Online Political Turbulence Social Collective Action:

Political Turbulence Helen Margetts, Peter John, Scott Hale, Taha Yasseri, 2017-09-05 How social media is giving rise to a chaotic new form of politics As people spend increasing proportions of their daily lives using social media such as Twitter and Facebook they are being invited to support myriad political causes by sharing liking endorsing or downloading Chain reactions caused by these tiny acts of participation form a growing part of collective action today from neighborhood campaigns to global political movements Political Turbulence reveals that in fact most attempts at collective action online do not succeed but some give rise to huge mobilizations even revolutions Drawing on large scale data generated from the Internet and real world events this book shows how mobilizations that succeed are unpredictable unstable and often unsustainable To better understand this unruly new force in the political world the authors use experiments that test how social media influence citizens deciding whether or not to participate They show how different personality types react to social influences and identify which types of people are willing to participate at an early stage in a mobilization when there are few supporters or signals of viability The authors argue that pluralism is the model of democracy that is emerging in the social media age not the ordered organized vision of early pluralists but a chaotic turbulent form of politics This book demonstrates how data science and experimentation with social data can provide a methodological toolkit for understanding shaping and perhaps even predicting the outcomes of this democratic turbulence

Digital Politics: Mobilization, Engagement and Participation Karolina Koc-Michalska, Darren G. Lilleker, 2018-08-09 This book discusses the implications of recent innovations in information and communication technology for civic and political engagement The international mix of contributions offers insights across a broad spectrum of studies into the form of engagement explaining the reasons incentives and motivations for engaging and the different forms and levels of engagement contrasting traditional and non traditional forms of engagement and how they interlink and asking why people utilize or avoid certain forms of engagement It is a must read for any scholar interested in the impact of social media on citizens propensity to get involved in political actions It depicts the role that parties organizations and peers play in mobilizing or demobilizing others and how online behaviour can act as a springboard into what might be called real world politics The book gathers together prominent scholars who offer their understanding of social and political phenomena and give theoretical and empirical insights into the highly complex questions around political participation in the digital age This book was originally published as a special issue of Political Communication

Society and the Internet Mark Graham, William H. Dutton, 2019-07-24 How is society being reshaped by the continued diffusion and increasing centrality of the Internet in everyday life and work Society and the Internet provides key readings for students scholars and those interested in understanding the interactions of the Internet and society This multidisciplinary collection of theoretically and empirically anchored chapters addresses the big questions about one of the most significant technological transformations of this century through a diversity of data methods theories

and approaches Drawing from a range of disciplinary perspectives Internet research can address core questions about equality voice knowledge participation and power By learning from the past and continuing to look toward the future it can provide a better understanding of what the ever changing configurations of technology and society mean both for the everyday life of individuals and for the continued development of society at large This second edition presents new and original contributions examining the escalating concerns around social media disinformation big data and privacy Following a foreword by Manuel Castells the editors introduce some of the key issues in Internet Studies The chapters then offer the latest research in five focused sections The Internet in Everyday Life Digital Rights and Human Rights Networked Ideas Politics and Governance Networked Businesses Industries and Economics and Technological and Regulatory Histories and Futures This book will be a valuable resource not only for students and researchers but for anyone seeking a critical examination of the economic social and political factors shaping the Internet and its impact on society

The Participation Gap Russell J. Dalton, 2017-10-13 The dilemma of democracy arises from two contrasting trends More people in the established democracies are participating in civil society activity contacting government officials protesting and using online activism and other creative forms of participation At the same time the importance of social status as an influence on political activity is increasing The democratic principle of the equality of voice is eroding The politically rich are getting richer and the politically needy have less voice This book assembles an unprecedented set of international public opinion surveys to identify the individual institutional and political factors that produce these trends New forms of activity place greater demands on participants raising the importance of social status skills and resources Civil society activity further widens the participation gap New norms of citizenship shift how people participate And generational change and new online forms of activism accentuate this process Effective and representative government requires a participatory citizenry and equal voice and participation trends are undermining these outcomes The Participation Gap both documents the growing participation gap in contemporary democracies and suggests ways that we can better achieve their theoretical ideal of a participatory citizenry and equal voice

