### **The Experimental Imagination** Tita

Chico,2018-06-05 Challenging the two cultures debate The Experimental Imagination tells the story of how literariness came to be distinguished from its epistemological sibling science as a source of truth about the natural and social worlds in the British Enlightenment Tita Chico shows that early science relied on what she calls literary knowledge to present its experimental findings More radically she contends that science was made intellectually possible because its main discoveries and technologies could be articulated in literary terms While early scientists deployed metaphor to describe the phenomena they defined and imagination to cast themselves as experimentalists literary writers used scientific metaphors to make the case for the epistemological superiority of literary knowledge Drawing on literature as well as literary language tropes and interpretive methods literary knowledge challenges our dominant narrative of the scientific revolution as the sine qua non of epistemological innovation in the British Enlightenment With its recourse to imagination as a more reliable source of truth than any empirical account literary knowledge facilitates a redefinition of authority and evidence as well as of the self and society implicitly articulating the difference that would come to distinguish the arts and sciences

### **The Province of**

**Affliction** Ben Mutschler,2020-08-06 In The Province of Affliction Ben Mutschler explores the surprising roles that illness played in shaping the foundations of New England society and government from the late seventeenth century through the early nineteenth century Considered healthier than people in many other regions of early America and yet still riddled with disease New Englanders grappled steadily with what could be expected of the sick and what allowances were made to them and their providers Mutschler integrates the history of disease into the narrative of early American social and political development illuminating the fragility of autonomy individualism and advancement Each sickness in early New England created its own web of interdependent social relations that could both enable survival and set off a long bureaucratic struggle to determine responsibility for the misfortune From families and households to townships colonies and states illness both defined and strained the institutions of the day bringing people together in the face of calamity yet also driving them apart when the cost of persevering grew overwhelming In the process domestic turmoil circulated through the social and political world to permeate the very bedrock of early American civic life

American lack of alphabetic literacy to manipulate political negotiation But while colonial dealings had devastating results for Native people treaty making and breaking involved struggles more complex than any simple contest between invaders and victims The early colonists were often compelled to negotiate on Indian terms and treaties took a bewildering array of shapes ranging from rituals to gestures to pictographs At the same time Jeffrey Glover demonstrates treaties were international events scrutinized by faraway European audiences and framed against a background of English Spanish French and Dutch imperial rivalries To establish the meaning of their agreements colonists and Natives adapted and invented many new kinds of political representation combining rituals from tribal national and religious traditions Drawing on an archive that includes written documents printed books orations landscape markings wampum beads tally sticks and other technologies of political accounting Glover examines the powerful influence of treaty making along the vibrant and multicultural Atlantic coast of the seventeenth century

Hollywood or History? Scott L. Roberts, Charles J. Elfer, 2021-01-01 The challenges of teaching history are acute where we consider the world history classroom Generalized world history courses are a part of many if not most K 12 curricular frameworks in the United States While United States history tends to dominate the scholarship and conversation there are an equally wide number of middle level and secondary students and teachers engaged

in the study of world history in our public schools And the challenges are real In the first place if we are to mark content coverage as a curricular obstacle in the history classroom generally then we must underscore that concern in the world history classroom and for obvious reasons The curricular terrain to choose from is immense and forever expanding dealing with the development of numerous civilizations over millennia and across a wide geographic expanse In addition to curricular concerns world historical topics are inherently farther away from most students lives not just temporally but often geographically and culturally Thus the rationale for the present text Hollywood or History An Inquiry Based Strategy for Using Film to Teach World History The reviews of the first volume Hollywood or History An Inquiry Based Strategy for Using Film to Teach United States History strategy have been overwhelmingly positive especially as it pertains to the application of the strategy for practitioner Classroom utility and teacher practice have remained our primary objectives in developing the Hollywood or History strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history We believe that students connection to film along with teachers ability to use film in an effective manner will help alleviate some of the challenges of teaching world history The book provides 30 secondary lesson plans grades 6 12 that address nine eras in world history **Black Africans in the British Imagination**

Cassander L. Smith, 2016-12-14 As Spain and England vied for dominance of the Atlantic world during the sixteenth and seventeenth centuries mounting political and religious tensions between the two empires raised a troubling specter for contemporary British writers attempting to justify early English imperial efforts Specifically these writers focused on encounters with black Africans throughout the Atlantic world attempting to use these points of contact to articulate and defend England's global ambitions In *Black Africans in the British Imagination* Cassander L. Smith investigates how the physical presence of black Africans both enabled and disrupted English literary responses to Spanish imperialism By examining the extent to which this population helped to shape early English narratives from political pamphlets to travelogues Smith offers new perspectives on the literary social and political impact of black Africans in the early Atlantic world With detailed analysis of the earliest English language accounts from the Atlantic world including writings by Sir Francis Drake Sir Walter Raleigh and Richard Ligon Smith approaches contact narratives from the perspective of black Africans recovering figures often relegated to the margins This interdisciplinary study explores understandings of race and cross cultural interaction and revises notions of whiteness blackness and indigeneity Smith reveals the extent to which contact with black Africans impeded English efforts to stigmatize the Spanish empire as villainous and to malign Spain's administration of its colonies In addition her study illustrates how black presences influenced the narrative choices of European and later Euro American writers providing a more nuanced understanding of black Africans role in contemporary literary productions of the region Situation Critical Max Cavitch, Brian Connolly, 2024-02-26 The contributors to *Situation Critical* argue for the continued importance of critique to Early American studies pushing back against both reductivist neo

empiricism and so called postcritique
