Plants also do. This book is a comprehensive and analytical account of the migration of an Old World plant, water hyacinth, also known to botanists as *Eichhornia Crassipes*, from the Amazon Basin and surrounding areas to Africa through human agency from about 1800 to the present. As an integrative work which benefits from methodologies and conceptual approaches drawn from limnology, botany, biology, geography, history, ecology, and other social sciences and humanities, the book further explores the political, economic, and ecological consequences of the spread of water hyacinth from its native habitat through European botanical gardens to Africa's rivers, lakes, dams, and wetlands. In part, as a narrative of Western tinkering with African ecologies gone awry, the study has strong lessons for environmental historians and social scientists, as well as contemporary foundations, aid workers, development experts, and African governments. Although it may appear to be a micro-history of a single plant, water hyacinth, it illuminates broader issues in the history of the modern environment in Africa and similar studies worldwide. This study is primarily rooted on the histories of colonialism, bioinvasion, environmental realities, and experiences in Africa. The highly visible pathways of hyacinth's spread across international frontiers along watercourses and communication networks means that not only is this a trans-boundary environmental affair, but one which directly involves bilateral relations between African states. **Lands of the Safia-Pongani Area, Territory of Papua and New Guinea** B. P. Ruxton, 1967 *Moore's Rural New Yorker*, 1912 **A Dictionary of Selected Synonyms in the Principal Indo-European Languages** Carl Darling Buck, 2008-07-03 Originally published in 1949 and appearing now for the first time in a paperbound edition, Buck's Dictionary remains an indispensable tool for diachronic analysis of the Indo-European languages. Arranged according to the meaning of words, the work contains more than 1,000 groupings of synonyms from the principal Indo-European languages. Buck first tabulates the words describing a particular concept and then discusses their etymological and semantic history, tracing changes in meaning of the root words as well as presenting cases indicating which of the older forms have been replaced by expressions of colloquial or foreign origin.
