It has been suggested that the use of the term "cognitive" is a bit of a misnomer, as it implies a more active role for the user than is actually the case. The term "cognitive" is often used to describe a system that is designed to be used by a user, but the user is not necessarily involved in the design process. The term "cognitive" is often used to describe a system that is designed to be used by a user, but the user is not necessarily involved in the design process.
