The Russo-Japanese War in Cultural Perspective, 1904-05 D. Wells, S. Wilson, 1999-08-24 The Russo Japanese War of 1904-05 has been widely seen as a historical turning point. For the first time in modern history an Asian and a European country competed on equal terms overturning the prevailing balance of power. Based on a wide range of original source material in Russian, Japanese and other languages this book goes beyond the military and international political grand narratives to examine the war's social, cultural, literary and intellectual impact in their historical context. In Japan the war reinforced the country's self image as a coming nation while in Russia combined with the revolution of 1905 and later political and social upheaval it was seen as separating the old regime from the new. Throughout the world spirit was seen to be a decisive factor and cultural considerations determined the war's interpretation. Featuring contributions by established scholars in the fields of military history and the history and literature of both Russia and Japan this book offers for the first time a comparative perspective on the symbolic meaning of the conflict.

Perspective and Perspectivation in Discourse Carl Friedrich Graumann, Werner Kallmeyer, 2002-11-18 Perspective and viewpoint are widely used in everyday talk as well as in the specialist languages of the social, cognitive and literary sciences. Taken from the field of visual perception and representation these concepts have acquired a general meaning and significance as characteristics of human cognitive processing. Since however this field is shared by an increasing body of disciplines perspective terms have also acquired specific and technical meanings. A striking example is the newly introduced use of perspectivation in discourse analysis. This volume on perspective and perspectivation the first of its kind will help to fill the gap between the common understanding of perspective and the specifics of its structure and dynamics as they have been elaborated in the human sciences mainly in psychology and linguistics. The focus is on the structure of perspectivity in cognition and language and the dynamics of setting and taking perspectives in social interaction and in the construction and understanding of texts. Both topics are presented here in an interdisciplinary way by a group of linguists and psychologists.
