Global Perspectives on Research, Theory, and Practice Philip Brownell, 2015-04-01 Over a decade in the making this volume brings together some of the richest thinking about gestalt therapy theory and practice that emerged in the lead up to the 21st century In 1996 the internet was breaking out of its shell and the first electronic journal for gestalt therapy appeared as a hybrid of the text based discussion group Gstalt L and the graphically rich web based journal itself The journal supported by a community at St Johns University was titled Gestalt Its vision was to stimulate a global discussion of gestalt therapy using the electronic medium that has now become so common and essential and it did just that Gestalt was free It was quick Those working with the journal were focused on substance over style The editors have ensured this relevant and playful attitude shines through in this collection There are errors in form because the editors have maintained many in order to provide a realistic feel for what the journal was like Although it no longer exists this book reclaims the journal s great historical value and still significant ideas **Methods in Social Neuroscience** Eddie Harmon-Jones, Jennifer S.

Perspectives Claudia Navarini, Blaine Fowers, Juan Andrés Mercado, Angelo Panno, Pía Valenzuela, 2025-04-01 Several authors i e Scheler Arnold Goldie Keltner and Ekman agree that traditionally in the history of Western thought emotions have been seen as enemies of rationality and disruptive of cooperative social relations However emotions guide our perceptions of the world our memories of the past and even our moral judgments of right and wrong most typically in ways that enable effective responses to the current situation For example studies find that when we are angry we are acutely attuned to what is unfair which helps animate actions that remedy injustice Emotions structure not just colour diverse social interactions

such as attachment between parents and children flirtations and negotiations between rivals Thus emotions organize rather than disrupt rational thinking According to Arnold positive or negative we need to deal with emotions We need to think about them and what they tell us As Williams poses the moral significance of emotions reveals how fact and value come together in the moral agent Human beings capacity for ethics arises from the intersection between reason and emotion

International Perspectives on Individual Differences R. J. Riding, Stephen Rayner, 2000-01-06 The first volume in the series considers cognitive style which may well prove to be the missing link in the study of individual differences The purpose of the book is to reflect academic debate focusing on key models of style *The Oxford Handbook of the Five Factor Model* Thomas A. Widiger, 2017 There is a vast body of research supporting the Five Factor Model as the predominant model of general personality structure within the field of social psychology The Oxford Handbook of the Five Factor Model is dedicated to this model of research
