Time to (Re-)integrate Dissociation into Psychoanalytic Psychotherapy? Paul Cundy, Golan Shahrar, 2025-03-28 This book brings together contributions from leading authors in the field of dissociation to facilitate the pursuit of integrative clinical scholarship connecting psychoanalytic thinking and practice with dissociation research and treatment Dissociation is not merely altered consciousness it is an attack on consciousness on memory identity and goal directed action The attempts by early psychoanalytic theorists to grapple with this clinical entity were marred by the very same frustration evinced by contemporary descriptive psychopathologists who were faced with understanding the similarities and differences between dissociative symptoms and disorders and other types of psychopathologies The DSM V and ICD 11 categorize at least six dissociative disorders Some of these diagnoses have provoked controversy and skepticism Whilst many if not most clinicians will have encountered various forms of dissociative psychopathology Dissociative Identity Disorder remains an elusive and contested presentation Perhaps in parallel to the disorder itself it continues to be challenging for theorists and clinicians to view the field as a whole and contain the disagreements contradictions and paradoxes This book will be of use to researchers and students of clinical psychology psychiatry and psychotherapy The chapters in this book were originally published as a special issue of Psychoanalytic Psychotherapy
