Pesticides The Chemical Weapon That Kills Life The Ussrs Tragic Experience:

Pesticides Lev Aleksandrovich Fedorov, 2004 Experience of all former Soviet republics with the use of pesticides is imminent in order to properly understand the causes and effects of pesticide dissemination all over the globe Never in any country has so much medical and biological research on the consequences of pesticide use been seen as in the USSR in the 1970 s through 1980 s These data mostly remained secret until the 1990 s Part of this material is being presented here to the Western reader for the first time Among the problems discussed there are regulation control and economic use of pesticides in USSR agriculture air water and soil contamination transformation of pesticides in the environment and in food products human and animal poisoning by different types of pesticide morbidity and mortality associated with pesticides genetic effects and effects on reproduction endocrine and other systems bioaccumulation pesticides as poisons for cultivated plants pesticide resistance in target species connection of chemical weaponry plants with pesticide production **Obsolete**

Pesticides: A ticking time bomb and why we have to act now, 2009 Pesticides become obsolete when they can no longer be used for their intended purpose because they have been banned on account of their prolonged impact on the environment and or because they cannot be used due to age deterioration or a change of specification of currently applied pesticides This problem has been addressed by the Stockholm Convention on Persistent Organic Pollutants POPs which was ratified by most EU member states and many but not all non EU countries from Central and Eastern Europe and the former Soviet Union It entered into force in 2004 The Convention and the subsequent National Implementation Plans NIPs drawn up by signatories have addressed the problems to some extent notably within the EU Within the EU producers have been legally obliged to manage obsolete pesticides OPs including organising their collection and destruction according to EU laws applicable to hazardous waste management With EU enlargement EU law has consequently become applicable to the new member states as well The process has been accelerated by EU programmes such as PHARE or national programmes established by some member states However implementation of the provisions of the Stockholm Convention on their own is hardly sufficient to effectively deal with the risks associated with OPs The Convention only deals with nine specific OPs hereafter called Persistent Organic Pollutant or POP pesticides which represent a small proportion of the total number that are obsolete In addition and in close geographical proximity to the EU problems remain especially in South East Europe and the countries of the former Soviet Union **Pesticides** G. A. Matthews, 2016-01-13 Crop protection continues to be an important component of modern farming to maintain food production to feed an expanding human population but considerable changes have occurred in the regulation of pesticides in Europe in the last decade The aim has been to reduce their impact on people and the environment This has resulted in a major reduction in the number of chemicals approved for application on crops In other parts of the world a continuing expansion in the growing of genetically modified crops has also changed the pattern of pesticide use In this second edition Graham Matthews updates how pesticides are registered and applied and the techniques

used to mitigate their effects in the environment Information on operator safety protection of workers in crops treated with pesticides and spray drift affecting those who live in farming areas is also discussed By bringing together the most recent research on pesticides in a single volume this book provides a vital up to date resource for agricultural scientists agronomists plant scientists plant pathologists entomologists environmental scientists public health personnel toxicologists and others working in the agrochemical industry and governments It should assist development of improvements in harmonising regulation of pesticides in countries with limited resources for registration of pesticides

Collapse of an Empire Yegor Gaidar,2010-01-01 My goal is to show the reader that the Soviet political and economic system was unstable by its very nature It was just a question of when and how it would collapse From the Introduction to Collapse of an Empire The Soviet Union was an empire in many senses of the word a vast mix of far flung regions and accidental citizens by way of conquest or annexation Typical of such empires it was built on shaky foundations That instability made its demise inevitable asserts Yegor Gaidar former prime minister of Russia and architect of the shock therapy economic reforms of the 1990s Yet a growing desire to return to the glory days of empire is pushing today's Russia backward into many of the same traps that made the Soviet Union untenable In this important new book Gaidar clearly

illustrates why Russian nostalgia for empire is dangerous and ill fated Dreams of returning to another era are illusory Attempts to do so will lead to defeat Gaidar uses world history the Soviet experience and economic analysis to demonstrate why swimming against this tide of history would be a huge mistake The USSR sowed the seeds of its own economic destruction and Gaidar worries that Russia is repeating some of those mistakes Once again for example the nation is putting too many eggs into one basket leaving the nation vulnerable to fluctuations in the energy market The Soviets had used revenues from energy sales to prop up struggling sectors such as agriculture which was so thoroughly ravaged by hyperindustrialization that the Soviet Union became a net importer of food When oil prices dropped in the 1980s that revenue stream diminished and dependent sectors suffered heavily Although strategies requiring austerity or sacrifice can be politically difficult Russia needs to prepare for such downturns and restrain spending during prosperous times Collapse of an Empire shows why it is imperative to fix the roof before it starts to rain and why so Гибель империи.
