Online Climate Change Capitalism Corporations Self Destruction:

Climate Change, Capitalism, and Corporations Christopher Wright, Daniel Nyberg, 2015-09-23 Climate change is one of the greatest threats facing humanity a definitive manifestation of the well worn links between progress and devastation This book explores the complex relationship that the corporate world has with climate change and examines the central role of corporations in shaping political and social responses to the climate crisis The principal message of the book is that despite the need for dramatic economic and political change corporate capitalism continues to rely on the maintenance of business as usual The authors explore the different processes through which corporations engage with climate change Key discussion points include climate change as business risk corporate climate politics the role of justification and compromise and managerial identity and emotional reactions to climate change Written for researchers and graduate students this book moves beyond descriptive and normative approaches to provide a sociologically and critically informed theory of corporate responses to climate change

Law, Fiction and Activism in a Time of Climate Change Nicole Rogers, 2019-08-14 The book examines the narratives of climate change which have developed and which are currently evolving in three areas law fiction and activism Narratives of climate change generated by litigants judges writers of fiction and activists are having and will have a profound effect on the way we respond to the climate change crisis Acknowledging the prevalence of unreliable narrators this book explores the reliability and significance of different forms of climate narrative The author analyses overlapping themes and points of intersection considering the recurrent motif of the trickster the prominence of the child the significance and ongoing viability of the rights discourse and the increasingly prevalent emergency framing with its multiple implications for law s empire She asks how law fiction and activism measure up as textual and performative fora for telling the story of climate change and anticipating a climate changed future And in addition how can they help foster transformative narratives which empower us to confront the climate change crisis This highly topical cross disciplinary work will be of interest to anyone concerned about the growing climate emergency and makes a valuable contribution to climate law environmental law the environmental humanities and ecocriticism

The Anthropology of Climate Change Hans A. Baer, Merrill Singer, 2018-04-19 In addressing the urgent questions raised by climate change this book provides a comprehensive overview of the anthropology of climate change guided by a critical political ecological framework It examines the emergence and slow maturation of the anthropology of climate change reviews the historic foundations for this work in the archaeology of climate change and presents three alternative contemporary theoretical perspectives in the anthropology of climate change This second edition is fully updated to include the most recent literature published since the first edition in 2014 It also examines a number of new topics including an analysis of the 2014 American Anthropological Association s Global Climate Change Task Force report a new case study on responses to climate change in developed societies and reference to the stance of the Trump administration on climate change Not only does this book provide a

valuable overview of the field and the key literature but it also gives researchers and students in Environmental Anthropology Climate Change Human Geography Sociology and Political Science a novel framework for understanding climate change that emphasizes human socioecological interactions Capitalism, Democracy, Socialism: Critical Debates Albena

Azmanova, James Chamberlain, 2022-09-07 This book critically analyzes the current historical conjuncture of neoliberal capitalism with an eye to its emergent alternatives Can democracy and capitalism thrive together Is socialism a viable and a desirable alternative What are the forms of emancipatory action and critical thought that can effectively chart a way forward Focusing on nine critical debates it provides a uniquely comprehensive overview of the tensions contradictions and latent emancipatory potential of contemporary global capitalism The specific debates are as follows capitalism's relationship with democracy privatization and governance of the commons the financialization of capitalism technology and the future of work varieties of neoliberal capitalism cosmopolitanism international development and human rights feminist theory and social solidarity sustainability and climate change and theories of capitalist crisis **The New Climate War** Michael E.

Mann, 2021-01-12 Shortlisted for the FT McKinsey Business Book of the Year award A renowned climate scientist shows how fossil fuel companies have waged a thirty year campaign to deflect blame and responsibility and delay action on climate change and offers a battle plan for how we can save the planet Recycle Fly less Eat less meat These are some of the ways that we've been told can slow climate change But the inordinate emphasis on individual behavior is the result of a marketing campaign that has succeeded in placing the responsibility for fixing climate change squarely on the shoulders of individuals Fossil fuel companies have followed the example of other industries deflecting blame think guns don't kill people people kill people or greenwashing think of the beverage industry's Crying Indian commercials of the 1970s Meanwhile they've blocked efforts to regulate or price carbon emissions run PR campaigns aimed at discrediting viable alternatives and have abdicated their responsibility in fixing the problem they've created The result has been disastrous for our planet In *The New Climate War* Mann argues that all is not lost He draws the battle lines between the people and the polluters fossil fuel companies right wing plutocrats and petrostates And he outlines a plan for forcing our governments and corporations to wake up and make real change including A common sense attainable approach to carbon pricing and a revision of the well intentioned but flawed currently proposed version of the Green New Deal Allowing renewable energy to compete fairly against fossil fuels Debunking the false narratives and arguments that have worked their way into the climate debate and driven a wedge between even those who support climate change solutions Combatting climate doomism and despair mongering With immensely powerful vested interests aligned in defense of the fossil fuel status quo the societal tipping point won't happen without the active participation of citizens everywhere aiding in the collective push forward This book will reach inform and enable citizens everywhere to join this battle for our planet **Ghost Criminology** Michael Fiddler, Theo Kindynis, Travis

