Contracting Fear Khurram Dara, 2015-10-22 If you've ever read a news story about radical Islam you've probably seen sharia law mentioned. But for something that is becoming increasingly prevalent in political rhetoric it's hard to believe how little most people actually know about Islamic law. In this concise and instructive book Khurram Dara explains not only the history and origins of Islamic law but also the interesting role it has played in the politics of the Middle East and Middle America. Challenging the conventional wisdom that Islamic law is rigid and permanent, Dara argues that the political and cultural realities of its formation suggest otherwise and should change how Islamic law is thought of and discussed in both the East and the West. Combining religious history with legal analysis, *Contracting Fear* explains Islamic law in the context of the global political climate today.

Why the West Fears Islam J. Cesari, 2013-07-24 Jocelyne Cesari examines the idea that Islam might threaten the core values of the West through testimonies from Muslims in France, Germany, the United Kingdom, the Netherlands, and the US. Her book is an unprecedented exploration of Muslim religious and political life based on several years of field work in Europe and in the United States.

The Racial Muslim Sahar F. Aziz, 2021-11-30 This book demonstrates how race and religion intersect to create The Racial Muslim. Comparing discrimination against immigrant Muslims with that of Jews, Catholics, Mormons, and African American Muslims during the twentieth century, the author explores the gap between America's aspiration for and fulfillment of religious freedom.

Political Manipulation and Weapons of Mass Destruction Ben Cole, 2017-12-11 Concerns about CBRN (Chemical, Biological, Radioactive, Nuclear) weapons have featured prominently in both political debates and media reporting about the ongoing threat from al Qaeda since 9/11. This book provides a chronological account of al Qaeda's efforts to acquire a CBRN weapon capability and the evolution of the al Qaeda leadership's approach to actually using CBRN weapons set against the context of the politicisation of the threat of CBRN terrorism in US security debates. Ben Cole explores how the inherently political nature of terrorist CBRN threats has helped to shape al Qaeda's approach to CBRN weapons and shows how the heightened political sensitivities surrounding the threat have enabled some governments to manipulate it in order to generate domestic and international support for controversial policies, particularly the 2003 invasion of Iraq. He assesses the relative success of

the al Qaeda leadership's political approach to CBRN weapons together with the relative success of efforts by the US UK and Russian governments to exploit the al Qaeda CBRN threat for their wider political purposes Shedding new light on al Qaeda's tactics and strategy this book will be essential reading for scholars of terrorism and extremism studies *International Security and the United States* Paul Bellamy, Karl DeRouen Jr., 2007-12-30 Shaped by often very dramatic events international security and the international system have changed significantly in recent years The conclusion of the Cold War the emergence of new political systems the growth of significant threats such as terrorism and the development of new security doctrines have driven global transformation These volumes provide detailed information on countries from every geographic region and continent on the globe evaluating their relationship with the United States and measuring the potential security threats posed by each The contributors consider factors such as geography and history the political systems of each state their human rights records the ability to maintain law and order and provide security within their own borders the impact of current administrations rulers or regimes on a nation's foreign policy and the regional factors that often dictate local politics in order to make their assessments All of the entries in this set follow a standardized outline and present a concise but detailed assessment of each country Each entry begins with a discussion of geography through which the contributors identify the state's natural resources environmental issues and the extent of its territorial jurisdiction The focus then shifts to social and political organizations Populations are broken down by not only numbers but by ethnic and religious affiliations access to health care education housing and income All of those aspects are often a reflection of the system of government in place Like the United States those governments are comprised of different parties or leaders with various interests The contributors assess those entities and interests within each country They measure the ways in which factors of religion nationalism and globalism impact and shape not only domestic policies but also foreign policy and ultimately the country's relationship to the United States Other areas such as military organizations and activities records on human rights and justice recognition of and adherence to international conventions and national attitudes towards security are also considered Every entry also includes an assessment of current and potential security issues and an analysis of current terrorist threats that may already be in place or that are beginning to develop in various nations Each entry concludes with a summary of current relationships with the United States Those relationships are defined by the identification and brief analysis of formal trade aid or military treaties in place between the United States and other nations the general attitude of a nation's citizenry and its government towards the U S and finally identifying any social and cultural links between nations and the U S migration patterns language economies Finally possible changes and trends that will impact security issues are identified by the contributors Taken in their entirety these encyclopedias contain a wealth of information in a concise format that will serve as a valuable reference guide not only for specialists but general readers as well **The Oxford Handbook of American Islam** Yvonne Yazbeck Haddad, Jane I. The Construction and Rearticulation of Race in a Post-Racial America Christopher J. Metzler, 2008 In my view The Negro Problem in 2008 is part law part politics part oppression part internalized oppression and part ideology As America becomes more polarized into red states and blues states into liberals and conservatives into right left and even further into black and white racism has become even more pronounced if not more difficult to identify The Negro Problem of 2008 is helped along willingly by blacks whose sense of inferiority and internalized oppression so blind them that they too deal in oppressive and denigrating images for profits Working hand in hand with the white executives who profit from those images and the white liberals who justify this denigration they too add grist to the mill of oppression and exclusion Members of the American media have moved from reporting the news to advancing their opinions and discussing race in a roundabout way which they claim is race neutral but which is in fact race conscious How has their unfettered power defined the coverage of Barack Obama and Hillary Clinton in

