Ontology Engineering in a Networked World Mari Carmen

Suárez-Figueroa, Asunción Gómez-Pérez, Enrico Motta, Aldo Gangemi, 2012-03-23 The Semantic Web is characterized by the existence of a very large number of distributed semantic resources which together define a network of ontologies These ontologies in turn are interlinked through a variety of different meta relationships such as versioning inclusion and many more This scenario is radically different from the relatively narrow contexts in which ontologies have been traditionally developed and applied and thus calls for new methods and tools to effectively support the development of novel network oriented semantic applications This book by Su rez Figueroa et al provides the necessary methodological and technological support for the development and use of ontology networks which ontology developers need in this distributed environment After an introduction in its second part the authors describe the NeOn Methodology framework The book s third part details the key activities relevant to the ontology engineering life cycle For each activity a general introduction methodological guidelines and practical examples are provided The fourth part then presents a detailed overview of the NeOn Toolkit and its plug ins Lastly case studies from the pharmaceutical and the fishery domain round out the work The book primarily addresses two main audiences students and their lecturers who need a textbook for advanced undergraduate or graduate courses on ontology engineering and practitioners who need to develop ontologies in particular or Semantic Web based applications in general Its educational value is maximized by its structured approach to explaining guidelines and combining them with case studies and numerous examples The description of the open source NeOn Toolkit provides an additional asset as it allows readers to easily evaluate and apply the ideas presented

The Semantic Web Jorge Cardoso, Martin

Hepp, Miltiadis D. Lytras, 2007-09-28 This professional book provides a series of case studies which give examples of real benefits to be derived from the adoption of semantic web based ontologies in real world situations such as telecommunication B2B integration tourism education and more The book is designed to create platforms for bringing experts together key government representatives industry and academia from different countries and to compile the most recent use of semantics and ontologies

Ontology Matching Jérôme Euzenat, Pavel Shvaiko, 2007-06-15

Ontologies are viewed as the silver bullet for many applications but in open or evolving systems different parties can adopt different ontologies This increases heterogeneity problems rather than reducing heterogeneity This book proposes ontology matching as a solution to the problem of semantic heterogeneity offering researchers and practitioners a uniform framework of reference to currently available work The techniques presented apply to database schema matching catalog integration XML schema matching and more

Semantic Web Services Challenge Charles J. Petrie, Tiziana Margaria, Holger Lausen, Michal Zaremba, 2008-11-27

Service Oriented Computing is one of the most promising software engineering trends for future distributed systems

Currently there are many different approaches to semantic web service descriptions and many frameworks built around them Yet a common understanding evaluation scheme and test bed to compare and classify these frameworks in terms of their abilities and shortcomings is still missing Semantic Web Services Challenge is an edited volume that develops this common understanding of the various technologies intended to facilitate the automation of mediation choreography and discovery for Web Services using semantic annotations Semantic Web Services Challenge is designed for a professional audience composed of practitioners and researchers in industry Professionals can use this book to evaluate SWS technology for their potential practical use The book is also suitable for advanced level students in computer science Ontology Management Martin Hepp, Pieter de Leenheer, Aldo de Moor, York Sure, 2007-10-23 Managing ontologies and annotated data throughout their life cycles is at the core of semantic systems of all kinds Ontology Management an edited volume by senior researchers in the field provides an up to date concise and easy to read reference on this topic This volume describes relevant tasks practical and theoretical challenges limitations and methodologies plus available software tools The editors discuss integrating the conceptual and technical dimensions with a business view on using ontologies by stressing the cost dimension of ontology engineering and by providing guidance on how up to date tooling helps to build maintain and use ontologies Also included is a one stop reference on all aspects of managing ontological data and best practices on ontology management for a number of application domains Ontology Management is designed as a reference or secondary text for researchers and advanced level students studying semantic systems Semantic Web Services SWS and Web Services information systems data and knowledge engineering and the Semantic Web in general Practitioners in industry will find this work invaluable as well

