Modernizing Tradition Adam C. Stanley, 2008-12-15 In the turbulent decades after World War I both France and Germany sought to return to an idealized prewar past Many people believed they could recapture a sense of order and stability by reinstituting traditional gender roles which the war had thrown off balance While French and German women necessarily filled men's roles in factories and other jobs during the war those who continued to lead active working lives after World War I risked being called modern women Far from a compliment this derogatory label encompassed everything society found threatening about women's new place in public life smoking working women who preferred independence and sexual freedom to a traditional role in the home Society felt threatened by the image of the modern woman yet also realized that conceptions of femininity needed to accommodate the cultural changes brought about by the Great War In *Modernizing Tradition* Adam C Stanley explores how interwar French and German popular culture used commercial images to redefine femininity in a way that granted women some access to modern life without encouraging the assertion of female independence Examining advertisements articles and cartoons as well as department store publicity materials from the popular press of each nation Stanley reveals how the media attempted to convince women that with the help of newly available consumer goods such as washing machines refrigerators and vacuum cleaners being a mother or a housewife could be empowering even liberating A life devoted to the home these images promised need not be an unmitigated return to old fashioned tradition but could offer a rewarding lifestyle based on the wonders and benefits of modern technology Stanley shows that the media carefully limited women's association with modernity to those activities that reinforced women's traditional roles or highlighted their continued dependence on masculine guidance expertise and authority In this cross national study Stanley brings into sharp relief issues of gender and consumerism and reveals that despite the larger political differences between France and Germany gender ideals in the two countries remained virtually identical between the world wars That these concepts of gender stayed static over the course of two decades years when nearly every other aspect of society and culture seemed to be in constant flux attests to their extraordinary power as a force in French and German society

What explains this remarkable growth The answer is complex and involves a combination of a supportive State timely
technology alliances a skilled but historically low paid workforce aggressive pricing savvy entrepreneurs and fortuitous
circumstances Despite this amazing ascent comparatively little has been written about the Korean auto industry in English In
the first of a two volume set this 11 chapter book seeks to help fill this void by providing in depth examinations of all six of

Proceedings. Volume 2 ,1996 **Democracy at Work** Lowell Turner,2018-09-05 West Germany from 1949 to 1990 was a
story of virtually unparalleled political and economic success This economic miracle incorporated a well functioning political
democracy expanded to include a social partnership system of economic representation Then the Wall came down Economic
crisis in the East industrial collapse massive layoffs a demoralized workforce triggered gloomy predictions Was this the
beginning of the end for the widely admired German model Lowell Turner has extensively researched the German
transformation in the 1990s Indeed in 1993 he was at the factory gates at Siemens in Rostock for the first major strike in post
Cold War eastern Germany In that strike and in a series of other incisively analyzed workplace and job developments in
eastern Germany he shows the remarkable resilience and flexibility of the German social partnership and the contribution of
its institutions to unification His controversial and to some radical findings will stimulate debate at home and abroad Moving
from world markets to the shop floor this book is an ambitious and comprehensive analysis of the fate of contemporary
unions in industrial societies The international results of intensified competition and technological advance have stimulated
much policy debate but Lowell Turner is interested in clarifying a phenomenon that is far less widely understood the political
effects of new work organization on labor and management Noting that the same cluster of production innovation and
technological change has produced widely contrasting crossnational industrial relations outcomes Turner provides a detailed
systematic study of the politics of new work organization at selected auto plants in the United States and Germany He then
examines in a more schematic fashion the telecommunications and apparel industries of those countries as well as

developments elsewhere Exploring diverse patterns of union management relations he demonstrates the importance of existing national institutions and patterns of labor management state bargaining as sources of variation in work reorganization and in the collective representation of workers interests Particular national institutions of worker interest representation he argues shape managerial decisions and hence national industry responses to intensified competition in world markets His industry by industry comparison explains why the American labor movement has declined in influence over the last decade while the labor movements in Germany and several other countries have not Further observations on the situation in Britain Italy Sweden and Japan give depth and specificity to the terms of his argument Most important perhaps Turner s analysis shows the conditions necessary for stable industrial relations settlements and a resurgence of union influence in the contemporary world economy As interest grows in international business and comparative industrial relations Democracy at Work will attract the attention of political scientists economists sociologists and industrial and labor relations specialists as well as representatives of labor business and government
