Online Static Evolutive Treaty Interpretation Reconstruction:

Static and Evolutive Treaty Interpretation Christian Djeflal, 2016 How should international treaties be interpreted over time This book addresses what evolutive interpretation looks like in reality **Intertemporal Linguistics in International Law** Julian Wyatt, 2019-12-12 Intertemporal Linguistics in International Law examines and offers an overdue solution to a specific problem central to the resolution of an ever increasing number of international legal disputes how to interpret a treaty with terms that change in meaning over time A wide ranging review of the relevant international case law and scholarship reveals that no rule principle or authority of international law including even the oft cited evolutionary interpretation doctrine provides international adjudicators with the firm and practical guidance on this specific question that contemporary international litigants demand Using an analytical approach inspired by the comparative method and drawing on specific concepts from external fields including private law legal theory and principally modern day linguistics Intertemporal Linguistics in International Law restructures the most relevant international case law around a new conceptual framework that offers fresh insight into the process of treaty interpretation It demonstrates that by distinguishing between resolving ambiguity and resolving vagueness and by identifying the temporal sense intention with which a treaty term is used international adjudicators can avail themselves of a more predictable and appropriate method for solving this complex and practically important problem of international law The Democratization of Artificial Intelligence Andreas Sudmann, 2020-03-03 After a long time of neglect Artificial Intelligence is once again at the center of most of our political economic and socio cultural debates Recent advances in the field of Artificial Neural Networks have led to a renaissance of dystopian and utopian speculations on an AI rendered future Algorithmic technologies are deployed for identifying potential terrorists through vast surveillance networks for producing sentencing guidelines and recidivism risk profiles in criminal justice systems for demographic and psychographic targeting of bodies for advertising or propaganda and more generally for automating the analysis of language text and images Against this background the aim of this book is to discuss the heterogenous conditions implications and effects of modern AI and Internet technologies in terms of their political dimension What does it mean to critically investigate efforts of net politics in the age of machine learning algorithms
