Online Ethical Economy Rebuilding Value Crisis:

The Ethical Economy Adam Arvidsson, Nicolai Peitersen, 2013-07-23 A new more balanced system of economic production and wealth distribution that fundamentally rethinks the definition of value **The Ethical Economy** Adam

Arvidsson, Nicolai Peitersen, 2013-09-03 A more ethical economic system is now possible one that rectifies the crisis spots of our current downturn while balancing the injustices of extreme poverty and wealth Adam Arvidsson and Nicolai Peitersen a scholar and an entrepreneur outline the shape such an economy might take identifying its origins in innovations already existent in our production valuation and distribution systems Much like nineteenth century entrepreneurs philosophers bankers artisans and social organizers who planned a course for modern capitalism that was more economically efficient and ethically desirable we now have a chance to construct new instruments institutions and infrastructure to reverse the trajectory of a quickly deteriorating economic environment Considering a multitude of emerging phenomena Arvidsson and Peitersen show wealth creation can be the result of a new kind of social production and the motivation of continuous capital accumulation can exist in tandem with a new desire to maximize our social impact Arvidsson and Peitersen argue that financial markets could become a central arena in which diverse ethical concerns are integrated into tangible economic valuations They suggest that such a common standard has already emerged and that this process is linked to the spread of social media making it possible to capture the sentiment of value to most people They ultimately recommend how to build upon these developments to initiate a radical democratization of economic systems and the value decisions they generate

Qualitative Research in Digital Environments Alessandro Caliendo, Alessandro Gandini, 2016-12-08 This book offers a toolkit of methods and technologies to undertake qualitative research on digital spaces Unlike commonly used traditional methodological strategies which are retrofitted to digital spaces *Qualitative Research in Digital Environments* offers researchers a set of digitally native tools that are designed for online social environments Thanks to a broad range of cases including Louis Vuitton YouTube and the concept of hipsterism this text illustrates the practical applications of techniques and tools over the most popular social media environments This book will be a valuable guide to qualitative research for marketing students researchers and practitioners as well as a central reference point for tutors in the growing field of Digital Sociology *Handbook of the Sharing Economy* Russell W. Belk, Giana M. Eckhardt, Fleura Bardhi, With the radical growth in the ubiquity of digital platforms the sharing economy is here to stay This Handbook explores the nature and direction of the sharing economy interrogating its key dynamics and evolution over the past decade and critiquing its effect on society

Big Data and Innovation in Tourism, Travel, and Hospitality Marianna Sigala, Roya Rahimi, Mike Thelwall, 2019-02-26 This book brings together multi disciplinary research and practical evidence about the role and exploitation of big data in driving and supporting innovation in tourism It also provides a consolidated framework and roadmap summarising the major issues that both researchers and practitioners have to address for effective big data innovation The book proposes a process based

model to identify and implement big data innovation strategies in tourism This process framework consists of four major parts 1 inputs required for big data innovation 2 processes required to implement big data innovation 3 outcomes of big data innovation and 4 contextual factors influencing big data exploitation and advances in big data exploitation for business innovation

Online File Sharing Jonas Andersson Schwarz, 2013-09-05 It is apparent that file sharing on the Internet has become an emerging norm of media consumption especially among young people This book provides a critical perspective on this phenomenon exploring issues related to file sharing downloading peer to peer networks piracy and not least policy issues regarding these practices Andersson Schwarz critically engages with the justificatory discourses of the actual file sharers taking Sweden as a geographic focus By focusing on the example of Sweden home to both The Pirate Bay and Spotify he provides a unique insight into a mentality that drives both innovation and deviance and accommodates sharing in both its unadulterated and its compliant business friendly forms

Enterprising Initiatives in the Experience Economy Britta Timm Knudsen, Dorthe Refslund Christensen, Per Blenker, 2014-09-19 Over the last decade the close relationship between culture and economy or the experience economy has risen on the agenda Although there is an established research field for analysing the economic impact of entrepreneurship there is currently a limited amount of research that analyses the cultural impact and opportunity of entrepreneurship Linking experience economy with enterprising behavior moves the term away from businesses competitiveness and consumer behavior towards a more value focused business in general This ground breaking book integrates entrepreneurship and empowerment into one central theme drawing on research from both the social sciences innovation entrepreneurship empowerment and activism and the humanities participatory culture user generated designs creative networks Enterprising Initiatives expands the definition of entrepreneurship beyond a primarily economic profit seeking phenomenon to a broader understanding of enterprising behaviour based on an individual opportunity nexus Beyond social entrepreneurship it explores a broad range of individual collective and cooperative citizen initiatives under the umbrella of enterprising action This innovative approach will be of great interest to scholars in entrepreneurship social entrepreneurship cultural entrepreneurship cultural studies and consumer culture as well as for policy makers in public and local government regional development and cultural event management