the 2008 Democratic primary What role does rap music with its revival of the most vile and base stereotypes of black men from slavery and the Jim Crow era and its attendant culture of debauchery play in stoking racial subordination and domination Does the fact that so many rap artists are black provide them with the veritable black pass to lyrically and virtually debase and defile black women and themselves that whites by virtue of their whiteness are denied Diverse Narratives and Shared Beliefs Soumya Awasthi,2025-06-27 This book delves into the intricate tapestry of Deoband Islam in India Pakistan and Afghanistan Challenging simplistic narratives it unveils the nuanced reality of Deoband Islam revealing a diverse range of perspectives within the movement It illuminates the movement s historical social and philosophical dimensions It explores the movement s relationship with societal transformation and communal identity and its impact on the geopolitical dynamics of South Asia The book offers a distinctive perspective on the Deoband school of thought in Islam by systematically categorising it into three distinct regional variants each reflecting the unique socio political context of its environment The focus is on the Deoband school of thought a strand within Sunni Islam that adheres to the philosophical framework of Ashari Maturidi Critically examining its teachings uncovers the complexities and contradictions that shape Deobandi s thought challenging popular assumptions and providing a fresh understanding It also highlights the voices of Deobandi scholars and organisations who unequivocally denounce terrorism and actively work to counter radicalisation Acknowledging their efforts the book underscores the potential for dialogue and cooperation in promoting peace and understanding With its comprehensive approach and thought provoking analysis this book is essential for scholars policymakers political science departments theology sociology international relations security studies and South Asian studies

Militant Islam Stephen Vertigans,2008-10-30 Militant Islam provides a sociological framework for understanding the rise and character of recent Islamic militancy It takes a systematic approach to the phenomenon and includes analysis of cases from around the world comparisons with militancy in other religions and their causes and consequences The sociological concepts and theories examined in the book include those associated with social closure social movements nationalism risk fear and de civilising These are applied within three main themes characteristics of militant Islam multi layered causes and the consequences of militancy in particular Western reactions within the war on terror Interrelationships between religious and secular behaviour terrorism and counter terrorism popular support and opposition are explored Through the examination of examples from across Muslim societies and communities the analysis challenges the popular tendency to concentrate upon al Qa ida and the Middle East This book will be of interest to students of Sociology Political Science and International Relations in particular those taking courses on Islam religion terrorism political violence and related regional studies South Asia Defence And Strategic Year Book - 2009 General Deepak Kapoor,,AVSM PVSM, SM VSM Chief of Army Staff (India),2009 The third edition of the South Asia Defence and Strategic Year Book offers an analysis of defence economic and social issues that impact regional security in South Asia The wide ranging perspectives give

a deep insight into the factors and linkages that impact the emerging international relations of the region with particular emphasis on India which is an economic military and political powerhouse with an expanding footprint in the World South Asia is a region that is rife with geopolitics By virtue of its population and location it is a reflection of the challenges of the interconnected integrated and interdependent world Its security environment is relatively unsettled and is a reason for both hope and despair Its issues which have international as well as regional relevance have their own dynamics and trends that need a deeper understanding The Year Book aims to provide a comprehensive overview of the security environment in the region by focusing on an in depth analysis of military capabilities and strategic imperatives obtaining in the region Apart from outlining the general security environment detailed military balance trends in weapon systems and technology defence industry missile and nuclear capabilities and terrorism issues have been highlighted Growing strategic linkages and independence of nation states make it imperative to consider the region as a whole to incorporate a holistic approach The Year Book also contains studies on China and other Southeast Asian nations to that effect Thus the underlying theme of this publication is to enable understanding through information While the threat of terrorism remains at the forefront of most analyses the move towards popular and democratically elected governments in South Asia has not eclipsed the existing challenges to governance in all the countries of the region Poverty and economic disparities coupled with ethnic and social divisions have created political and social fault lines that have been exploited by non state actors with their own agendas Thus we hope to promote peace through understanding by delineating the issues of concern in the region

Religious Citizenship and Islamophobia Virginie Andre, Douglas Pratt, 2017-10-02 The attack on Charlie Hebdo in Paris in January 2015 once again brought to the fore the place of Islam in Western secular democracies and the questioning of Muslim citizenship The hyper mediatisation of jihadist terrorism and its subsequent conflation with Muslim communities in general has led to both an increase in widespread popular fear of Islam and its followers and the further marginalization and stigmatization of Muslim communities living in Western societies This book brings together a range of studies and reflections pertinent to the contemporary issues surrounding religious citizenship and Islamophobia Sentiments of insecurity and uncertainty which far right populist movements focus on are increasingly finding resonance among ordinary citizens Some

traditional political parties are now flirting with demagogic discourse with respect to matters Islamic to the point where there is a hardening within Western democracies manifested in the adoption of illiberal policies the narrowing of the conception of secularity and the alienation of a younger generation of Muslims Yet there can still be found both glimmers of hope and slivers of sanity This book was originally published as a special issue of *Islam and Christian Muslim Relations*
