Managing Vocational Training Systems Vladimir Gasskov, 2000 Provides state of art materials relating to the management and organization of public vocational education and training VET systems and suggests a framework for developing the management competence of senior VET administrators encouraging them to review critically their administrative practices in order to move towards professional excellence Covers management organizational structure target setting planning financing and training administration **Integral Ministry Training** Robert Brynjolfson, Jonathan Lewis, 2006 This manual is an invaluable resource for anyone from the global evangelical community who is involved with training people for ministry As a textbook it presents a biblical and educational framework for holistic training as well as a context sensitive process for the design of new programs and the evaluation of existing programs Packed with practical examples and aids it is a tool trainers will keep handy and use often in their course planning and implementation This book was published in partnership with the World Evangelical Alliance **Career Development as a Partner in Nation**

Building Australia Wendy Patton, 2019-07-15 Despite examples of vocational guidance practice being evident in Australia since the mid 1800s there remains a spasmodic and patchwork approach to practice across the country For decades it is a field which has been paradoxically boosted and challenged by changing economic and political agendas Repeated international national and State reviews emphasise the vital nature of a systemic national approach to career development however authors repeatedly lament the lack of a sustained focus on career activity as a major national priority There is no broad comprehensive historical reckoning of the history of career development theory and practice in Australia since this early period Career development theory and practice in Australia has been forged in partnership with developments in an international context In documenting the shared history with other countries the author significantly adds to the body of knowledge on career development as a field in Australia and internationally The book provides new understandings about the historical development of this field of knowledge and in particular the challenging and cyclical nature of its policy history