Linnemann, 2022-01-18 Bringing together prominent early contributions from this emergent perspective the volume traces

the origins theory and methodology of a nascent ghost criminology From the powers of exorcism and erasure marshaled by state agents street level struggles over memorialization and memory to the lingering violence of crime scenes and the ghostly traces of outlaw artists Ghost Criminology is a book attuned to that which is well theorized in other disciplines the spectral hauntological apparitional Each of the writers assembled here shares as Mark Fisher 2017 put it a fascination for the outside that which lies beyond standard perception cognition and experience As such this collection uses cutting edge social and cultural theory to tangle with some of criminology s most stubborn revenants the politics of criminalization the commodification of crime and violence the haunting power of the image as well as the unheard and disregarded cries of the dead

Corporate Regulation for Climate Change Mitigation in Africa Kikelomo O. Kila, 2022-09-08 This book critically analyses the prospects of overhauling the legal framework of climate change regulation of corporations in African state It adopts the dilute interventionism regulatory framework to tackle the culture of regulatory resistance by corporations in Africa Over the course of this volume Kikelomo O Kila critiques the climate change legal framework in all 53 African states and conducts an in depth case study of the two largest economies in Africa Nigeria and South Africa to highlight the commonality of the problems in Africa and the potential for the dilute interventionism paradigm to significantly address these problems The book establishes why African states should directly intervene through legislative mechanisms to compel corporations to incorporate climate change mitigation in their business activities It proposes that this direct intervention should comprise a blend of prescriptive and facilitative mechanisms structured in a dilute interventionism regulatory model Overall this volume argues that implementing this model requires the institution of a strong and independent regulator with a veto firewall protection system that guarantees its de facto independence from government and external influences Corporate Regulation for Climate Change Mitigation in Africa will be of great interest to climate change stakeholders at the international regional and domestic levels policymakers regulatory practitioners and legal experts on corporate regulation It will also be an insightful resource for students and scholars of climate change and environmental law policy and governance

Climate Changed Daniel Briggs, 2020-11-29 Climate Changed is an honest humane account about the rapid downsizing of the world s natural resources and the consequences this has for millions of people who year after year are displaced from their home countries because of politically instigated and economically justified war and conflict Based on interviews with 110 refugees who arrived into Europe from 2015 to 2018 and observations of refugee camps border crossings inner city slums social housing projects NGO and related refugee associations this book offers a moving insight into the refugee experience of leaving home crossing borders and settling in Europe Briggs sets this against the geopolitical and commercial enterprise that dismantled refugees countries in the international chase for wilting quantities of the world s natural resources At every point of their journey to their new lives and in the resettlement process the refugees are victimised and exploited as there is always money to be made from them Even if refugees labour is in demand there is a European social

climate of intolerance and stigma which jeopardises integration and counters their well being and safety The climate has changed This book will appeal to students and scholars in core areas of sociology environmental and sustainability studies human geography and politics Policymakers practitioners and voluntary workers within the sector of frontline immigration as well as aid workers town planners and welfare support staff will also find this book of interest How We Sold Our Future Jens Beckert,2024-11-25 For decades we have known about the dangers of global warming Nevertheless greenhouse gas emissions continue to increase How can we explain our failure to take the necessary measures to stop climate change Why are societies despite the mounting threat to ourselves and our children so reluctant to take action In this important new book Jens Beckert provides an answer to these questions Our apparent inability to implement basic measures to combat climate change is due to the nature of power and incentive structures affecting companies politicians voters and consumers Drawing on social science research he argues that climate change is an inevitable product of the structures of capitalist modernity which have been developing for the past 500 years Our institutional and cultural arrangements are operating at the cost of destroying the natural environment and attempts to address global warming are almost inevitably bound to fail Temperatures will continue to rise and social and political conflicts will intensify The tragic truth is we are selling our future for the next quarterly figures the upcoming election results and today s pleasure Any realistic climate policy needs to focus on preparing societies for the consequences of escalating climate change and aim at strengthening social resilience to cope with the increasingly unstable natural world Civil society is the only source of pressure that could build the necessary strength and support for climate protection *How We Sold Our Future* is a crucial intervention into the most pressing issue of our time