Shifting Dynamics of Contention in the Digital Age Jun Liu, 2020 Over the past decades waves of political contention involving the use of information and communication technologies have swept across the globe The phenomenon stimulates the scholarship on digital communication technologies and contentious collective action to thrive as an exciting relevant but highly fragmentary and contested field with disciplinary boundaries To advance interdisciplinary understanding Shifting Dynamics of Contention in the Digital Age outlines a communication centered framework that articulates the intricate relationship between technology communication and contention It systematically explores the influence of mobile technology on political contention in China the country with the world's largest number of mobile and internet users Using first hand in depth interview and fieldwork data Shifting Dynamics of Contention in the Digital Age tracks the strategic choice of mobile phones as repertoires of contention illustrates the effective mobilization of mobile

communication on the basis of its strong and reciprocal social ties and identifies the communicative practice of forwarding officially alleged rumors as a form of everyday resistance Through this groundbreaking study *Shifting Dynamics of Contention in the Digital Age* presents a nuanced portrayal of an emerging dynamics of contention both its strengths and limitations through the embedding of mobile communication into Chinese society and politics *Mapping the Media and Communication Landscape of Central Asia* Elira Turdubaeva, Evangelia Papoutsaki, 2023-02-16 Central Asian post independence media and communication industries professional practices education persisting and evolving values and traditions remain critically understudied with a notable scarcity of research and scholarly publications on the complex and increasingly changing communicative ecology landscape of this region *Mapping the Media and Communication Landscape of Central Asia An Anthology of Emerging and Contemporary Issues* addresses this gap in literature by exploring analyzing and shedding light to the field practice research and critical inquiry of media and mass communication in four countries in Central Asia Kyrgyzstan Tajikistan Kazakhstan and Uzbekistan This book includes local authors as well as new and emerging researchers from this region to contextualize the issues explored and provide a supportive dialogue between different points of view *Analytic Activism* David Karpf, 2016-11-01 Among the ways that digital media has transformed political activism the most remarkable is not that new media allows disorganized masses to speak but that it enables organized activist groups to listen Beneath the waves of e petitions likes and hashtags lies a sea of data a newly quantified form of supporter sentiment and advocacy organizations can now utilize new tools to measure this data to make decisions and shape campaigns In this book David Karpf discusses the power and potential of this new analytic activism exploring the organizational and media logics that determine how digital inputs shape the choices that political campaigners make He provides the first careful analysis of how organizations like Change org and Upworthy com influence the types of political narratives that dominate our Facebook newsfeeds and Twitter timelines and how MoveOn org and its netroots peers use analytics to listen more effectively to their members and supporters As well he identifies the boundaries that define the scope of this new style of organized citizen engagement But also raising a note of caution Karpf identifies the dangers and limitations in putting too much faith in these new forms of organized listening **Cyber Peace** Scott J. Shackelford, Frederick Douzet, Christopher Ankersen, 2022-05-05 The international community is too often focused on responding to the latest cyber attack instead of addressing the reality of pervasive and persistent cyber conflict From ransomware against the city government of Baltimore to state sponsored campaigns targeting electrical grids in Ukraine and the U S we seem to have relatively little bandwidth left over to ask what we can hope for in terms of peace on the Internet and how to get there It s also important to identify the long term implications for such pervasive cyber insecurity across the public and private sectors and how they can be curtailed This edited volume analyzes the history and evolution of cyber peace and reviews recent international efforts aimed at promoting it providing recommendations for students practitioners and policymakers seeking an understanding of the

complexity of international law and international relations involved in cyber peace This title is also available as Open Access on Cambridge Core

Public Policy Research in the Global South Heike M. Grimm, 2019-04-10 This volume focuses on the evolution of public policy and the role of agenda setting with regard to policymaking in countries of the Global South The authors illustrate the emergence of public policy research as an academic discipline and highlight various aspects of history governance politics and economics as components of public policy theory development By offering a cross national perspective the papers contribute to a better understanding of when how and by whom a given policy agenda is designed which is essential to grasping how policy is implemented In turn the authors investigate how the development of public policy research has influenced policymaking in fields such as democratization migration corruption agriculture environment education and entrepreneurship and more specifically agenda setting in selected countries of the Global South

