon store that they are To paraphrase Aldo Leopold these new pioneers are beginning to see their soils as part of a community to which they and their descendants belong rather than commodities belonging to them *Archaeological Soil and Sediment Micromorphology* Cristiano Nicosia, Georges Stoops, 2017-08-10 Archaeological Soil and Sediment Micromorphology goes beyond a mere review of current literature and features the most up to date contributions from numerous scientists working in the field The book represents a groundbreaking and comprehensive resource covering the plethora of applications of micromorphology in archaeology Archaeological Soil and Sediment Micromorphology offers researchers students and professionals a systematic tool for the interpretation of thin sections of archaeological contexts This important resource is also designed to help stimulate the use of micromorphology in archaeology outside Europe where the technique is less frequently employed Moreover the authors hope to strengthen the proper application of soil micromorphology in archaeology by illustrating its possibilities and referring in several cases to more specialized publications for instance in the field of plant remains pottery and phytoliths Written for anyone interested in the topic this important text offers Contributions from most of the world's leading authorities on soil micromorphology A series of chapters on the major topics selected among the most recurrent in

Revolutions in Development Inquiry Robert Chambers, 2012-05-04 Robert Chambers returns with a new book that reviews together for the first time some of the revolutionary changes in the methodologies and methods of development inquiry that have occurred in the past forty years and reflects on their transformative potential for the future This book breaks new ground by describing and analysing the evolution of a sequence of approaches Starting with the dinosaurs of large scale multi subject questionnaire surveys and the biased visits and perceptions of rural development tourism and urban based professionals there follows a look at the explosive proliferation of methodologies and methods of recent years These include rapid rural appraisal RRA participatory rural appraisal PRA and dramatic developments in the still largely unrecognized fields of participatory numbers and statistics and of participatory mapping and GIS Chambers shows how these can empower local people and provide rigorous and valid substitutes for some more traditional methods of inquiry Also presented is a repertoire for offsetting the biases of the urban trap which has become so serious for officials and aid agency staff Importantly Chambers points out that we are now in a different space methodologically from a few years ago He makes the case that participatory methodologies evolved through creative and eclectic pluralism can be a transformative wave for the future as drivers of personal professional and institutional change This book is for all who are concerned with development regardless of profession discipline or organization who seek to be abreast of the revolutionary breakthroughs in approaches and methods of inquiry of recent years and what Chambers calls their unlimited potentials Published with IDS
