Perspectives, Insights, & Priorities Norman Horrocks, 2005-06-09 This extraordinary book defines and describes librarianship and library science through insightful and thoughtful essays contributed by 17 recognized leaders of the profession While each essay presents a distinct perspective and approach collectively they paint a picture of a humane and human profession central to and concerned with the cultural social political and intellectual underpinnings of civilization Often challenging and provocative often moving always engaging the essays reflect a diverse and complex profession and the values beliefs practices and philosophies that make it unique and vital The essays take a variety of approaches historical analysis personal recollection career review political or social commentary intellectual or philosophical musings and short and long term forecasting Even when the essays address issues of a practical nature they raise issues of concern in a broader context The role of libraries in a democratic society is examined through the historical perspective of the Boston Mandate of 1852 the most recent US presidential election and the current strain of censorship and intellectual freedom battles What is the proper role of libraries as social organizations advocating societal reform and working toward the common weal What is the role of government and politics in the profession What is the responsibility and role of the library in determining or advocating public policy If as one essay elegantly and persuasively argues our professional concern should center not on information or fact but on truth can we avoid political action and political repercussion These are weighty issues addressed not only with passion but also with a freedom and honesty seldom encountered This is a powerful and important book that should be read by every librarian every library student every public official indeed every citizen concerned with his or her community

Monoculture F. S. Michaels, 2011-04-25 Winner of the George Orwell Award One of The Atlantic's best books of the year As human beings we've always told stories stories about who we are where we come from and where we're going Now imagine that one of those stories is taking over the others narrowing our diversity and creating a monoculture Because of the rise of the economic story six areas of your world your work your relationships with others and the environment your community your physical and spiritual health your education and your creativity are changing or have already changed in subtle and not so subtle ways And because how you think shapes how you act the monoculture isn't just changing your mind it's changing your life In Monoculture F. S. Michaels draws on extensive research and makes surprising connections among disciplines to take a big picture look at how one story is changing everything Her research and writing have been supported by the Social Sciences and Humanities Research Council of Canada the Killam Trusts and regional and municipal arts councils Michaels has an MBA and completed five years of PhD studies in Organizational Analysis She lives in British Columbia Canada A single lucid narrative that's bound to first make you somewhat uncomfortable and insecure then give you the kind of pause from which you can step back and move forward with more autonomy authenticity and mindfulness than ever The Atlantic A thin enrapturing gem It's accessible sensible exactly the sort of book that should have and still could

should take off and create a tiny little dent in books Kenyon Review A smart and realistic guide to first recognizing the monoculture and the challenges of transcending its limitations Maria Popova BrainPickings.org I found myself reading non stop underlining like crazy an astute explanation about what I've been feeling recently something I couldn't put my finger on Michaels writes in clear energetic prose that's thoughtful engaging and unforced She defines and analyzes without judgment or insistence a breath of fresh air NPR a singularly brilliant and accessible analysis of some of the fundamental assumptions and driving principles of our time Comment Magazine 5 stars The cause and effect of our world is more surprising than you'd think With intriguing notions about the driving ideas of stories in every shape of our life Monoculture is an incredibly fascinating way about how the mind works and today's consumer culture Midwest Book Review If you just read one book this year read this one BuriedInPrint.com
