Personification John Rowan, 2009-12-04 Personification discusses the theory behind multiplicity of the person and considers the implications that the relationships between the different parts of the same person have in practice Providing both historical and contemporary insights John Rowan reveals new thinking and research in the field as well as offering guidelines for using this information in practice The book also looks closely at the practice of personification a technique involving the turning of a problem into a person and allowing a two way dialogue through which the inner critic can be addressed and explored As such areas of discussion include the use of multiplicity in therapy group work and the dialogical self the transpersonal This practical straightforward book will be ideal reading for anyone using personification in their therapeutic work including psychotherapists counsellors and coaches *Handbook of Dialogical Self Theory and Psychotherapy* Agnieszka Konopka, Hubert Hermans, Miguel Gonçalves, 2018-11-07 In the Handbook of Dialogical Self Theory and Psychotherapy Bridging Psychotherapeutic and Cultural Traditions the editors bring together a wide variety of therapeutic approaches in order to demonstrate how Dialogical Self Theory functions as a bridging framework crossing boundaries between countries and cultures The basic message is to facilitate a theory informed dialogue between different perspectives cognitive therapy psychoanalytic therapy gestalt therapy emotion focused therapy Eastern Indian American and transpersonal approaches The chapters present the theoretical notions qualitative methods and practical implications of the presented projects with attention to their common dialogical foundation With its bridging approach and interdisciplinary aims the Handbook of Dialogical Self Theory and Psychotherapy will be essential reading for psychotherapists and counsellors in practice and training and for those who are interested in the common factors underlying a wide variety of psychotherapeutic schools and traditions **Personification** John Rowan, 2009-12-04 Personification discusses the theory behind multiplicity of the person and reveals new thinking and research in the field as well as offering guidelines for using this information in practice Dialogical Self Theory Hubert Hermans, Agnieszka Hermans-Konopka, 2010-04-22 In a boundary crossing and globalizing world the personal and social positions in self and identity become increasingly dense heterogeneous and even conflicting In this handbook scholars of different disciplines nations and cultures East and West bring together their views and applications of dialogical self theory in such a way that deeper commonalities are brought to the surface As a bridging theory dialogical self theory reveals unexpected links between a broad variety of phenomena such as self and identity problems in education and psychotherapy multicultural identities child rearing practices adult development consumer behaviour the use of the internet and the value of silence Researchers and practitioners present different methods of investigation both qualitative and quantitative and also highlight applications of dialogical self theory Society in the Self Hubert J. M. Hermans, 2018-03-09 Instead of considering society as a social environment Society in the Self begins from the assumption that society works in the deepest regions of self and identity as expressed in phenomena like

self sabotage self radicalization self cure self government self nationalization and self internationalization This leads to the central thesis that a democratic society can only function properly if it is populated by participants with a democratically organized self In this book an integrative model is presented that is inspired by three versions of democracy cosmopolitan deliberative and agonistic democracy with the latter focusing on the role of social power and emotions Drawing on these democratic views three levels of inclusiveness are distinguished in the self personal I as an individual social I as a member of a group and global I as a human being A democratic self requires the flexibility of moving up and down across these levels of inclusiveness and has to find its way in fields of tension between the self and the other and between dialogue and social power As author Hubert Hermans explains this theory has far reaching consequences for such divergent topics as leadership in the self cultural diversity in the self the relationship between reason and emotion self empathy cooperation and competition between self parts and the role of social power in prejudice enemy image construction and scapegoating The central message of this book is reflected in Mahatma Gandhi's dictum Be the change you want to see in the world

Elle se situe à l'interface de la psychologie évolutionniste, des thérapies cognitives, des neurosciences et en s'appuyant sur différentes théories dont la théorie de l'attachement. La TFC se propose de cultiver la compassion par des pratiques de visualisation de méditation de pleine conscience de respiration ou encore de travail de chaises. Elle a été développée pour des personnes souffrant de problèmes psychologiques complexes et souvent chroniques dominés par le sentiment de honte et l'autocritique et associés des antécédents de maltraitance ou de carences psychoaffectives. Elle est indiquée entre autres pour les troubles anxieux, les épisodes bipolaires de la personnalité ou des conduites alimentaires etc. Les auteurs ont par leur travail pionnier fait connaître la TFC en France et contribué à sa diffusion auprès de la communauté des thérapeutes. L'ouvrage expose les bases théoriques et cliniques de la méthode avant de détailler le déroulé de la thérapie séance par séance.