Cases on Semantic Interoperability for Information Systems Integration: Practices and Applications Kalfoglou, Yannis, 2009-10-31 This book presents the use of semantic interoperability for a variety of applications ranging from manufacturing to tourism e commerce energy Grids integration geospatial systems interoperability and automated agents interoperability for web services Provided by publisher *Foundations for the Web of Information and Services* Dieter Fensel, 2011-06-21 In the mid 1990s Tim Berners Lee had the idea of developing the World Wide Web into a Semantic Web a web of information that could be interpreted by machines in order to allow the automatic exploitation of data which until then had to be done by humans manually One of the first people to research topics related to the Semantic Web was Professor Rudi Studer From the beginning Rudi drove projects like ONTOBROKER and On to Knowledge which later resulted in W3C standards such as RDF and OWL By the late 1990s Rudi had established a research group at the University of Karlsruhe which later became the nucleus and breeding ground for Semantic Web research and many of today s well known research groups were either founded by his disciples or benefited from close cooperation with this think tank In this book published in celebration of Rudi s 60th birthday many of his colleagues look back on the main research results achieved during the last 20 years Under the editorship of Dieter Fensel once one of Rudi s early PhD students an impressive list of

contributors and contributions has been collected covering areas like Knowledge Management Ontology Engineering Service Management and Semantic Search Overall this book provides an excellent overview of the state of the art in Semantic Web research by combining historical roots with the latest results which may finally make the dream of a Web of knowledge software and services come true *Multimedia Ontology* Santanu Chaudhury, Anupama Mallik, Hiranmay Ghosh, 2015-06-26 The result of more than 15 years of collective research Multimedia Ontology Representation and Applications provides a theoretical foundation for understanding the nature of media data and the principles involved in its interpretation The book presents a unified approach to recent advances in multimedia and explains how a multimedia ontology can *Semantic Multimedia* Thierry Declerck, Michael Granitzer, Marcin Grzegorzek, Massimo Romanelli, Stefan Rüger, Michael Sintek, 2011-08-19 This book constitutes the revised selected papers of the 5th International Conference on Semantics and Digital Media Technologies SAMT 2010 held in Saarbrücken Germany in December 2010 As a result of a highly selective review procedure 12 full papers and 4 short papers were accepted for publication The contributions present novel approaches for managing distributing and accessing large amounts of multimedia material The topics covered include semantic search analysis and retrieval of images audio video 3D 4D material as well as of computer generated multimedia content Also addressed are issues relating to semantic metadata management semantic user interfaces and semantics in visualization and computer graphics *Natural Language Processing in Artificial Intelligence* Brojo Kishore Mishra, Raghvendra Kumar, 2020-11-01 This volume focuses on natural language processing artificial intelligence and allied areas Natural language processing enables communication between people and computers and automatic translation to facilitate easy interaction with others around the world This book discusses theoretical work and advanced applications approaches and techniques for computational models of information and how it is presented by language artificial human or natural in other ways It looks at intelligent natural language processing and related models of thought mental states reasoning and other cognitive processes It explores the difficult problems and challenges related to partiality underspecification and context dependency which are signature features of information in nature and natural languages Key features Addresses the functional frameworks and workflow that are trending in NLP and AI Looks at the latest technologies and the major challenges issues and advances in NLP and AI Explores an intelligent field monitoring and automated system through AI with NLP and its implications for the real world Discusses data acquisition and presents a real time case study with illustrations related to data intensive technologies in AI and NLP *Business Information Systems: Concepts, Methodologies, Tools and Applications* Management Association, Information Resources, 2010-06-30 Business Information Systems Concepts Methodologies Tools and Applications offers a complete view of current business information systems within organizations and the advancements that technology has provided to the business community This four volume reference uncovers how technological advancements have revolutionized financial transactions management infrastructure