The Routledge Handbook to the Culture and Media of the Americas Wilfried Raussert, Giselle Liza Anatol, Sebastian Thies, Sarah Corona Berkin, 2020-03-02 Exploring the culture and media of the Americas this handbook places particular emphasis on collective and intertwined experiences and focuses on the transnational or hemispheric dimensions of cultural flows and geocultural imaginaries that shape the literature arts media and other cultural expressions in the Americas The Routledge Handbook to the Culture and Media of the Americas charts the pervasive asymmetrical flows of cultural products and capital and their importance in the development of the Americas The volume offers a comprehensive understanding of how inter American communication is constituted framed and structured and covers the artistic and political dimensions that have shaped literature art and popular culture in the region Forty six chapters cover a range of inter American key concepts and dynamics divided into two parts Literature and Music deals with inter American entanglements of artistic expressions in the Western Hemisphere including music dance literary genres and developments Media and Visual Cultures explores the inter American dimension of media production in the hemisphere including cinema and television photography and art journalism radio digital culture and issues such as freedom of expression and intellectual property This multidisciplinary approach will be of interest to a broad array of academic scholars and students in history sociology political science and cultural postcolonial gender literary globalization and media studies

The Web as History Niels Brügger, Ralph Schroeder, 2017-03-06 The World Wide Web has now been in use for more than 20 years From early browsers to today s principal source of information entertainment and much else the Web is an integral part of our daily lives to the extent that some people believe if it s not online it doesn t exist While this statement is not entirely true it is becoming increasingly accurate and reflects the Web s role as an indispensable treasure trove It is curious therefore that historians and social scientists have thus far made little use of the Web to investigate historical patterns of culture and society despite making good use of letters novels newspapers radio and television programmes and other pre digital artefacts This volume argues that now is the time to ask what we have learnt from the Web so far The 12 chapters explore this topic from a number of

interdisciplinary angles through histories of national web spaces and case studies of different government and media domains as well as an introduction that provides an overview of this exciting new area of research

Online Communities and Crowds in the Rise of the Five Star Movement Francesco Bailo, 2020-08-06 This book reflects on the political capacity of citizen users to impact politics explaining the danger in assuming that mass online participation has unconditionally democratising effects Focusing on the case of Italy's Five Star Movement the book argues that Internet participation is naturally unequal and without normative and strong design efforts Internet platforms can generate noisy undemocratic crowds instead of self reflexive norm bounded communities The depiction of a democratising Internet can be easily exploited by those who manage these platforms to sell crowds as deliberating publics As the Internet almost everywhere turns into the primary medium for political engagement it also becomes the symbol of what is wrong with politics Internet users experience unprecedented instantaneous and personalised access to information and communication and by comparison they feel a much stronger level of irrelevance in the existing political system

The Revolution That Wasn't Jen Schradie, 2019-05-01 In this counterintuitive study of digital democracy Jen Schradie shows how the web has become another weapon in the arsenal of the powerful and a potent weapon for conservative activists Rather than leveling the playing field the internet has tilted it in favor of the Right where only the most sophisticated and well funded players can compete

Stretching the Constitution Andrew Blick, 2019-03-07 How far did the European Union EU referendum result of 23 June 2016 really justify and necessitate the policies executed in response to it What are the implications of that vote and its prolonged aftermath for the United Kingdom UK constitution What other challenges does our political system face This book seeks to answer these questions It considers from a constitutional perspective the way in which the decision to leave the EU was taken and then implemented discussing in particular the role of Parliament It includes a close analysis of the referendum legislation and relevant Commons debates Adapting methods from applied history the author considers the wider implications of Brexit by assessing a series of proposals for constitutional reform produced in the UK since 1900 He addresses features of the UK system including referendums representative democracy Parliament devolution and the executive from both an historic and contemporary point of view The book assesses other issues that do not arise directly from Brexit but that have constitutional implications and a global aspect to them They include political applications of the Internet and climate change Finally the author makes a series of proposals for reforms that will help the democratic system of the UK to adapt to its changing environment

