73320 SERIES

This series combines rate of temperature rise and fixed temperature detection.

Rate of Rise operation is provided by an air chamber with a calibrated equalize vent. The vent allows the detector to compensate for day-to-day temperature fluctuations, but a rapid increase (a minimum of 150°F per minute) in room temperature will cause the detector to initiate an alarm. As the rate of temperature increase subsides, the detector automatically resets.

Fixed Temperature operation is entirely independent of the rate of rise feature. An internal spring is held under tension by a spot of fusible solder located in the detector shell. Temperature exceeding the detector heat rating will release the spring, causing an alarm condition. The detector must then be replaced.

73330 SERIES

This series provides fixed temperature detection only, with automatic reset.

A bi-metal disc is used as the heat-sensing element. As the air temperature exceeds the rating of the detector, an alarm is initiated. When the air temperature returns below the detector rating, the detector automatically resets.

- EWT EXPLOSION & WEATHERPROOF DETECTOR

The suffix "-EWT" affixed to the relevant number of the 73320 Series (See overleaf) denotes a heat detector provided with sealed terminals and the cover illustrated to the left. The cover may not be used with standard 73320 Series detectors.