Culture and Economy in the Age of Social Media Christian Fuchs, 2015-01-09 Understanding social media requires us to engage with the individual and collective meanings that diverse stakeholders and participants give to platforms It also requires us to analyse how social media companies try to make profits how and which labour creates this profit who creates social media ideologies and the conditions under which such ideologies emerge In short understanding social media means coming to grips with the relationship between culture and the economy In this thorough study Christian Fuchs one of the leading analysts of the Internet and social media delves deeply into the subject by applying the approach of cultural materialism to social media offering readers theoretical concepts contemporary examples and proposed opportunities for political

intervention Culture and Economy in the Age of Social Media is the ultimate resource for anyone who wants to understand culture and the economy in an era populated by social media platforms such as Twitter Facebook and Google in the West and Weibo Renren and Baidu in the East Updating the analysis of thinkers such as Raymond Williams Karl Marx Ferruccio Rossi Landi and Dallas W Smythe for the 21st century Fuchs presents a version of Marxist cultural theory and cultural materialism that allows us to critically understand social media s influence on culture and the economy *The Commons* Vangelis Papadimitropoulos,2020-10-20 This book explores the potential creation of a broader collaborative economy through commons based peer production P2P and the emergent role of information and communication technologies ICTs The book seeks to critically engage in the political discussion of commons based peer production which can be classified into three basic arguments the liberal the reformist and the anti capitalist This book categorises the liberal argument as being in favour of the coexistence of the commons with the market and the state Reformists on the other hand advocate for the gradual adjustment of the state and of capitalism to the commons while anti capitalists situate the commons against capitalism and the state By discussing these three viewpoints the book contributes to contemporary debates concerning the future of commons based peer production Further the author argues that for the commons to become a fully operational mode of peer production it needs to reach critical mass arguing that the liberal argument underestimates the reformist insight that technology has the potential to decentralise production thereby forcing capitalism to transition to post capitalism Surveying the three main strands of commons based peer production this book makes the case for a post capitalist commons orientated transition that moves beyond neoliberalism **The Creative Citizen Unbound** Ian Hargreaves,John Hartley,2016-04-06 This timely book explores the nature and value of creative citizenship in our age of digital communication and social media A stellar roster of contributors addresses the crucial question of what the place of creative citizenship is in the struggle to remake democratic institutions and procedures in ways that can take full advantage of the tools and connections made available through online social communications Working Time, Knowledge Work and Post-Industrial Society A. O'Carroll,2015-03-16 We are living in the age of imagination and communication This book about the new ways time is experienced and organised in post industrial workplaces argues that the key feature of working time within knowledge and other workplaces is unpredictability creating a culture that seeks to insert acceptance of unpredictability as a new standard *The Reputation Economy* Alessandro Gandini,2016-06-02 Exploring the new professional scenes in digital and freelance knowledge this innovative book provides an account of the subjects and cultures that pertain to knowledge work in the aftermath of the creative class frenzy Including a broad spectrum of empirical projects The Reputation Economy documents the rise of freelancing and digital professions and argues about the central role held by reputation within this context offering a comprehensive interpretation of the digital transformation of knowledge work The book shows how digital technologies are not simply intermediating productive and organizational processes allowing new ways for supply and

demand to meet but actually enable the diffusion of cultural conceptions of work and value that promise to become the new standard of the industry *The Handbook of Digital Labor* Jack Linchuan Qiu, Shinjoung Yeo, Richard Maxwell, 2025-04-29 Provides a global perspective on labor and technology exploring resistance solidarity and alternatives in digital capitalism The Handbook of Digital Labor critically examines how digital technologies are reshaping work and employment around the globe Bridging historical and contemporary perspectives this timely volume explores the dynamics of labor within digital capitalism using a critical framework that illuminates the systemic challenges faced by workers across diverse sectors Dozens of contributing authors address key challenges including surveillance inequality and environmental exploitation while highlighting innovative forms of resistance and organizing Organized into four sections Working Class Resistance Digital Capitalism and Alternatives Laboring under Digital Capitalism and Theorizing Digital Labor the Handbook offers a nuanced understanding of how workers navigate the intersection of technological advancement and capitalist development In depth chapters cover topics ranging from platform work to AI driven labor processes shedding light on the realities of digital labor Equipping readers with the tools to critically engage with labor struggles across diverse industries and geographies the Handbook of Digital Labor Offers interdisciplinary insights from leading scholars in media communication labor studies political economy as well as unionists activists and other on the ground practitioners Presents both historical and contemporary analyses of labor conditions under digital capitalism Advocates for actionable strategies to empower labor movements and build equitable and sustainable alternatives Features real world case studies of worker resistance and solidarity across platforms and industries Emphasizing both theory and praxis the Handbook of Digital Labor is ideal for advanced undergraduate and graduate students junior faculty and researchers in media studies labor sociology and public policy It is a vital resource for courses on digital labor political economy and social change within communications and technology programs Labor organizers policymakers and industry professionals will find it an indispensable guide to navigating the complexities of work in the digital age **Global Media, Biopolitics, and Affect** Britta Timm