Digital Media, Political Polarization and Challenges to Democracy Maren Beaufort, 2020-06-29 This book assesses the interplay between social media political polarization and civic engagement focusing on countries with differing media environments cultural specifics and degrees of democratization Taken from a variety of disciplinary perspectives and based on innovative theoretical interventions and empirically grounded research the contributions to this volume share a common aspiration to understand the democratic character of the new and thus far

largely unknown media regime Such a regime has the potential to both enhance and undermine democracy in a time where the vulnerability of democracy is more obvious than ever before Featuring research from the USA Western Europe the Middle East and East Asia this book will be of interest to those studying recent political events in these regions as well as to those scholars of media studies whose research focuses on the inter relation of politics communication and the media This book was originally published as a special issue of Information Communication Society Contested Issues in Troubled Times Peter M. Magolda, Marcia B. Baxter Magolda, Rozana Carducci, 2023-07-03 Contested Issues in Troubled Times provides student affairs educators with frameworks to constructively think about and navigate the contentious climate they are increasingly encountering on campus The 54 contributors address the book's overarching question How do we create an equitable climate conducive to learning in a dynamic environment fraught with complexity and a socio political context characterized by escalating intolerance incivility and overt discrimination Rather than attempting to offer readers definitive solutions this book illustrates the possibilities and promise of acknowledging multiple approaches to addressing contentious issues articulating a persuasive argument anchored in professional judgment listening attentively to others for points of connection as well as divergence and drawing upon new ways of thinking to foster safe and inclusive campuses Among the issues this volume addresses are such topics as sexual violence historically underrepresented racial and ethnic groups transgender and undocumented students the professional skills knowledge and or dispositions needed to thrive and facilitate systemic change in contemporary higher education organizations the implications of maintaining personal and professional identities via social media and self care In this companion volume to Contested Issues in Student Affairs whose issues remain as relevant today as they were upon publication in 2011 a new set of contributors explore new questions which foreground issues of equity safety and civility themes which dominate today's higher education headlines and campus conversations The book concludes with calls to action encouraging student affairs educators to exhibit the moral courage needed to critically examine routine practices that unknowingly perpetuate inequity and enact the foundational values and principles upon which the student affairs profession was founded *The Making of White American Identity* Ron Eyerman, 2022-08-06 In *The Making of White American Identity* Ron Eyerman provides an explanation for how whiteness has become a basis for collective identification and collective action in the United States Drawing upon his previous work on the formation of African American Identity as well as cultural trauma theory collective memory and social movements Eyerman reveals how and under what conditions such a collective identification emerges how collective action around an ideology of whiteness and white superiority happens and considers the prospects of the ideology of white supremacy as a political force in the United States **Crowdsourced Politics** Ariadne Vromen, Darren Halpin, Michael Vaughan, 2022-08-18 This book focuses on online petitioning and crowdfunding platforms to demonstrate the everyday impact that digital communications have had on contemporary citizen participation In doing so the book argues that crowdsourced participation has become normalised and

institutionalised into the everyday repertoires of citizens and their organisations Within the digitally enabled shift in individual acts of participation creating signing and sharing online petitions and micro donations have become a focal point because of the clear evolution from their offline and online counterparts To illustrate their arguments the authors use an original nationally representative survey on acts of political engagement undertaken with Australian citizens Additionally through detailed interviews and analysis of their web presence they show how advocacy organisations use online petitions within their repertoire of strategic actions Lastly they analyse the kinds of policy issues that mobilise citizens on crowdsourcing platforms based on a unique dataset of 17 000 petitions from the popular non government platform Change org They contrast these mass public concerns with the policy agenda of the government of the day to show there is a disjuncture and general lack of responsiveness to this form of citizen expression *Chinese Social Media II* Xiaying

Xu,Mengmeng Zhao,May Ying Wang,2025-03-31 This book is the second of a two volume set that presents a contemporary analysis of Chinese digital platforms through an intercultural and interdisciplinary lens highlighting the complex nature of the online ecosystem The book provides an overview of the complex forces shaping the Chinese cyber landscape and their global digital implications drawing on cross cultural insights and spanning a range of academic disciplines The intercultural section explores the cross cultural potential of Chinese social media addressing intriguing questions such as why and how international influencers maintain a presence on Chinese social media platforms examining their motivations and communication strategies The interdisciplinary section studies the intersections of Chinese digital platforms with sociological studies linguistic analysis and artificial intelligence This volume is a valuable resource for academics and students in media and communication studies as well as social media researchers China studies enthusiasts industry professionals and anyone seeking a deeper understanding of Chinese social media dynamics **Four Internets** Kieron O'Hara,Wendy Hall,2021 Four Internets offers a revelatory new approach for conceptualizing the Internet and understanding the sometimes rival values that drive its governance and stability It unravels how tensions between the models play out across politics economics and technology ultimately debating whether these models can continue to co exist or what might happen if any fall away
