Online Thunder East Nazi Soviet 1941 1945 Modern:

Warlord Hitler Alan Donohue, 2023-10-24 This book is a study of Adolf Hitler in his role as military commander and strategist from the beginning of the Second World War until the end of 1942 examining in detail the campaign in southern Russia that year The thesis challenges the post war narrative of Hitler as a dilettante who was solely responsible for the strategic and operational errors that led to Germany's defeat in the war Instead this research highlights that decisions made by Hitler with respect to such disparate themes as strategy operations logistics intelligence economics air and naval power and coalition warfare were generally sound if viewed from his perspective even if they were not ultimately successful It also gives an overview of his own ideas concerning all aspects of military affairs such as intelligence command and morale The careful analysis of Hitler's decision making process offers a unique contribution to Second World War scholarship and moves beyond a superficial understanding that the war's outcome was a result of Hitler's ineptitude as a military leader *Warlord Hitler* will appeal to postgraduates and specialists in military history as well as general readers interested in a deeper study of the Second World War

Disputed Decisions of World War II Mark Thompson, 2020-01-17 A former Harvard professor of decision science and game theory draws on those disciplines in this review of controversial strategic and tactical decisions of World War II Allied leaders although outstanding in many ways sometimes botched what now is termed meta decision making or deciding how to decide Operation Jubilee a single division raid on Dieppe France in August 1942 for example illustrated the pitfalls of groupthink In the Allied invasion of North Africa three months later American and British leaders fell victim to the planning fallacy having unrealistically rosy expectations of an easy victory In Sicily in the summer of 1943 they violated the millennia old principle of command unity now re endorsed and elaborated on by modern theorists Had Allied strategists understood the game theory of bluffing in January 1944 they might well not have landed two plus divisions at Anzio in Italy

Enemy in the East Rolf-Dieter Müller, 2014 Operation Barbarossa Hitler's invasion of the Soviet Union in 1941 led to one of the most brutal campaigns of World War II of the estimated 70 million people who died in World War II over 30 million died on the Eastern Front Although it has previously been argued that the campaign was a pre emptive strike in fact Hitler had been planning a war of intervention against the USSR ever since he came to power in 1933 Using previously unseen sources acclaimed military historian Rolf Dieter Muller shows that Hitler and the Wehrmacht had begun to negotiate with Poland and had even considered an alliance with Japan soon after taking power Despite the signing of the Molotov

Ribbentrop Pact at the declaration of war in September 1939 military engagement with the Red Army was still a very real and imminent possibility In this book Muller takes us behind the scenes of the Wehrmacht High Command providing a fascinating insight into an unknown story of World War II Bloomsbury Publishing The Campaign Against the Soviet Union, Northern Front, 1941-1945 Burkhart Mueller-Hillebrand, United States.
