The Reinvention of Development Banking in the European Union Daniel Mertens, Matthias Thiemann, Peter Volberding, 2021-01-21 National development banks NDBs have transformed from outdated relics of national industrial policy to central pillars of the European Union s economic project This trend which accelerated after the Financial Crisis of 2007 has led to a proliferation of NDBs with an expanded size and scope However it is surprising that the EU which has championed market oriented governance and strict competition policy has actually advocated for an expansion of NDBs This book therefore asks Why has the EU supported an increased role for NDBs and how can we understand the dynamics between NDBs and European incentives and constraints To answer these questions the contributing authors analyze the formation and evolution of a field of development banking within the EU identifying a new field around an innovative conceptualization of state backed financing for the purposes of policy implementation Yet rather than focusing solely on

national development banks the authors instead broaden the focus to the entire ecosystem of the field of development banking which includes political institutions both in Brussels and in the member states financing vehicles such as the Juncker Plan regulatory bodies Directorate General for Competition Directorate General for Economic and Financial Affairs and commercial actors Seven in depth case studies on European NDBs along with three chapters on European level actors detail this field of development banking and answer the questions of when where and how development banking occurs within the EU
