the pathogen during inter epidemic periods and enhancing disease transmission This Research Topic is dedicated to our current understanding in these areas and will bring together leading experts in the field to provide a deep overview of Vibrios ecology and evolution and will suggest the pathway of future research in this field **PGPR Amelioration in Sustainable Agriculture** Amit Kishore Singh,Pawan Kumar Singh,Ajay Kumar,2018-09-14 PGPR Amelioration in Sustainable Agriculture Food Security and Environmental Management explores the growth promoting rhizobacteria PGPR that are indigenous to soil and plant rhizosphere These microorganisms have significant potential as important tools for sustainable agriculture PGPR enhance the growth of root systems and often control certain plant pathogens As PGPR amelioration is a fascinating subject is multidisciplinary in nature and concerns scientists involved in plant health and plant protection this book is an ideal resource that emphasizes the current trends of and probable future of PGPR developments Chapters incorporate both theoretical and practical aspects and may serve as baseline information for future research This book will be useful to students teachers and researchers both in universities and research institutes especially working in areas of agricultural microbiology plant pathology and agronomy Presents new concepts and current development in PGPR research and evaluates the implications for sustainable productivity Describes the role of multi omics approaches in establishing an understanding of plant microbe interactions that help plants optimize abiotic stresses Incorporates both theoretical and practical aspects and will serve as a baseline for future research Annot Inst Edit Lab Man Biol 3e /Campbell Benjamin-Cummings Publishing Company,Judith Giles Morgan,1994-02 **British Paperbacks in Print** ,1985

*Biostimulants in Agriculture* Youssef Rouphael,Giuseppe Colla,2020-03-24 **The Search for Biological Active Agent(s) From Actinobacteria, 2nd Edition** Learn-Han Lee,Kok-Gan Chan,Jem Stach,Elizabeth M. H. Wellington,Bey-Hing Goh,2020-03-27 There is a large market demand for new drugs The existing chronic or common ailments without cures development of new diseases with unknown causes and the widespread existence of antibiotic resistant pathogens have driven this field of research further by looking at all potential sources of natural products To date microbes have made a significant contribution to the health and well being of people globally The discoveries of useful metabolites produced by microbes have resulted in a significant proportion of pharmaceutical products in today s market Therefore the investigation and identification of bioactive compounds producing microbes is always of great interest to researchers Actinobacteria are one of the most important and efficient groups of natural metabolite producers Among the numerous genera Streptomyces have been recognized as prolific producers of useful natural compounds as they provide more than half of the naturally occurring antibiotics isolated to date and continue to emerge as the primary source of new bioactive compounds Certainly these potentials have attracted ample research interest and a wide range of biological activities have been subsequently screened by researchers with the utilization of different In vitro and In vivo model of experiments Literature evidence has shown that a significant number of interesting compounds produced by Actinobacteria were exhibiting either strong

anticancer or neuroprotective activity The further in depth studies have then established the modulation of apoptotic pathway was involved in those observed bioactivities These findings indirectly prove the biopharmaceutical potential possessed by Actinobacteria and at the same time substantiate the importance of diverse pharmaceutical evaluations on Actinobacteria In fact many novel compounds discovered from Actinobacteria with strong potential in clinical applications have been developed into new drugs by pharmaceutical companies Together with the advancement in science and technology it is predicted that there would be an expedition in discoveries of new bioactive compounds producing Actinobacteria from various sources including soil and marine sources In light of these current needs and great interest in the scope of this research this book seeks to contribute on the investigation of different biological active compounds producing actinobacteria which are exhibiting antimicrobial antioxidant neuroprotective anticancer activities and similar
