Signs In Law - A Source Book Jan M. Broekman,Larry Catá Backer,2014-11-06 This volume provides a critical roadmap through the major historical sources of legal semiotics as we know them today The history of legal semiotics now at least a century old has never been written a non event itself pregnant with semiotic possibility As a consequence its sources are seldom clearly exposed and as word object and meaning change are sometimes lost They reach from an English translation of the 1916 inaugural lecture of

the first Chair in Legal Significs at the Amsterdam University via mid 20th century studies on property or contract to equally fascinating essays on contemporary semiotic problems produced by former students of the Roberta Kelson Semiotics Roundtable Seminar at Penn State University 2012 and 2013 Together the materials in this book weave the fabric of semiotics and significs two names for the unfolding of semiotics in law and legal discourse at least until the second half of the 20th century and both of which covered a lawyer s focus on sign and meaning in law The latter is embedded within the cultural imperatives of the civilization that gave these terms meaning and made them an effective tool for the dissection of law its reconstitution as an instrument to be used by the lawyer to advance the interests of her clients and for judges as a means to restructure language as a narrative of law whose power could bend behavior to its strictures Legal semiotics has become an indispensable part of the elite lawyer s toolkit and a fundamental approach to analysis of legal texts Two previous volumes published in 2011 and 2012 explored the conceptual methodological and epistemological progress in the field of legal semiotics the modern forms of semiotics study and the mechanics of meaning making processes by lawyers Yet the great lessons of semiotics requires a focus on the origins of the concepts and frameworks that would become contemporary legal semiotics its origins as an object of the consciousness of meaning making one whose roots as lessons for the oracular conversations of law are expanded in this volume

A History of Israel John Bright,2000-01-01 A definitive text and resource for every student of the Old Testament this fourth edition of John Bright's now classic work is newly introduced by William P Brown

The Founding of Modern States Richard Franklin Bensel,2022-11-03 The Founding of Modern States is a bold comparative work that examines the rise of the modern state through six case studies of state formation The book opens with an analysis of three foundings that gave rise to democratic states in Britain the United States and France and concludes with an evaluation of three formations that birthed non democratic states in the Soviet Union Nazi Germany and the Islamic Republic of Iran Through a comparative analysis of these governments the book argues that new state formations are defined by a metaphysical conception of a will of the people through which the new state is ritually granted sovereignty The book stresses the paradoxical nature of modern foundings characterized by mythological imaginations or the symbolic acts and rituals upon which a state is enabled to secure political and social order An extensive study of some of the most important events in modern history this book offers readers novel interpretations that will disrupt common narratives about modern states and the state of our modern world

Reconsidering Islam in a South Asian Context M. Reza Pirbhai,2009-09-30 Despite late reconsideration a dominant paradigm rooted in Orientalist essentialisations of Islam as statically legalistic and Muslims as uniformly transgressive when local customs are engaged continues to distort perspectives of South Asia's past and present This has led to misrepresentations of pre colonial Muslim norms and undue emphasis on colonial reforms alone when charting the course to post coloniality This book presents and challenges staple perspectives with a comprehensive reinterpretation of doctrinal sources literary expressions and colonial records spanning the period from the reign of the Great Mughals to end of the British Raj 1526 1947 The result is an alternative vision of this transformative period in South Asian history and an original paradigm of Islamic doctrine and Muslim practice applicable more broadly

Franks and Alamanni in the Merovingian Period Ian N. Wood,1998 The Alamans were early victims of post Roman

expansion of the Frankish empire These studies consider both races from historical archaeological and linguistic perspectives from the 3rd to the 6th centuries **The Law Times**, 1901 Dynamics of Identity in the World of the Early Christians Philip A. Harland, 2009-11-19 This study sheds new light on identity formation and maintenance in the world of the early Christians by drawing on neglected archaeological and epigraphic evidence concerning associations and immigrant groups and by incorporating insights from the social sciences The study's unique contribution relates in part to its interdisciplinary character standing at the intersection of Christian Origins Jewish Studies Classical Studies and the Social Sciences It also breaks new ground in its thoroughly comparative framework giving the Greek and Roman evidence its due not as mere background but as an integral factor in understanding dynamics of identity among early Christians This makes the work particularly well suited as a text for courses that aim to understand early Christian groups and literature including the New Testament in relation to their Greek Roman and Judean contexts Inscriptions pertaining to associations provide a new angle of vision on the ways in which members in Christian congregations and Jewish synagogues experienced belonging and expressed their identities within the Greco Roman world The many other groups of immigrants throughout the cities of the empire provide a particularly appropriate framework for understanding both synagogues of Judeans and groups of Jesus followers as minority cultural groups in these same contexts Moreover there were both shared means of expressing identity including fictive familial metaphors and peculiarities in the case of both Jews and Christians as minority cultural groups who like other foreigners were sometimes characterized as dangerous alien anti associations By paying close attention to dynamics of identity and belonging within associations and cultural minority groups we can gain new insights into Pauline Johannine and other early Christian communities The Making of Jewish Universalism Malka Simkovich, 2016-12-12 This book explores two kinds of universalist thought that circulated among Jews in the Greco Roman world The first which is founded on the idea that all people may worship the One True God in an engaged and sustained manner originates in biblical prophetic literature The second which underscores a common ethic that all people share arose in the second century bce This study offers one definition of Jewish universalism that applies to both of these types of universalist thought universalist literature presumes that all people regardless of religion and ethnicity have access to a relationship with the Israelite God and the benefits promised to those loyal to this God without demanding that they participate in the Israelite community as a Jew This book opens with an exploration of four types of relationships between Israelites and non Israelites in biblical prophetic literature Israel as Subjugators Israel as Standard Bearers Naturalized Nations and Universalized Worship In all of these relationships the foreign nations will acknowledge the One True God but it is only the Universalized Worship model that offers a truly universalist vision of the end time The second section of this book examines how these four relationship models are expressed in Second Temple literature and the third section studies late Second Temple texts that employ a second kind of universalist thought that emphasizes ethical behavior This book closes with the suggestion that Ethical

Universalist ideas expressed in late Second Temple texts reflect exposure to Stoic thinkers who were developing universalist ideas in the second century BCE