Knudsen, Carsten Stage, 2014-12-05 *Global Media Biopolitics and Affect* shows how mediations of bodily vulnerability have become a strong political force in contemporary societies In discussions and struggles concerning war involvement healthcare issues charity democracy movements contested national pasts and climate change performances of bodily vulnerability is increasingly used by citizens to raise awareness create sympathy encourage political action and to circulate information in global media networks The book thus argues that bodily vulnerability can serve as a catalyst for affectively charging and disseminating particular political events or issues by means of media To investigate how when and why that happens and to evaluate the long term social impacts of mediating bodily vulnerability the book offers a theoretical framework for understanding the role of bodily vulnerability in contemporary digital media culture Likewise it presents a range of close empirical case studies in the areas of illness blogging global protests after the killing of Neda Agda Soltan in

Routledge Handbook of Food as a Commons Jose Luis Vivero-Pol, Tomaso Ferrando, Olivier De Schutter, Ugo Mattei, 2018-12-17 From the scientific and industrial revolution to the present day food an essential element of life has been progressively transformed into a private transnational mono dimensional commodity of mass consumption for a global market But over the last decade there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective Chapters do not define the notion of commons but engage with different schools of thought the economic approach based on rivalry and excludability the political approach recognizing the plurality of social constructions and incorporating epistemologies from the South the legal approach that describes three types of proprietary regimes private public and collective and different layers of entitlement bundles of rights and the radical activist approach that considers the commons as the most subversive coherent and history rooted alternative to the dominant neoliberal narrative These schools have different and rather diverging epistemologies vocabularies ideological stances and policy proposals to deal with the construction of food systems their governance the distributive implications and the socio ecological impact on Nature and Society The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings

Handbook of Research on Advanced Research Methodologies for a Digital Society Punziano, Gabriella, Delli Paoli, Angela, 2021-09-03 Doing research is an ever changing challenge for social scientists This challenge is harder than ever today as current societies are changing quickly and in many sometimes conflicting directions Social phenomena personal interactions and formal and informal relationships are becoming more borderless and disconnected from the anchors of the offline reality These dynamics are heavily marking our time and are suggesting evolutionary challenges in the ways we know interpret and analyze the world Internet and computer mediated communication CMC is being incorporated into every aspect of daily life and social life has been deeply penetrated by the internet This is due to recent technological developments that increase the scope and range of online social spaces and the forms and time of participation such as Web 2 0 which widened the opportunities for user generated content the emergence of an internet of things and of ubiquitous mobile devices that make it possible to

always be connected This implies an adjustment to epistemological and methodological stances for conducting social research and an adaption of traditional social research methods to the specificities of online interactions in the digital society The Handbook of Research on Advanced Research Methodologies for a Digital Society covers the different strands of methods most affected by the change in a digital society and develops a broader theoretical reflection on the future of social research in its challenge to always be fitting suitable adaptable and pertinent to the society to be studied The chapters are geared towards unlocking the future frontiers and potential for social research in the digital society They include theoretical epistemological and ontological reflections about the digital research methods as well as innovative methods and tools to collect analyze and interpret data This book is ideal for social scientists practitioners librarians researchers academicians and students interested in social research methodology and its developments in the digital scenario **Collaborative**

Production in the Creative Industries James Graham,Alessandro Gandini,2017-06-29 In recent years research into creative labour and cultural work has usually addressed the politics of production in these fields but the sociotechnical and aesthetic dimensions of collaborative creative work have been somewhat overlooked This book aims to address this gap Through case studies that range from TV showrunning to independent publishing from the film industry to social media platforms such as Tumblr and Wattpad this collection develops a critical understanding of the integral role collaboration plays in contemporary media and culture It draws attention to diverse kinds of creative collaboration afforded via the intermediation of digital platforms and networked publics It considers how these are incorporated into emergent market paradigms and investigates the complicated forms of subjectivity that develop as a consequence But it also acknowledges historical continuities not least in terms of the continued exploitation of support personnel and of resulting artistic conflicts but also of alternative models that resist the precarious nature of contemporary cultural work Finally this volume attempts to situate creative collaboration in broader social and economic contexts where the experience and outcomes of such work have proved more problematic than the rich potential of their promise would lead us to expect **Peer to Peer** Michel

Bauwens,Vasilis Kostakis,Alex Pazaitis,2019-03-20 Not since Marx identified the manufacturing plants of Manchester as the blueprint for the new capitalist society has there been a more profound transformation of the fundamentals of our social life As capitalism faces a series of structural crises a new social political and economic dynamic is emerging peer to peer What is peer to peer Why is it essential for building a commons centric future How could this happen These are the questions this book tries to answer Peer to peer is a type of social relations in human networks as well as a technological infrastructure that makes the generalization and scaling up of such relations possible Thus peer to peer enables a new mode of production and creates the potential for a transition to a commons oriented economy Internet Science Franco Bagnoli,Anna Satsiou,Ioannis Stavrakakis,Paolo Nesi,Giovanna Pacini,Yanina Welp,Thanasiss Tiropanis,Dominic DiFranzo,2016-08-24 This book constitutes the proceedings of the Third International Conference on Internet Science held in Florence Italy in

September 2016 The 25 papers presented were carefully reviewed and selected for inclusion in this volume They were organized in topical sections named collective awareness and crowdsourcing platforms collaboration privacy and conformity in virtual social environments internet interoperability freedom and data analysis smart cities and sociotechnical systems
