The Auto Meter IIIF is a versatile high-performance meter for measuring both ambient light and flash. This compact unit eliminates the need for two separate meters. Conventionally used, allowing you to be ready for any metering situation, both in prevailing light and with flash.

Utilizing a high-sensitivity silicon photocell and a specially designed microprocessor circuit, this multi-function meter takes precise measurements of incident or reflected light, presenting readings instantly on its liquid-crystal digital/analog display. For ambient-light measurements, simply pressing the appropriate key inputs or changes film speed and time settings, and gives the applicable EV or f-number readout to within 1/10 of a stop. When taking electronic flash readings, a measuring period of 1/60 or 1/250 sec. can be selected; measurements are displayed in f-numbers digitally on the display. A special power-saving feature automatically clears the display about two minutes after a measurement is taken or the last key is released.

The Auto Meter IIIF also incorporates a memory circuit that can store one or two previous ambient-light and/or flash measurements, displaying them on the analog scale. This greatly simplifies comparison of readings for determining exposure and lighting ratios. An average exposure value for a scene can be obtained from two memorized readings by pressing the averaging key. Recall and clear keys enable digital display of memorized data and erasing of the memory for future inputs.

A full system of accessories is compatible with the Auto Meter III. They attach quickly and easily to the meter's rotating head by bayonet mount or to the accessory-receptor jack.

To obtain the best results and to get maximum use from your new Minolta meter, please read and observe all applicable sections of this manual.

Throughout the text you will find a series of letters and numbers. Each of these refers to a picture on the fold-out pages at the front.
