Handbook On Smart Battery Cell Manufacturing: The Power Of Digitalization Kai Peter Birke,Max Weeber,Michael Oberle,2022-06-09 The transformation towards electric mobility requires the highest quality mass production of battery cells However few research in battery cell engineering focus beyond new cell chemistries As a consequence there exists a huge gap between basic battery research and comparable scientific approaches to battery cell production This handbook bridges the gap between basic electrochemical battery cell research and battery cell production approaches To run lithium ion battery gigafactories successfully and sustainably high quality battery cell production processes and systems are required The Handbook on Smart Battery Cell Manufacturing provides a comprehensive and well structured analysis of every aspect of the manufacturing process of smart battery cell including upscaling battery cell production accompanied by many instructive practical examples of the digitalization of battery products and manufacturing systems using an integrated life cycle perspective Alternative Propulsion for Automobiles Cornel Stan,2016-08-05 The book presents based on the most recent research and development results worldwide the perspectives of new propulsion concepts such as electric cars with batteries and fuel cells and furthermore plug in hybrids with conventional and alternative fuels The propulsion concepts are evaluated based on specific power torque characteristic acceleration behaviour specific fuel consumption and pollutant emissions The alternative fuels are discussed in terms of availability production technical complexity of the storage on board costs safety and infrastructure The book presents summarized data about vehicles with electric and hybrid propulsion The propulsion of future cars will be marked by diversity from compact electric city cars and range extender vehicles for suburban and rural areas up to hybrid or plug in SUV s Pick up s and luxury class automobiles

The Automotive Transmission Book Robert Fischer,Ferit Küçükay,Gunter Jürgens,Rolf Najork,Burkhard Pollak,2015-05-11 This book presents essential information on systems and interactions in automotive transmission technology and outlines the methodologies used to analyze and develop transmission concepts and designs Functions of and interactions between components and subassemblies of transmissions are introduced providing a basis for designing transmission systems and for determining their potentials and properties in vehicle specific applications passenger cars trucks buses tractors and motorcycles With these fundamentals the presentation provides universal resources for both state of the art and future transmission technologies including systems for electric and hybrid electric vehicles *Electrical Energy Storage in Transportation Systems* Benoit Robyns,Christophe Saudemont,Daniel Hissel,Xavier Roboam,Bruno Sareni,Julien Pouget,2016-08-16 This book deals with the management and valuation of energy storage in electric power grids highlighting the interest of storage systems in grid applications and developing management methodologies based on artificial intelligence tools The authors highlight the importance of storing electrical energy in the context of sustainable development in smart cities and smart transportation and discuss multiple services that storing electrical energy can bring

Methodological tools are provided to build an energy management system storage following a generic approach These tools are based on causal formalisms artificial intelligence and explicit optimization techniques and are presented throughout the book in connection with concrete case studies
