The author applies a critical gaze to attempts to improve practice through regulation and fundamentally challenges how residential child care is conceptualised He argues that it needs to move beyond dominant discourses of protection rights and outcomes to embrace those of care and upbringing The importance of the personal relationship in helping children to grow and develop is highlighted Other traditions of practice such as the European concept of social pedagogy are also explored to more accurately reflect the task of residential child care The book will be of interest to practitioners in residential child care social workers and students on social work and social care courses It should be required reading for social work managers and will also be of interest to policy makers and students of social policy education and childhood studies Digital Information Strategies David Baker, Wendy Evans, 2015-12-10 Digital Information Strategies From Applications and Content to Libraries and People provides a summary and summation of key themes advances and trends in all aspects of digital information at the present time This helpful resource explores the impact of developing technologies on the information world Written from an international perspective the book emphasizes key current topics and future developments The publication is based on a dynamic set of contents that respond to and anticipate what is happening and what may well happen in the field of digital information Presents a comprehensive overview of the major aspects of contemporary digital information provision Serves as

The Voynich Manuscript as an Example of Oligo-Agglutinative Pasigraphy, Vol. II: The Semantic Classification System Steve Bolton, Class III problems are considered practically unsolvable in cryptology but none has resisted cryptanalytic attack as persistently as the Voynich Manuscript In the second installment of this 4 volume set we present the semantic classification system that preceded the first complete but approximate translation of the entire manuscript This contrasts with the piecemeal approach of all prior solutions that resulted in wildly diverent translations of minuscule selections of the text This systemic attack on the entirety of the text and its unusual distributional features such as extreme platykurtia which forbid translation into any natural language resulted first in superior transcription stability and an equally stable symbol set based on intensive statistical analysis The encoding scheme employs a 20 22 letter alphabetic script that most closely resembles a slot and filler top down a priori pasigraphic system with oligo agglutinative features that are currently only considered a theoretical possibility in the linguistics field The intricate affixing system is based mainly on precise placement of single letters to denote case roles semantic classes and 3 primary parts of speech exhibiting a strong noun surfeit At the phrase level we find dominant SOV order and head final dependent marked grammar compatible with
